COROLLA 4-DOOR LE SEDAN AND SR5 SPORT LIFTBACK

ALL NEW AND MORE COROLLA THAN EVER

It takes guts to redesign one of the world's most popular cars. But Toyota did it with one bold dramatic step: introducing the exciting, all-new Corollas!

The 1984 Toyota Corollas answer the world's driving needs better than ever. Here's a no-compromise, technologically advanced design that

provides comfort and convenience unmatched in the economy car class—all without sacrificing Corollas' well-earned reputation for affordability, low operating cost and reliability.

For family-size roominess, comfort and practicality, there are the spacious front-wheel drive 4-Door Sedans and versatile 5-Door Liftbacks with a new wedge-shaped body design. They give you the interior space of a compact with the maneuverability of a much smaller car. They're as smart for the road as they are for your budget.

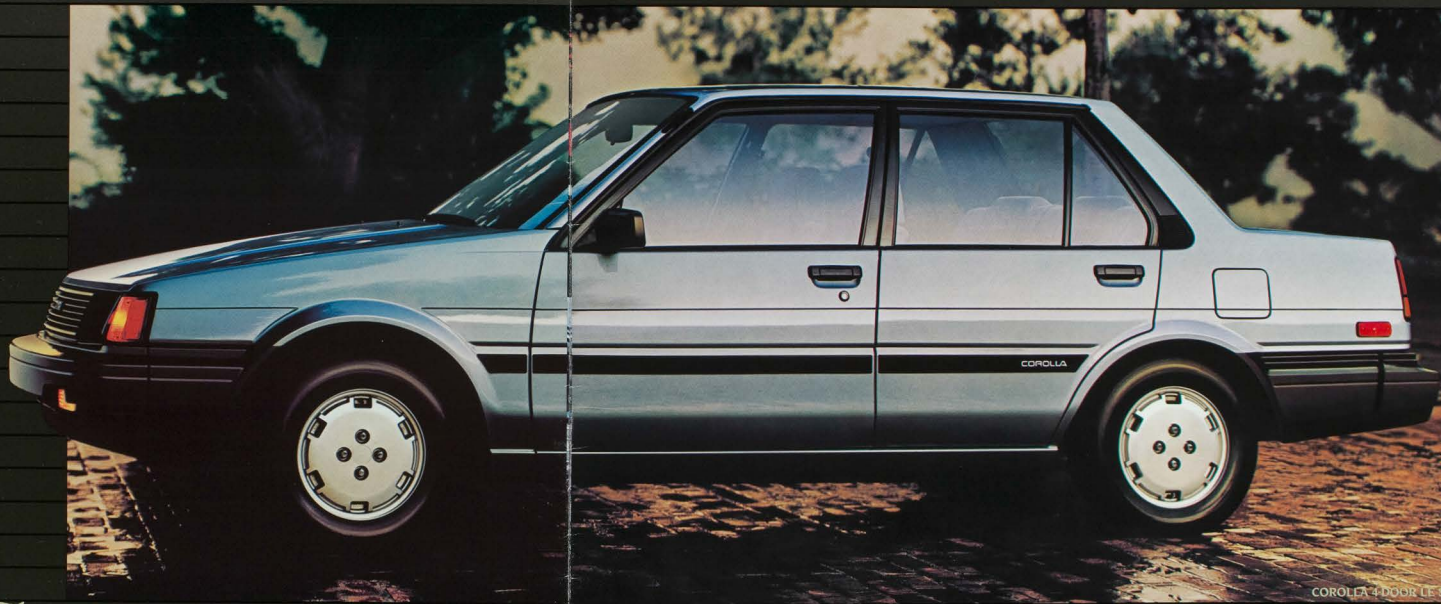

If sporty-car driving is your pleasure, choose the sleek, aerodynamic SR5 Sport Liftback or Coupe, each a unique combination of sportiness, excitement and affordability.

Depending on the model, there's a responsive 1.6 liter SOHC gasoline-powered engine or an all-new 1.8 liter diesel, both designed for durability and high MPG in the Corolla tradition. And newly designed handling features make these the most road-worthy Corollas ever.

A brand new look, new economy, new comforts and conveniences, plus traditional dependability, reliability and quality. The 1984 Corollas are reborn with even more of what it takes to rank among the world's bestselling automobiles.

COROLLA 4 DOOR LE SEDAN

Complete

COMPLETELY BEAUTIFUL ECONOMY

Few economy cars are more complete than the beautiful Corolla 4-Door LE Sedan. Its equipped with the economy features you want most—an affordable price and family-size thrif—yet it has impressive styling and 5-passenger room and comfort to challenge many larger family sedans.

The 1984 Sedan's wind-slipping profile, smooth body lines and distinctive European-style rear deck are for more than just good looks. Together with such features as semi-concealed wipers and recessed door handles, they help provide improved aerodynamics and better gas mileage.* Corolla delivers brisk, dependable performance with a responsive 1.6 liter SOHC engine coupled with a 5-speed overdrive transmission. If you prefer, there's an optional 3-speed automatic

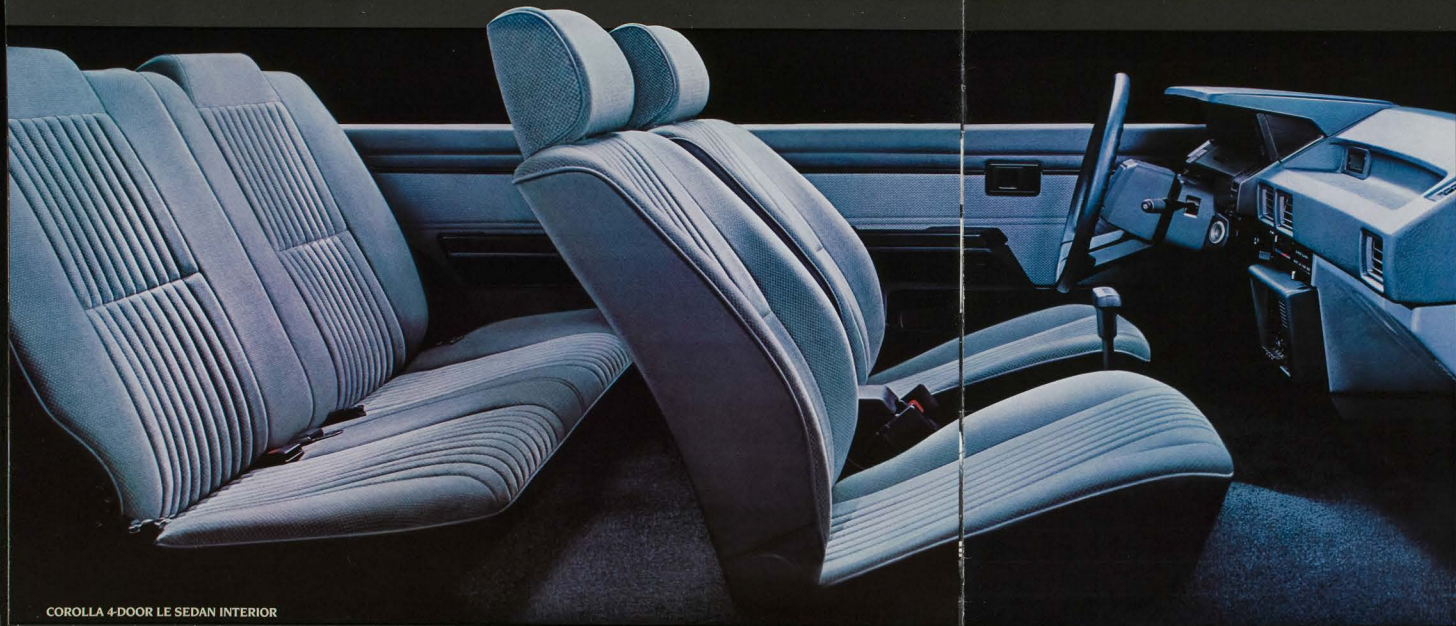

transmission with lock-up torque converter designed to give you the convenience of an automatic with the efficiency of a manual transmission. The Corolla LE Sedan handles the demands of the road with the all-weather traction of front-wheel drive and engineering refinements such as rack-and-pinion steering, power-assisted front disc/rear drum brakes, MacPherson strut front suspension, and independent rear suspension with gas-filled shocks. A wide-tread stance provides greater stability. Front-

wheel drive engineering means an exceptionally roomy interior. And there are also such practical considerations as child protector door locks and a trunk with over 15% more luggage space than ever.

With its good looks, affordability, comforts and spacious interior, the Corolla LE Sedan is one of the most complete economy cars on the road.

COROLLA 4-DOOR LE SEDAN INTERIOR

**INSIDE, SPECIALLY
DESIGNED FOR ROOM
AND COMFORT**

The first thing you'll notice when you get inside the 1984 Corolla 4-Door LE Sedan is how roomy it is. Room, comfort and convenience have been given special attention—adding up to an exceptional interior.

Space-saving front-wheel drive and a uniquely efficient interior design

combine with such features as a recessed instrument panel, plus a virtually flat floor to give exceptional 5-passenger room all around.

Within this outstanding driving environment you'll find such standard features as a multi-adjustable driver's seat with lumbar support, a tilt steering wheel, dual power remote control side mirrors, even split rear seatbacks that fold down to provide a fully carpeted cargo area.

For driver convenience, all gauges and switches on the instrument

panel are located and clustered for easy reading and fingertip control. And you'll be treated to soft velour-upholstered seats, full carpeting, tinted glass and an AM/FM/MPX stereo receiver with four speakers.

Finally, wherever you look inside the 1984 Corolla, it's easy to see meticulous Toyota quality. And that's the most comforting feature of all.

GOOD LOOKS THAT MAKE GOOD SENSE.

If your good sense dictates practicality, affordability, and smart styling, too, the front-wheel drive Deluxe Corollas are as smart a value as you'll find on the road today.

Choose the practical, easy-loading 5-Door Deluxe Liftback, aerodynamically designed with a coefficient of drag of only .34 to aid fuel efficiency,*

For the convenience of a roomy trunk, there's the 4-Door Deluxe Sedan. Both models are powered by an efficient 1.6 liter SOHC engine coupled with a 5-speed overdrive or optional 3-speed automatic transmission with lock-up torque converter.

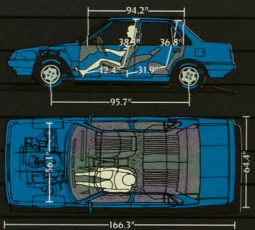

Also available are a Deluxe Diesel Liftback and a Deluxe Diesel Sedan** equipped with the added fuel economy of Toyota's true-diesel engine. All 1984 Deluxe Corollas are value-packed with such features as soft-

upholstery, the luxury of full carpeting, and reclining front bucket seats. Best of all, you can count on proven Corolla resale value, low maintenance, and dependability mile after mile.

For economy that looks good inside and out, the Deluxe Corollas are a sensible value.

Roomy Design

Front-wheel drive design provides a flat floor that, together with recessed instrument panel and lowered, angled rear seat, gives the Sedan and Liftback roomier, more comfortable 2-passenger interiors. BUCKLE UP... IT'S A GOOD FEELING!

Toyota makes it easy for you and your passengers to get into the seat belt habit. We urge you to use your seat belts every time you drive. Safety experts say: "Buckle up!" Here are a few good reasons why:

- When properly adjusted, seat belts can help the driver maintain better vehicle control.
- Studies show that generally the safest place in a collision is inside your vehicle. Seat belts can help keep you there.
- Small children can be injured during quick turns or sudden stops; they should be provided

with a child restraint system dynamically tested to meet federal standards. Select a restraint system carefully.

The seat belts in the 1984 Corolla are not only designed to meet or exceed all government requirements for effectiveness, but are also engineered for simple operation and maximum comfort.

*Front seat belts with Emergency Latching Retractors allow complete

freedom of normal movement for the driver and front passenger, but under severe changes in vehicle motion, they automatically lock to restrain body movement.

- The Seat Belt Tensioner System in Corolla Sport models helps draw the driver's seat belt out of the way for easier entry and exit when the door is opened.
- Rear seat belts with Automatic Latching Retractors self-lock in position after the user buckles up. They permit installation of child restraint systems. It is
