Please to the Texas Center. This experience will surely impress you on the new meaning of relaxation and fun in a car. Meet the new group out at your nearest Texas dealer.

**Toyota's  
Supra GRC-5**

The usually quiet and powerful output of the Corona engine is guaranteed due to the Toyota GRC mechanism. Cylinders lined in aluminum allow for better cooling efficiency. Continuous dampers are hemispherical type with intake and exhaust manifolds arranged to produce even flow. Other features include dual exhaust manifolds, dual carburetors, and 7 main bearings. Peak output is 125 hp at 5200 rpm (DIN), peak torque 11.6 cu ft at 1275 rpm at 3000 rpm. Fuel consumption is amazing low for this class.
