OUR HISTORY

Few brands can match the racing heritage of Ford Motor Company. Whether competing in single-seaters or stockcars, the famous blue oval emblem carries a rich history of innovation and success. Ford Performance, the brand's high-performance arm, oversees the development of Ford racing engines and vehicles competing in series such as NASCAR, IMSA, SRO British GT, FIA World Rally Championship, Supercars Championship and Formula Drift. Ford Performance will also spearhead the much-anticipated return to Formula One competition with Red Bull Ford Powertrains from 2026.

Perhaps the most famous name in Ford's racing armory is the Mustang, a model that has enjoyed huge success in racing over the decades. That fine tradition continues in the modern era with the new Mustang Dark Horse R, offering the most demanding track enthusiasts a turn-key race car ready to compete in the all-new, single-make Mustang Challenge series, sanctioned by the International Motor Sports Association (IMSA).

Joining the recently announced Mustang GT3 and Mustang GT4 derivatives, the Mustang Dark Horse R bridges the gap between Dark Horse and Mustang GT4.

Production-based Mustang vehicles have raced from the very beginning, all the way back to winning the 1964 Tour de France, even.

Dark Horse R offers our passionate customers not just an attainable, factory-built race car, but also a racing series to compete with other Mustang enthusiasts.

Mark Rushbrook
Global Director, Ford Performance Motorsports

02

THE CAR

MUSTANG DARK HORSE R

A turn-key racing car, capable of generating more than 500 horsepower and ready to compete at the most demanding racing circuits, the Mustang Dark Horse R is engineered for competition by Ford Performance.

POWERTRAIN

- 500+ horsepower 5.0-liter Coyote V8

Not street legal. Sales and service for this vehicle will be managed by Multimatic. Ownership inquiries may be directed to them below. Very limited availability. Inquiry does not guarantee ability to purchase."

03

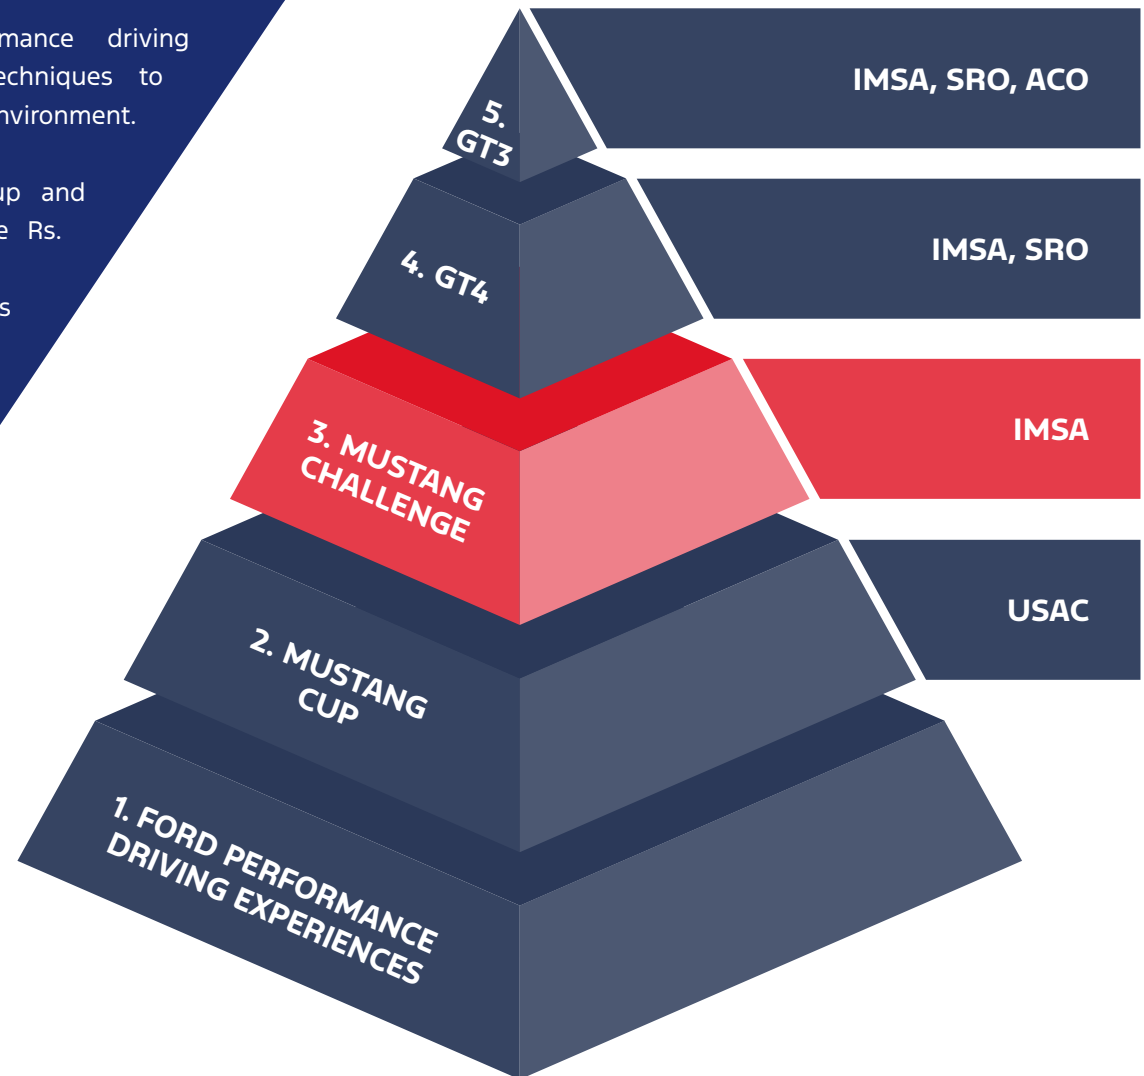

THE SERIES

MUSTANG
CHALLENGE

Ford Performance has created a pathway for Mustang enthusiasts (and established drivers) to reach the upper echelons of global sports car racing:

1. Starting in a Mustang Dark Horse at a Ford Performance driving experience, budding drivers are taught the fundamental techniques to drive a performance vehicle on the limit, within a safe environment.
2. From there, a driver can enter the cost-effective Mustang Cup and develop their race craft within a field of Mustang Dark Horse Rs.
3. The Mustang Challenge is the natural progression for drivers competing in the Mustang Cup (or the already seasoned racer) as it provides close, competitive racing in front of large crowds and streamed to a global audience. Series champions can accept a cash prize or a test in a Mustang GT4 car.
4. The Mustang GT4 is a step up from the Dark Horse R, with an increased number of racing-specific components competing against a field of other OEMs and hungry drivers vying to progress their careers.
5. The pinnacle of sports car racing, the track-built Mustang GT3 features more power, more aero, more adjustable components and less overall weight. This is a V8 beast like no other and the car you will see competing in the 24 Hours at Daytona and 24 Hours of Le Mans.

The Ford Performance Junior Team is an exciting initiative designed to discover and nurture the future stars of sports car racing. This dynamic program identifies promising young drivers and equips them with the tools and support they need to unlock their potential and continue their progression through the Ford Performance sports car pyramid.

“At Ford Performance, we are always on the lookout for fresh racing talent, and with the new Ford Performance Junior Team program, we have a great solution for the future. This program is all about creating opportunities for the next generation of Mustang racing talent. We want to give these drivers the tools and support they need to reach their full potential, and we’re excited to see what they can achieve.”

Mark Rushbrook, Global Director, Ford Performance Motorsport

Participants will be evaluated based on:

- Performance in Ford series such as Mustang Cup, Mustang Challenge, and Mustang GT4 globally
- Driver stats
- On-track improvement
- Feedback from industry bodies

Drivers selected for the program will receive support in the form of:

- Expert mentoring from factory Mustang GT3 drivers
- Hands-on coaching during select race weekends
- Access to simulator sessions supported by Ford Performance engineers
- Physical and mental conditioning required for racing
- Sponsorship and social media strategies to navigate a professional motorsport career

FIRST SELECTION AND FUTURE OPPORTUNITIES

The first driver chosen for the program is the 2024 Mustang Challenge Dark Horse Class Champion, Robert Noaker. Additional selected drivers will be contacted prior to the 2025 class announcement at the beginning of the season.

The ultimate goal is to develop these young racers into future factory drivers—the pinnacle of Ford Performance racing.

03 MUSTANG CHALLENGE - SERIES OVERVIEW

Racing enthusiasts who want to experience the thrill of sportscar competition should look no further than the Mustang Challenge.

Sanctioned by the International Motor Sports Association (IMSA), and organized by Ford Performance Racing School (FPRS) Motorsports, the Mustang Challenge allows drivers up to FIA silver ratings to compete on a level playing field against other Mustang Dark Horse R cars.

Mustang Challenge will host a full field of up to 40 Mustang Dark Horse R race cars.

Running on bespoke race tires from official series partner Michelin, the series will compete at some of the most iconic tracks in North America, including Sebring, Road America, and COTA, along with an invitational meeting at the 24 Hours of Le Mans.

ENGINEERING SUPPORT

Ford Performance engineering personnel on site to support all teams and drivers (non-primary*).

TIRE SUPPLY

Official tire supplier, Michelin, will be present throughout the race weekend to service all teams and drivers.

SPARE PARTS

A supply of parts will be available trackside at each round.

HOSPITALITY

The Mustang Challenge lounge area, under the FPRS Motorsports awning, will be at the heart of the racing action and will provide a hub for drivers to welcome guests to the paddock. With refreshments, soft seating and a live stream of the on-track action, it's the perfect place to relax in-between sessions.

PR & MEDIA

- Live coverage on IMSA.tv and via subscription to Peacock streaming channel
- Ford Performance media support
 - YouTube live coverage
 - Social media, race reports, press releases and website content
 - Content portal for drivers and teams accessible via the Ford Performance website

**Ford Performance engineering will be on-site to support teams and drivers for technical issues or questions that require escalation beyond the capabilities of the team or driver supporting the vehicle. Ford Performance engineering will not be dedicated as a primary resource for servicing the vehicles for teams or drivers.*
