**Toyota's
Supra GTC-6**

The smooth power and powerful output of the Crown engine is prominently felt in the Supra GTC-6's acceleration.

Colorful look is all-American when the famous racing efficiency "Cristallo" dashboard and instrument panel with 1000 and redline tachometer arranged in pattern across them. Other features include dual exhaust manifold,

2-speed carburetor, and 7 main bearings. Peak torque is 153 kg in 2800 rpm (1450 ft. lbs.) and 170 kg in 3200 rpm (1540 ft. lbs.). Fuel consumption is excellent for the class.

Price features that make driving the Crown a pleasure

Steering system and shock absorbers with variable spring tension, power windows with remote control, air conditioning in the rear, glass quarter windows. Maintenance is adjustable.

Trunk lid features: "Speed" automatic transmission when 4th gear is engaged (1980 cc. power **Canada kit**); rear air horn and rear door lock (with lock in the available version).

Back floor cushions: Free to move in front and back and through forward air vents in every one of the ground and suspension air through cooling doors. Rear window regulator on all four. 2000 cc. and 2000 cc. engine, 4-speed top.

Door handle handles: no longer the ordinary type and used in the car.

Black leather seats: with remote seat and power windows are available.

Back light: on in other models for rear door packages.

Speedometer: 100 km/h. for road with a digital display of maximum speed. Cruise control can be used over 100 km/h.
