

'09 Mercury MOUNTAINEER

MERCURY | NEW DOORS OPENED

Styled for Freedom.

MOUNTAINEER PREMIER IN BRILLIANT SILVER METALLIC WITH AVAILABLE EQUIPMENT.

Freedom of Expression.

With exciting new features to keep you connected and on the go, the 2009 Mercury Mountaineer gives you all the freedom you need to fully express yourself.

Outside, start with massive new 20" polished-aluminum wheels, optional on Mountaineer Premier, to raise your stance on any road. Or choose the available new VOGA Package, with exclusive exterior and interior treatments, for a Mountaineer like no other.

Inside, an available new voice-activated, hard drive-based Navigation System turns Mountaineer into the ultimate trip advisor with its suite of SIRIUS Travel Link™ services.¹ Check the weather, find the lowest-priced fuel in town, scout the listings for your local theater – all from the 6.5" Navigation System screen inside Mountaineer Premier. Then use the available Mercury SYNC® voice-activated, in-vehicle communications and entertainment system² to place a call from your paired, compatible Bluetooth®-enabled mobile phone, and you'll see how easy and convenient the road of life can be. As long as you're driving a 2009 Mercury Mountaineer.

¹Real-time traffic monitoring available in select markets. Some features are unavailable while driving. Service not available in Alaska or Hawaii. See your Mercury dealer for details. ²Driving while distracted can result in loss of vehicle control. Only use mobile phones and other devices, even with voice commands, when it is safe to do so. The Bluetooth word mark is a registered trademark owned by the Bluetooth SIG, Inc.

MOUNTAINEER PREMIER IN BRILLIANT SILVER METALLIC WITH AVAILABLE EQUIPMENT AND MERCURY ACCESSORY RUNNING BOARDS.

Introducing Mountaineer VOGA.

Wherever it travels, the 2009 Mercury Mountaineer equipped with the VOGA Package will be on display. Please dress accordingly.

With plenty of chrome accenting its Black or White Chocolate exterior hue, Mountaineer VOGA shines. Chrome sparkles on the grille, rear trim, sideview mirror caps, roof rails, unique "VOGA" badging, and 18" bright chrome-clad wheels with exclusive "VOGA" center caps. Inside, a high-contrast interior features Cashmere-colored leather-trimmed seats – exclusive to VOGA – against a Charcoal Black environment. Embroidered "VOGA" logos on the front seatbacks and front floor mats add further refinement, while Cashmere-colored door-trim inserts and unique Cyber Carbon interior appliqué add the finishing touches.

All this finery is in addition to Mountaineer Premier standard features like Mercury SYNC, SIRIUS Satellite Radio, Dual-zone Electronic Automatic Temperature Control and 10-way power driver seat.

MOUNTAINEER PREMIER LEATHER-TRIMMED SEATS IN CHARCOAL BLACK WITH SAND ALCANTARA INSERTS.

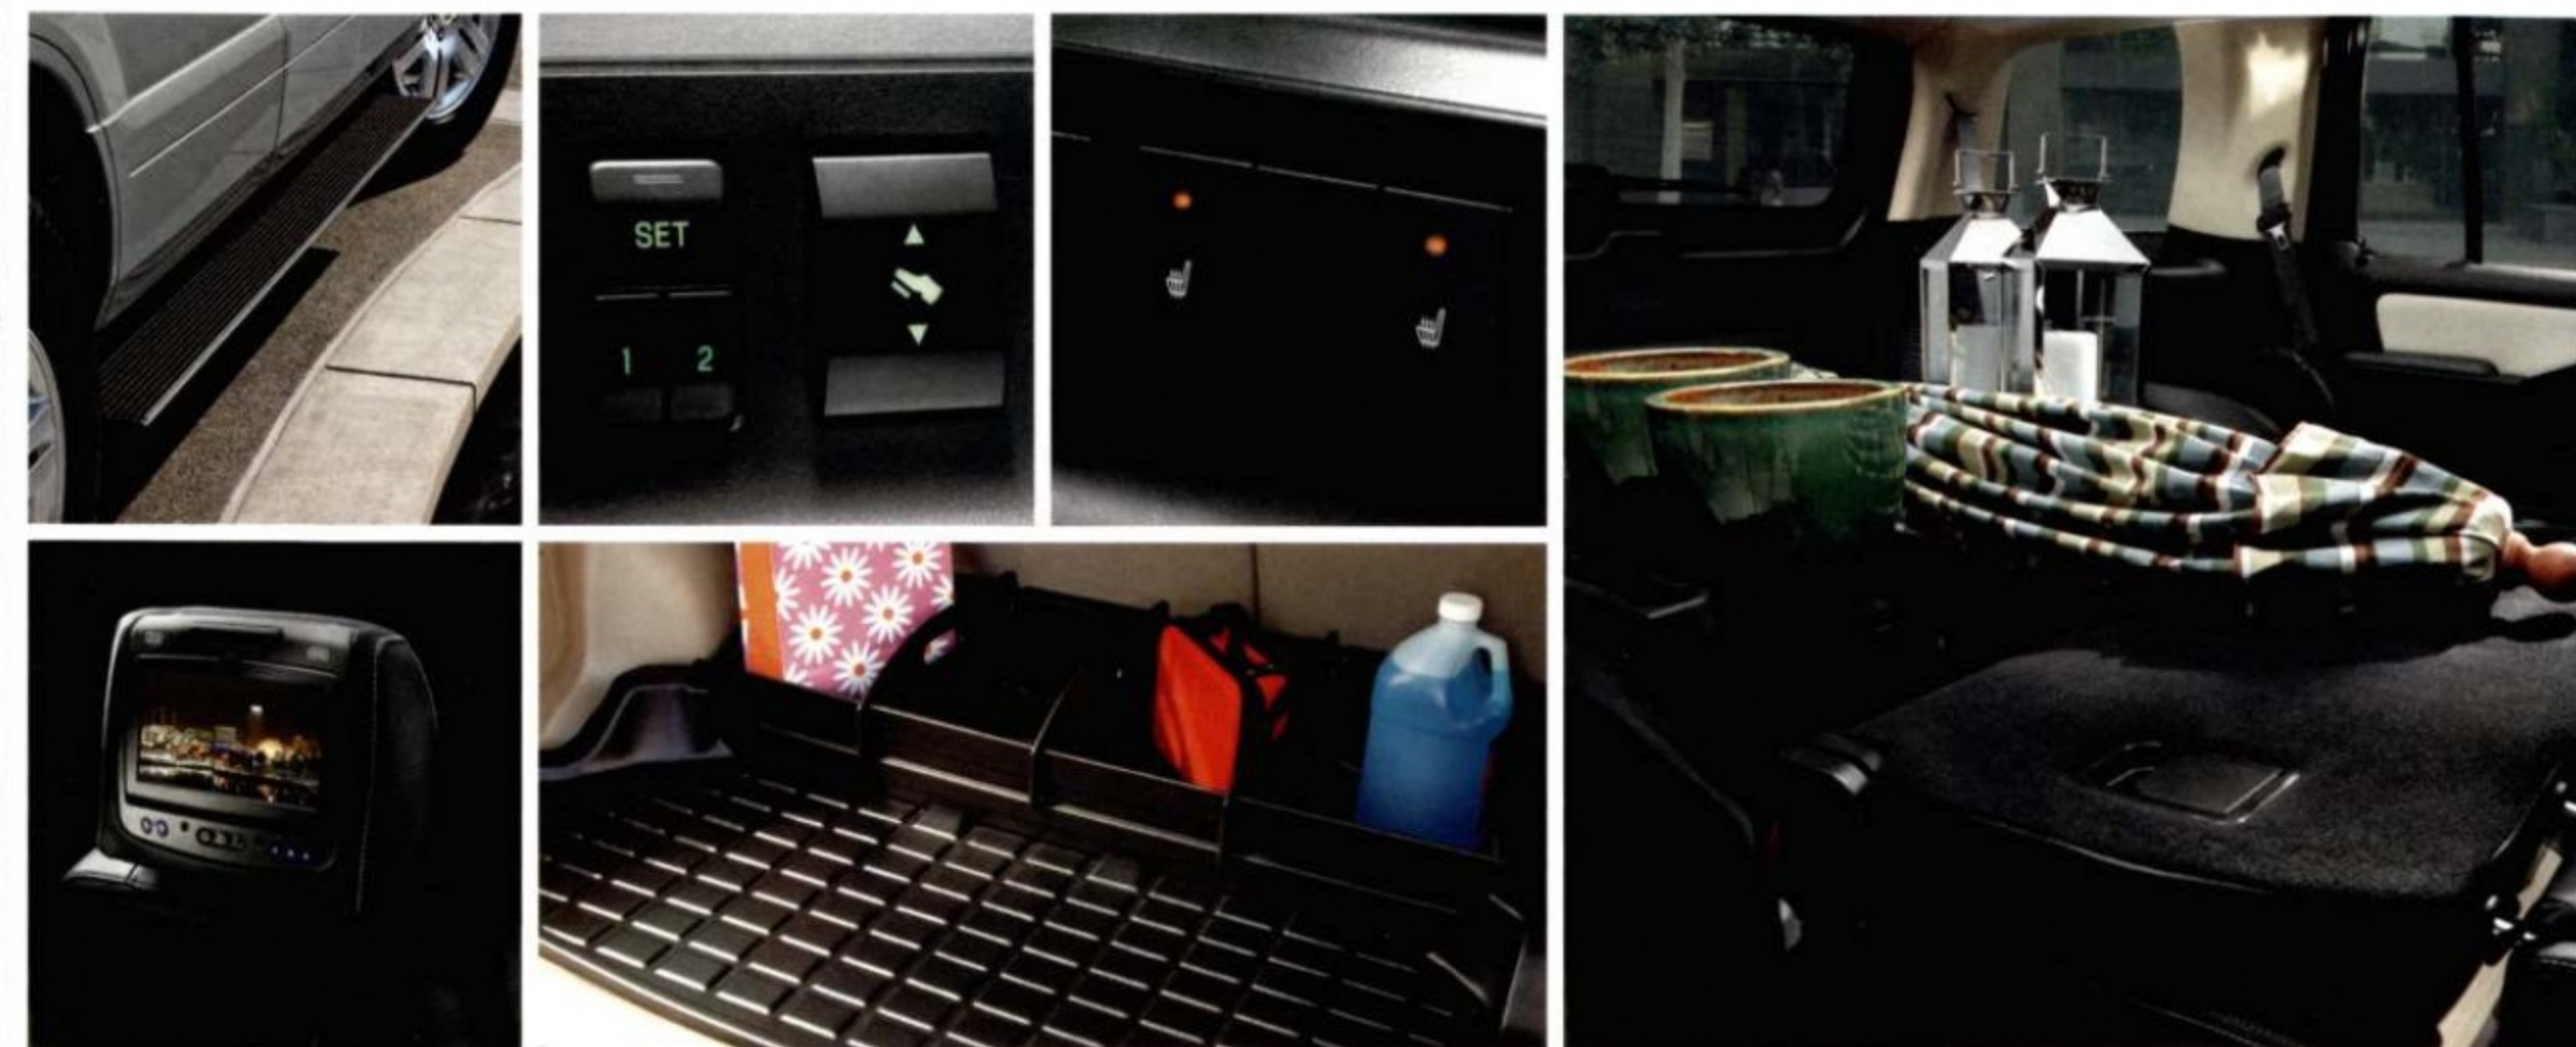

Strike a Confident Pose.

To begin, select Mountaineer Premier with the standard 10-way power driver seat and two-tone leather-trimmed seats in stunning Charcoal Black with Sand Alcantara® inserts (shown). In the 2nd row, a standard 60/40 split seat completes the interior of 5-passenger models. For 6-passenger seating in Mountaineer Premier, select available quad bucket seating with a 2nd-row center console. And if seating for 7 (shown) is needed, Mountaineer and Mountaineer Premier can be outfitted with the 60/40 split seat in the 2nd row and the 50/50 split seat behind that.

A manual-fold version of the 3rd-row seat is standard on Premier and optional on Mountaineer (as part of the 3rd-row Seat Package). The handy, first-in-class¹ PowerFold™ 3rd-row seat is optional on Premier as part of the 3rd-row Seat Elite Package. The PowerFold buttons make quick, easy work of folding down the seat, opening up 43.9 cu. ft. of cargo space behind the 2nd row.

¹Truck-based midsize SUV class.

Powerfully Purposeful.

With its many creature comforts, a Mountaineer Premier equipped with the available Amenities Package can make any weekend project a whole lot easier. The Reverse Sensing System will alert you when to stop as you slowly back in to load your home improvement items, and the power-deployable running boards will slide out to greet your feet and graciously help you down to the pavement.

Other power features that help make your life easier include available power-adjustable pedals with memory that allow you to store and recall settings for 2 different drivers, as well as available heated, leather-trimmed front seats that keep the chill away.

For those in the rear, the available Dual INViSiON® DVD Headrests¹ feature 2 totally independent 7" color Thin Film Transistor (TFT) LCD widescreen monitors incorporated into the front-seat head restraints. Watch the same movie on both screens, or a different one on each. And game/video ports allow connection to portable gaming systems.

To keep Mountaineer's cargo area organized behind the 3rd row of seats,² the available interior cargo organizer³ is a removable and adjustable divider system that helps separate and organize your belongings. When Mountaineer's 2nd- and 3rd-row seats² are folded down, a spacious 83.7 cu. ft. of loadable cargo room is available.

¹Available through your Mercury Dealer as a Dealer-Installed Mercury Licensed Accessory. ²In 7-passenger models. ³Available through your Mercury Dealer as a Mercury Accessory.

Packaged to Please.

Ten available packages help you tailor Mercury Mountaineer exactly to your liking. If you prefer pampering, select the Comfort Package on Mountaineer and you'll be treated to heated, leather-trimmed front bucket seats, a 10-way power driver seat with power lumbar, a 6-way power passenger seat and Dual-zone Electronic Automatic Temperature Control. On Mountaineer Premier, the Amenities Package provides power-deployable running boards, a Universal Garage Door Opener and a Reverse Sensing System. If seating for 7 is required, choose the 3rd-row Seat Package on Mountaineer or the 3rd-row Seat Elite Package on Mountaineer Premier. Is towing a boat or a pair of jet skis more your style? Just equip Mountaineer Premier with the Trailer Tow Upgrade Package and available 4.6L V-8 engine and you can tow up to 7215 lbs. on 4x2 models.

New for 2009, the available voice-activated Navigation System features the same speech-recognition software as Mercury SYNC, so control couldn't be easier. The system reads upcoming street names aloud, detects traffic incidents ahead, and even offers alternate routes. And with nearly 10 gigabytes of hard drive storage, you can store photos for your home page and rip CDs or your favorite songs (up to 2400 of them). You can even watch DVDs on-screen when Mountaineer is in "Park."

Information is Power.

And Mercury Mountaineer gives you the link: SIRIUS Travel Link™. Included as part of the available new Navigation System (shown at left), SIRIUS Travel Link is a powerful driving companion that can find and display the best fuel prices, identify an accident and redirect your route, and even provide the weather forecast (complete with radar maps on the 6.5" screen). The latest sports scores and movie listings are also in its repertoire.

That's all in addition to the over 130 channels of crystal clear, digital-quality sound that's provided by available SIRIUS® Satellite Radio,² which comes with a complimentary 6-month subscription.

¹Real-time traffic monitoring available in select markets. Some features are unavailable while driving. Subscription required after complimentary 6 months expire. Service not available in Alaska or Hawaii. ²Service not available in Alaska or Hawaii. See your Lincoln Mercury Dealer or contact SIRIUS at 1-888-539-7474 for more information. Microsoft is a registered trademark of Microsoft Corporation. ³Premium Sound System included in Navigation System features a single-CD/DVD player.

Your Entertainment. Your Way.

With a standard audio input jack inside the front center floor console (above left), your digital music library has wheels. Connect your media player and broadcast your favorite tunes, audiobooks or podcasts through the speakers. With the Premium Sound System, there are 7 strategically placed ones (8" subwoofer included), as well as a 6-disc CD changer and 290 watts of maximum power. It's teamed with a power moonroof in the available Moon & Tune Elite Package on both models. On Premier, it's paired with the Navigation System³ and moonroof in the available Navigation/Moon & Tune Package.

To keep rear-seat passengers happy, an available Rear-Seat DVD Entertainment System (above) includes an 8" LCD screen, 2 sets of wireless headphones and a remote control.

You Talk. SYNC Listens.™

More importantly, Mercury SYNC® responds. Developed in concert with Microsoft,[®] this available voice-activated, in-vehicle communications and entertainment system allows you to voice-activate compatible Bluetooth®-enabled mobile phones, most MP3 players, thumb drives and more. Tell it to call Heather. Ask it to play a specific tune. No problem. SYNC even reads incoming text messages to your mobile phone over the vehicle speakers. How convenient is that?

"SYNC is a masterpiece in user-friendliness," says *Cars.com*. "It's a win-win feature that's so affordable and easy to use it's a good bargain even if you're not a technophile." Get synced up now.

Visit SyncMyRide.com for the latest information about exciting new features.

Powerful Poise.

In the 2009 Mercury Mountaineer, robust power is backed by impressive poise. A 4.6L 3-valve V-8 engine, available on Mountaineer Premier, supplies 292 hp and 315 lb.-ft. of torque. High-flow ports and dual-equal variable cam timing help this robust V-8 deliver its impressive performance. Also providing assistance is the first-in-class available 6-speed automatic transmission, whose evenly spaced gear ratios make the most of the V-8's wide powerband.

The standard 4.0L V-6 engine on Mountaineer and Mountaineer Premier is teamed with a wide-ratio 5-speed automatic transmission. With 210 hp and 254 lb.-ft. of torque, this clean-burning engine even meets strict Ultra Low Emissions Vehicle II (ULEV II) standards.¹ Plus, both Mountaineer advanced engines deliver up to 20 mpg.²

Underneath, Mountaineer's Independent Rear Suspension features a compact, trailing-arm setup. Together with the front suspension and stiff frame, it helps deliver a refined ride and excellent handling. You'll feel connected to the road — not beat up by it. Heightening that connectivity is Mountaineer's available full-time All-Wheel-Drive (AWD) system. This intuitive system smartly adapts to changing road and weather conditions as they occur, instantly transferring power to the axle with the best grip to help Mountaineer really hold the road.

¹ULEV II is a rating approved by the California Air Resources Board. Vehicles sold in federally regulated states meet the Environmental Protection Agency's Tier 2/Bin (5) emissions standards. ²2008 EPA-estimated 14 mpg city/20 hwy. with 4.0L engine on 4x2, 13 mpg city/20 hwy. with 4.6L engine on 4x2.

MOUNTAINEER PREMIER IN BRILLIANT SILVER METALLIC WITH AVAILABLE EQUIPMENT.

Ready and Stable.

Standard on every 2009 Mountaineer, AdvanceTrac® with RSC® (Roll Stability Control™) is the industry's only electronic stability control system with 2 gyroscopic sensors, one of which is a unique vehicle-roll motion sensor that directly measures the roll rate 100 times every second. Working in conjunction with the Anti-lock Brake System (ABS), traction control and yaw control, AdvanceTrac with RSC uses the roll rate and other information to automatically determine when and how it will apply individual brakes and modify engine power to help keep all 4 wheels firmly planted. Not available on any of Mountaineer's competitors, this system really proves its worth when you have to make an emergency maneuver; drive on slippery surfaces; or even travel on uneven surfaces, such as in construction zones.

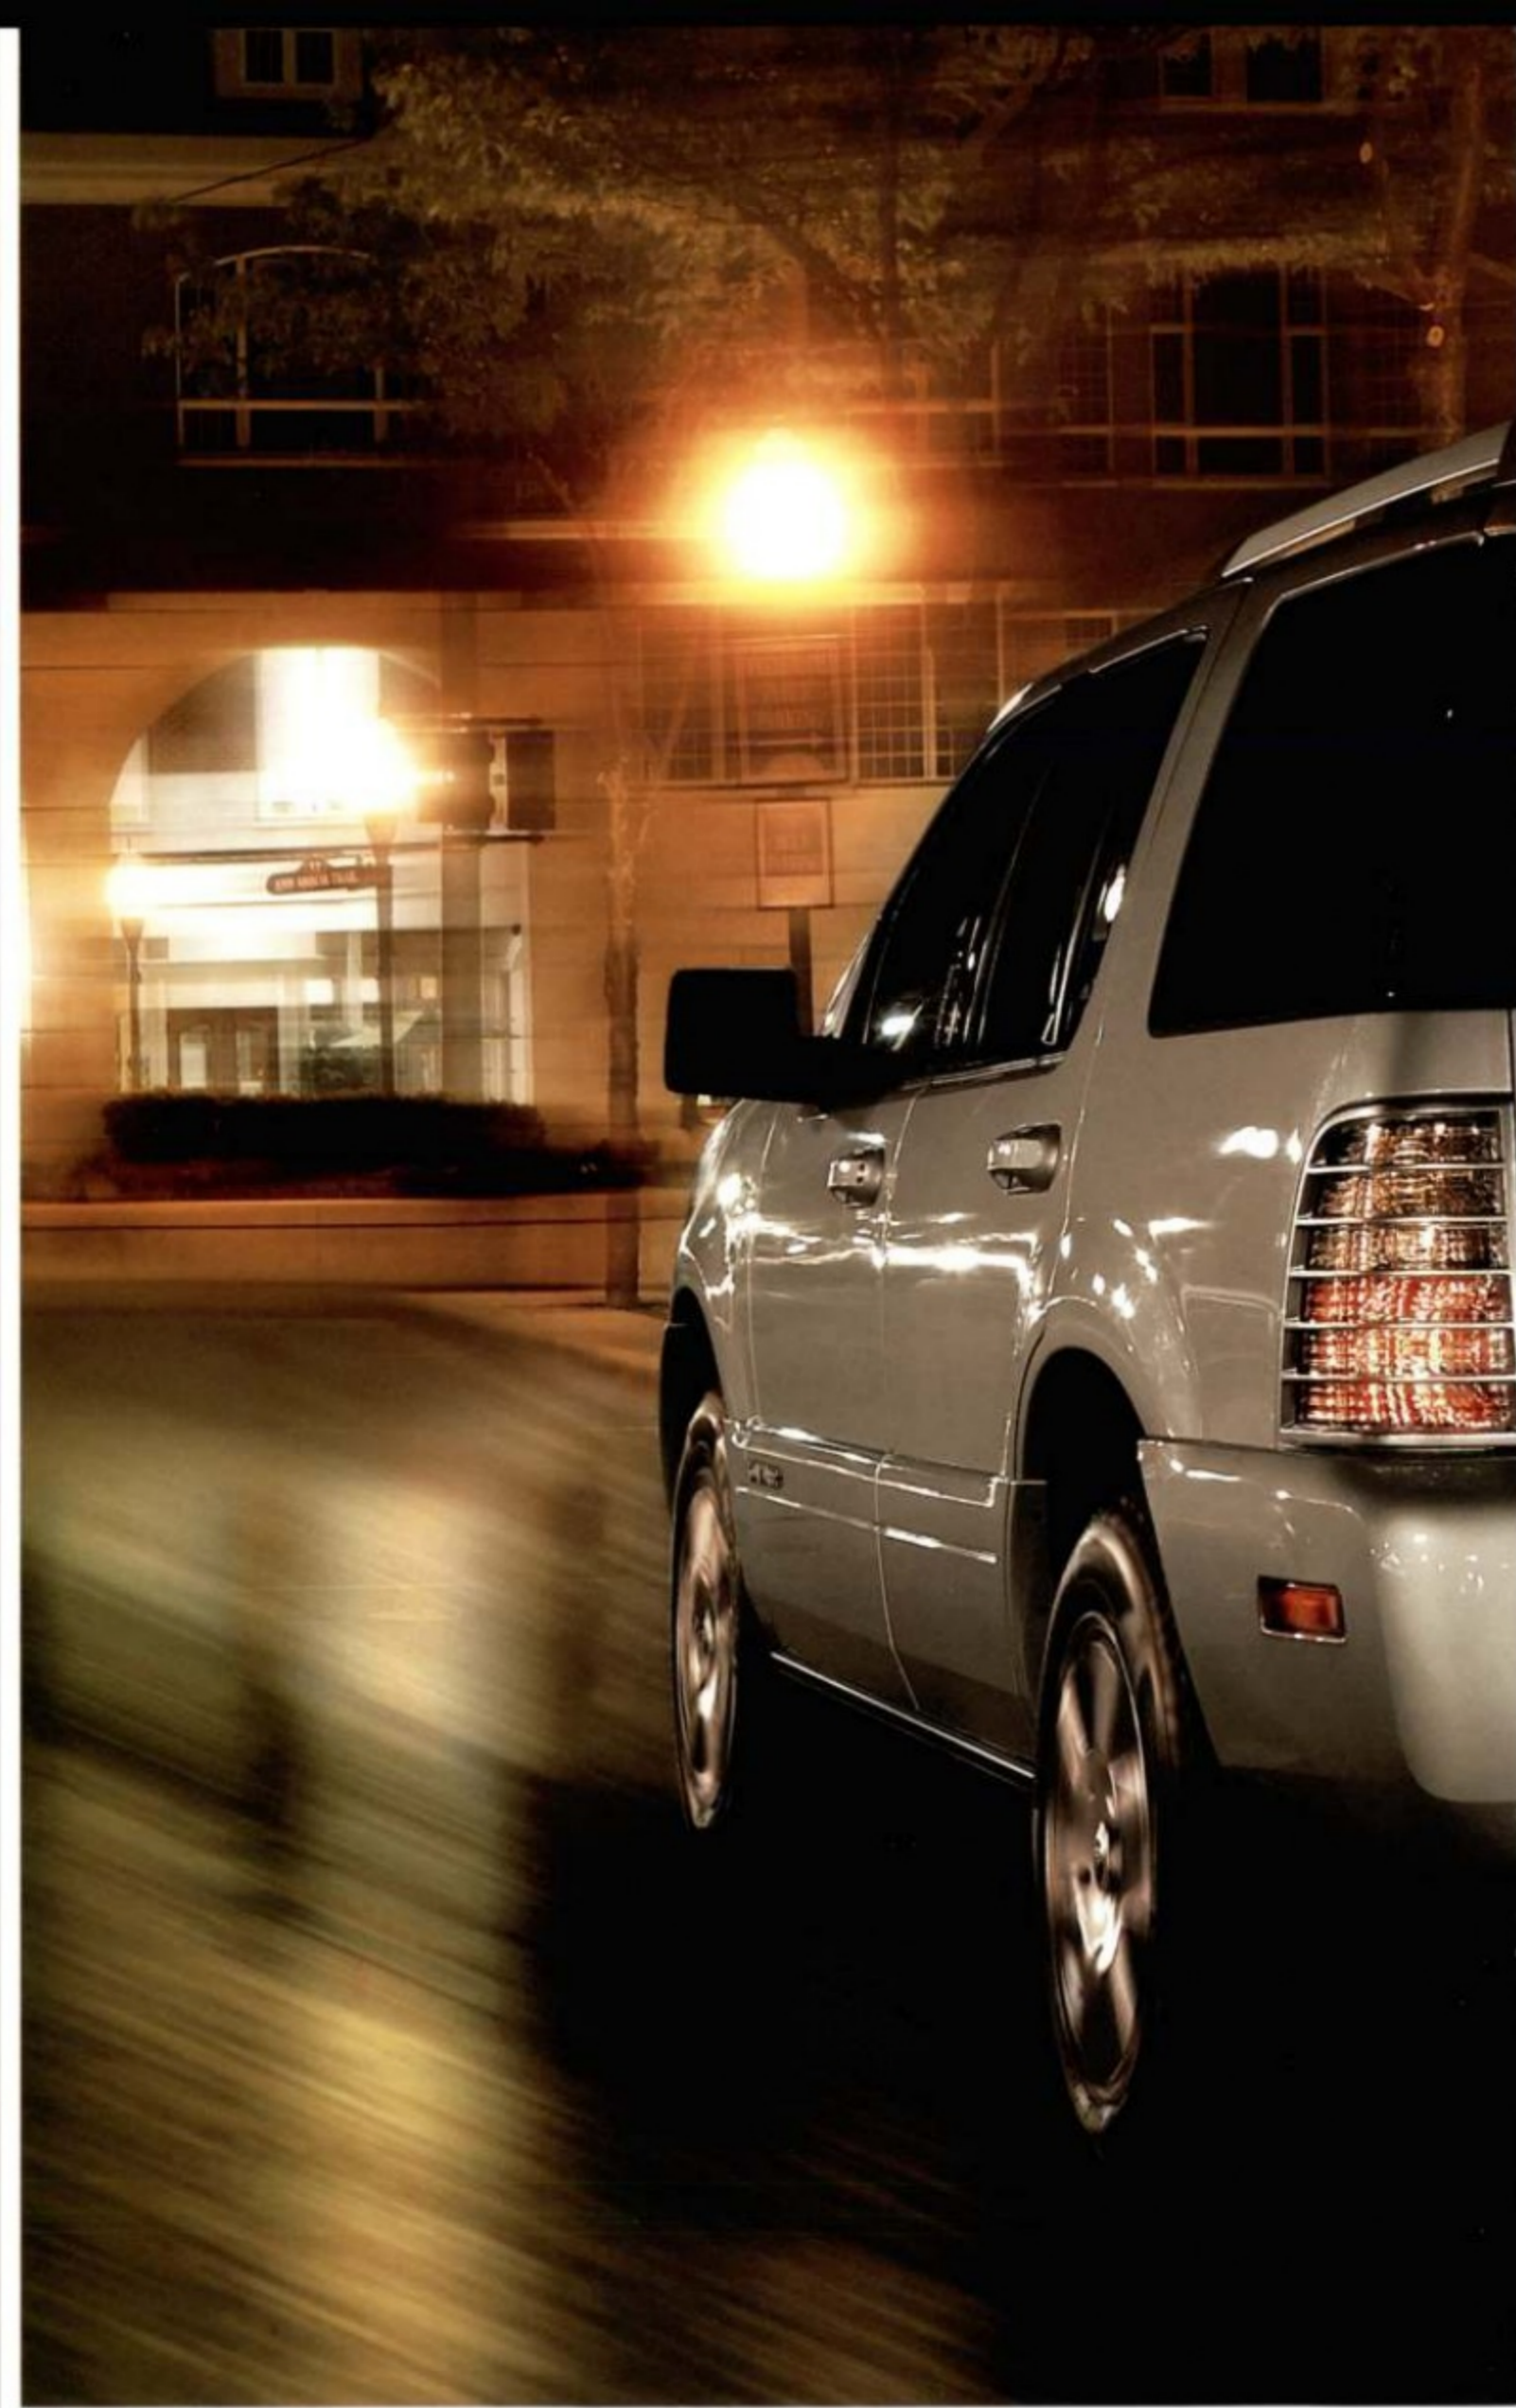

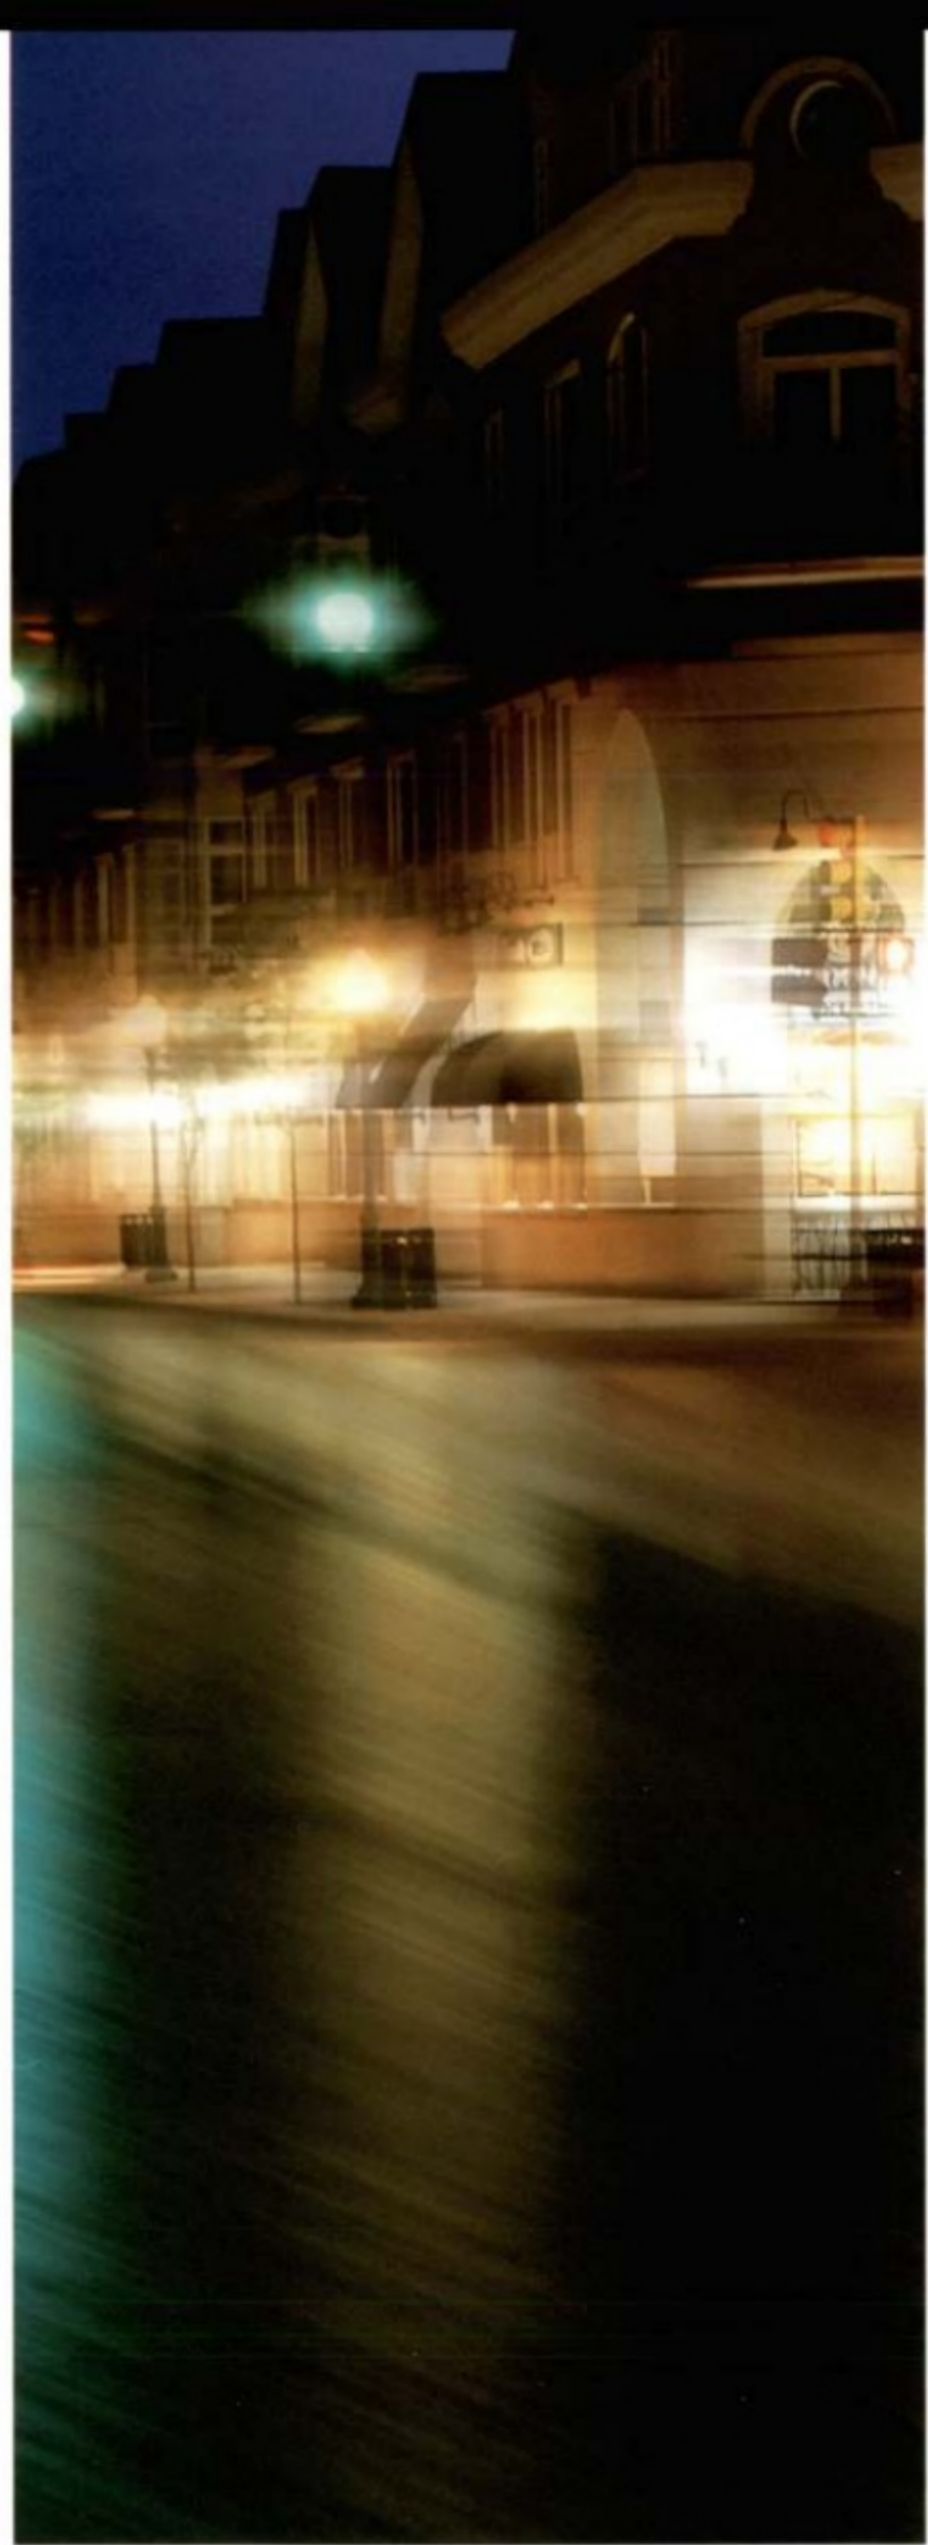

In the event of a collision, Mountaineer's 6 standard airbags are at the ready. The Intelligent Safety System™ deploys front airbags that use adaptive venting technology to help tailor airbag power to occupant size and needs. Front-seat side airbags help provide an extra measure of chest protection for the driver and front passenger in certain side-impact events. And our standard Safety Canopy® System features large, side-curtain airbags that enhance protection for outboard-seated occupants in the 1st and 2nd rows. Roll-fold technology helps them deploy—even if someone is leaning against the window.

Additional peace of mind comes from the new SOS Post-Crash Alert System,¹ designed to make Mountaineer easier to see and hear after an accident in which any airbag has deployed or a safety belt pretensioner has activated. If either of these occurs, an alert automatically sounds the horn and flashes the hazard lights so that you and your passengers may be more easily located.

Remember that even advanced technology cannot overcome the laws of physics. It's always possible to lose control of a vehicle due to inappropriate driver input for the conditions.

¹SOS hardware may become damaged or the battery may lose power in a crash, which could prevent operation. Not all crashes will activate an airbag or safety belt pretensioner.
