# PERSONAL TOUCHES

Your Toyota comes with a heritage of distinctive quality and advanced design. Now give it your own personal style with a selection of Genuine Toyota Accessories. Toyota offers a wealth of accessories which will provide additional comfort, convenience, and protection. Toyota-approved Parts and Accessories

are manufactured using the finest materials, and with the most precise workmanship. They exceed not only stringent industry standards but Toyota's even higher quality standards as well.

The *Intrusion Monitoring System* is a technologically advanced security system for your Toyota. A convenient in-dash on/off

switch lets you operate the system with your ignition key and a flashing red light alerts you when it is activated. The Intrusion Monitoring System sounds a loud, instant alarm and flashes interior and parking lights for a full two minutes upon forced entry to hood, trunk, or liftback. And the special Electronic Motion Sensor helps

protect your Toyota from towing, tampering, and broken-glass entry. The system will be available in late Fall 1984 for 1985 Camry, Celica, and Van models.

Floor mats add stylish protection for your Toyota's carpeting. Use them to guard against dirt, stains, and everyday wear and tear. Color-coordinated Toyota floor mats

complement your vehicle's interior.

A unique *Coolerlike Maker* is available for selected Van models equipped with dual air conditioning. It has room for six 12 oz. cans, and makes its own ice cubes, too!

Genuine Toyota air conditioning provides all-year comfort. It cools you in summer, warms you in winter, and defogs your

windshield quickly and thoroughly. All systems are designed to function under extreme temperature conditions.

Toyota Accessories personalize your new Toyota with added comfort, convenience, and security for years of dependable driving pleasure.
