

Field All-Service Body for GMC Trucks

*Stock Rack on
2-Ton GMC*

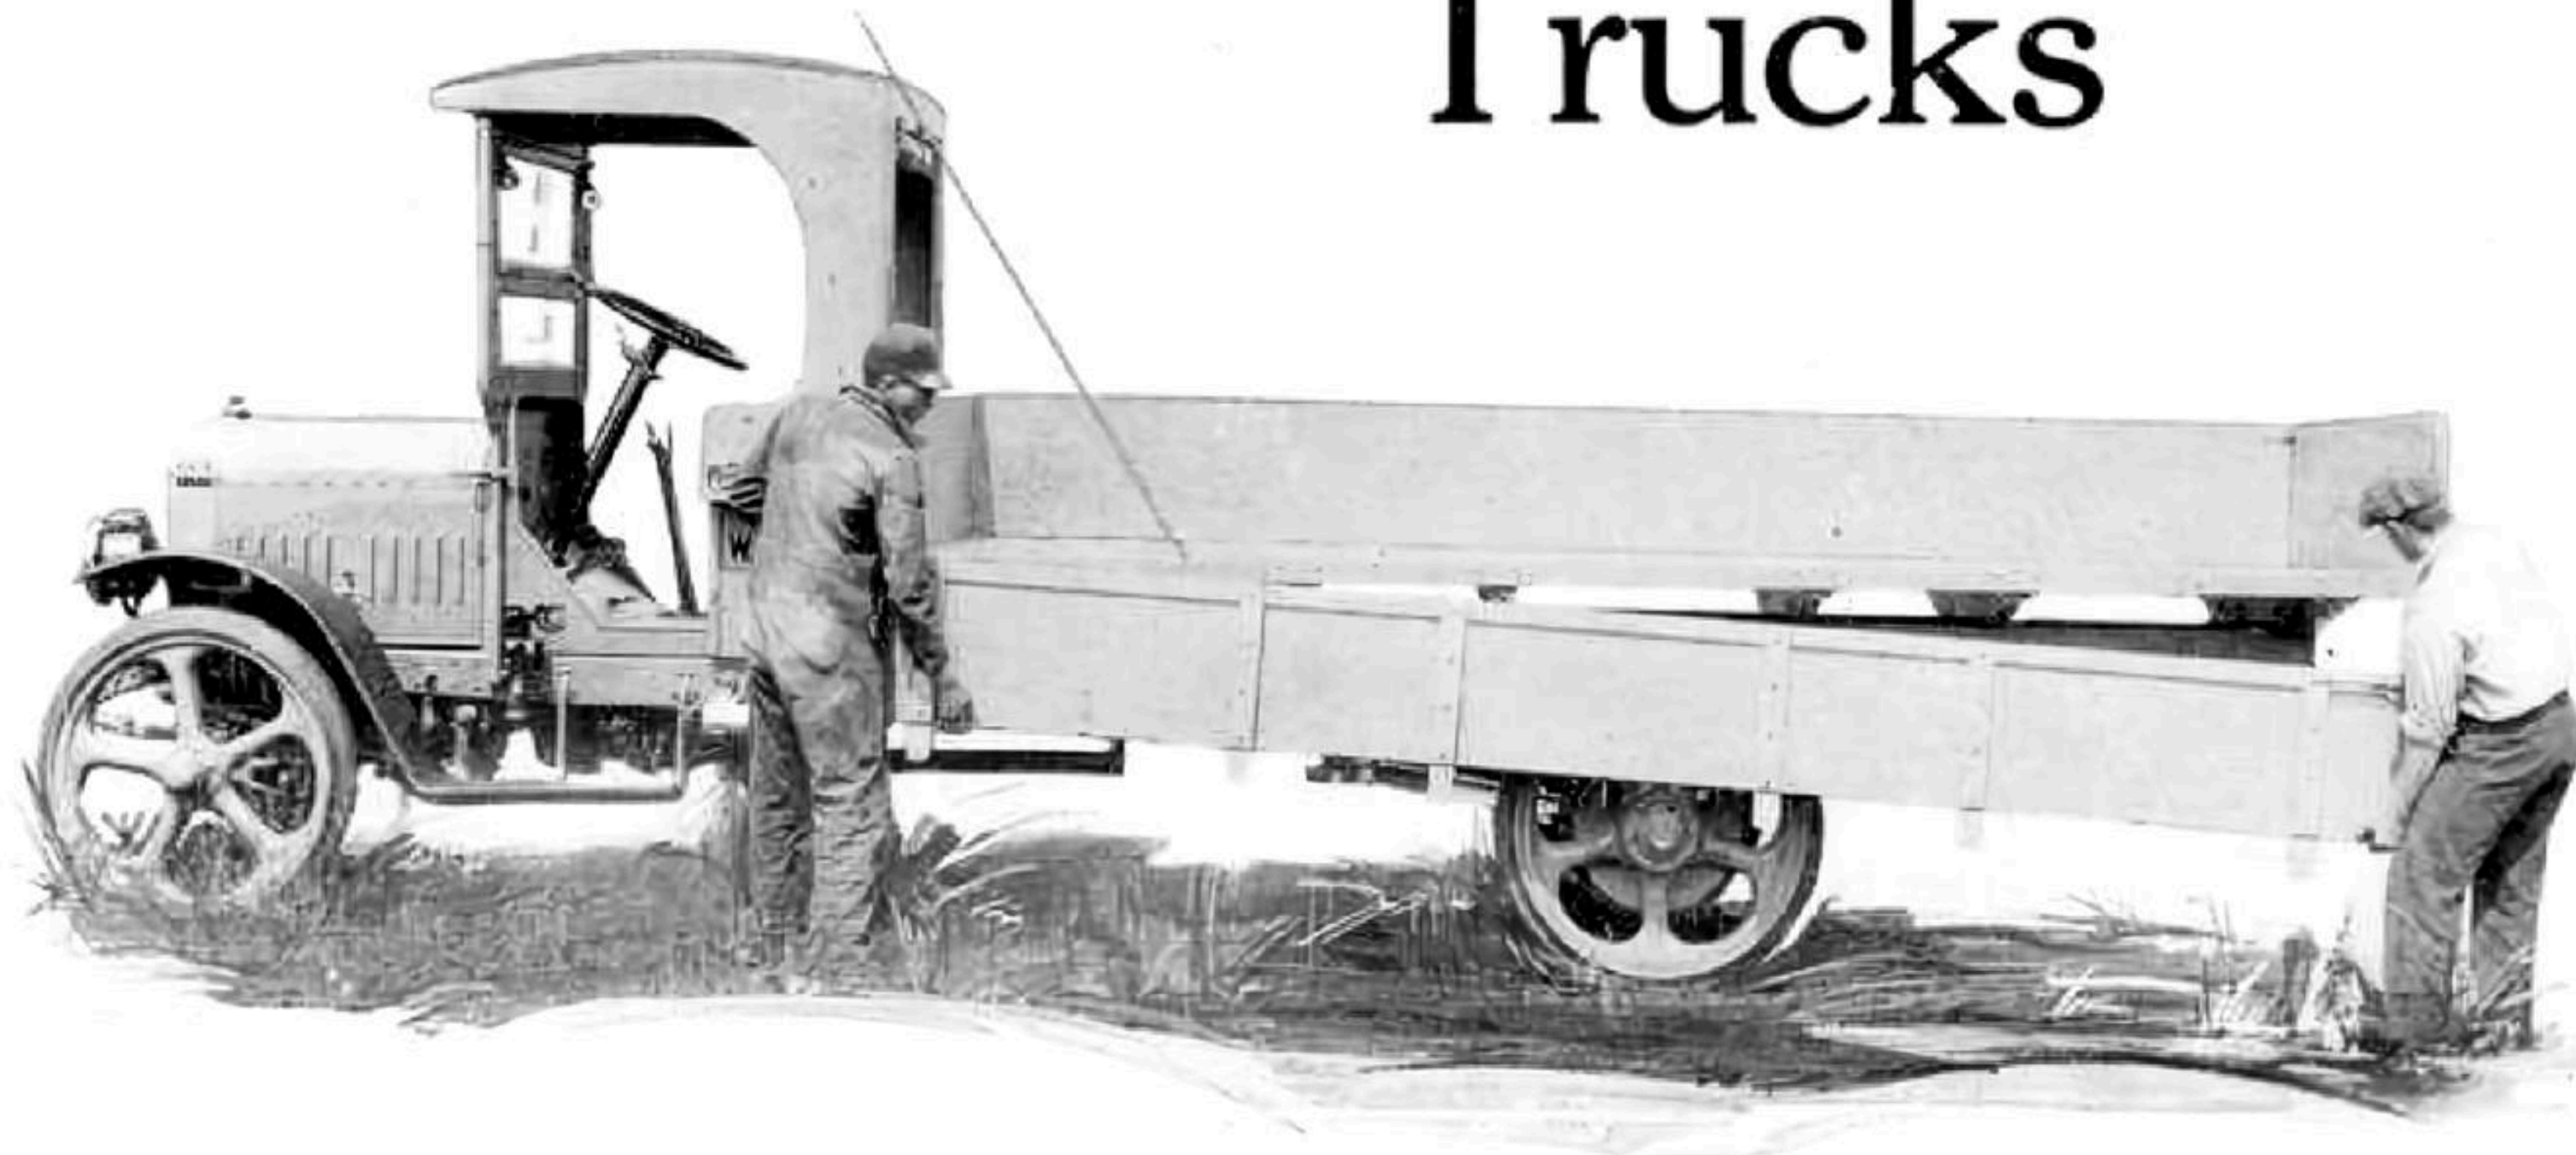

All-Purpose Body for GMC Trucks

Trucks

Grain Box

It takes two men only a few moments to set these solid, tight-fitting box sides on the platform. Tip Top sides can be obtained if light grains are to be hauled.

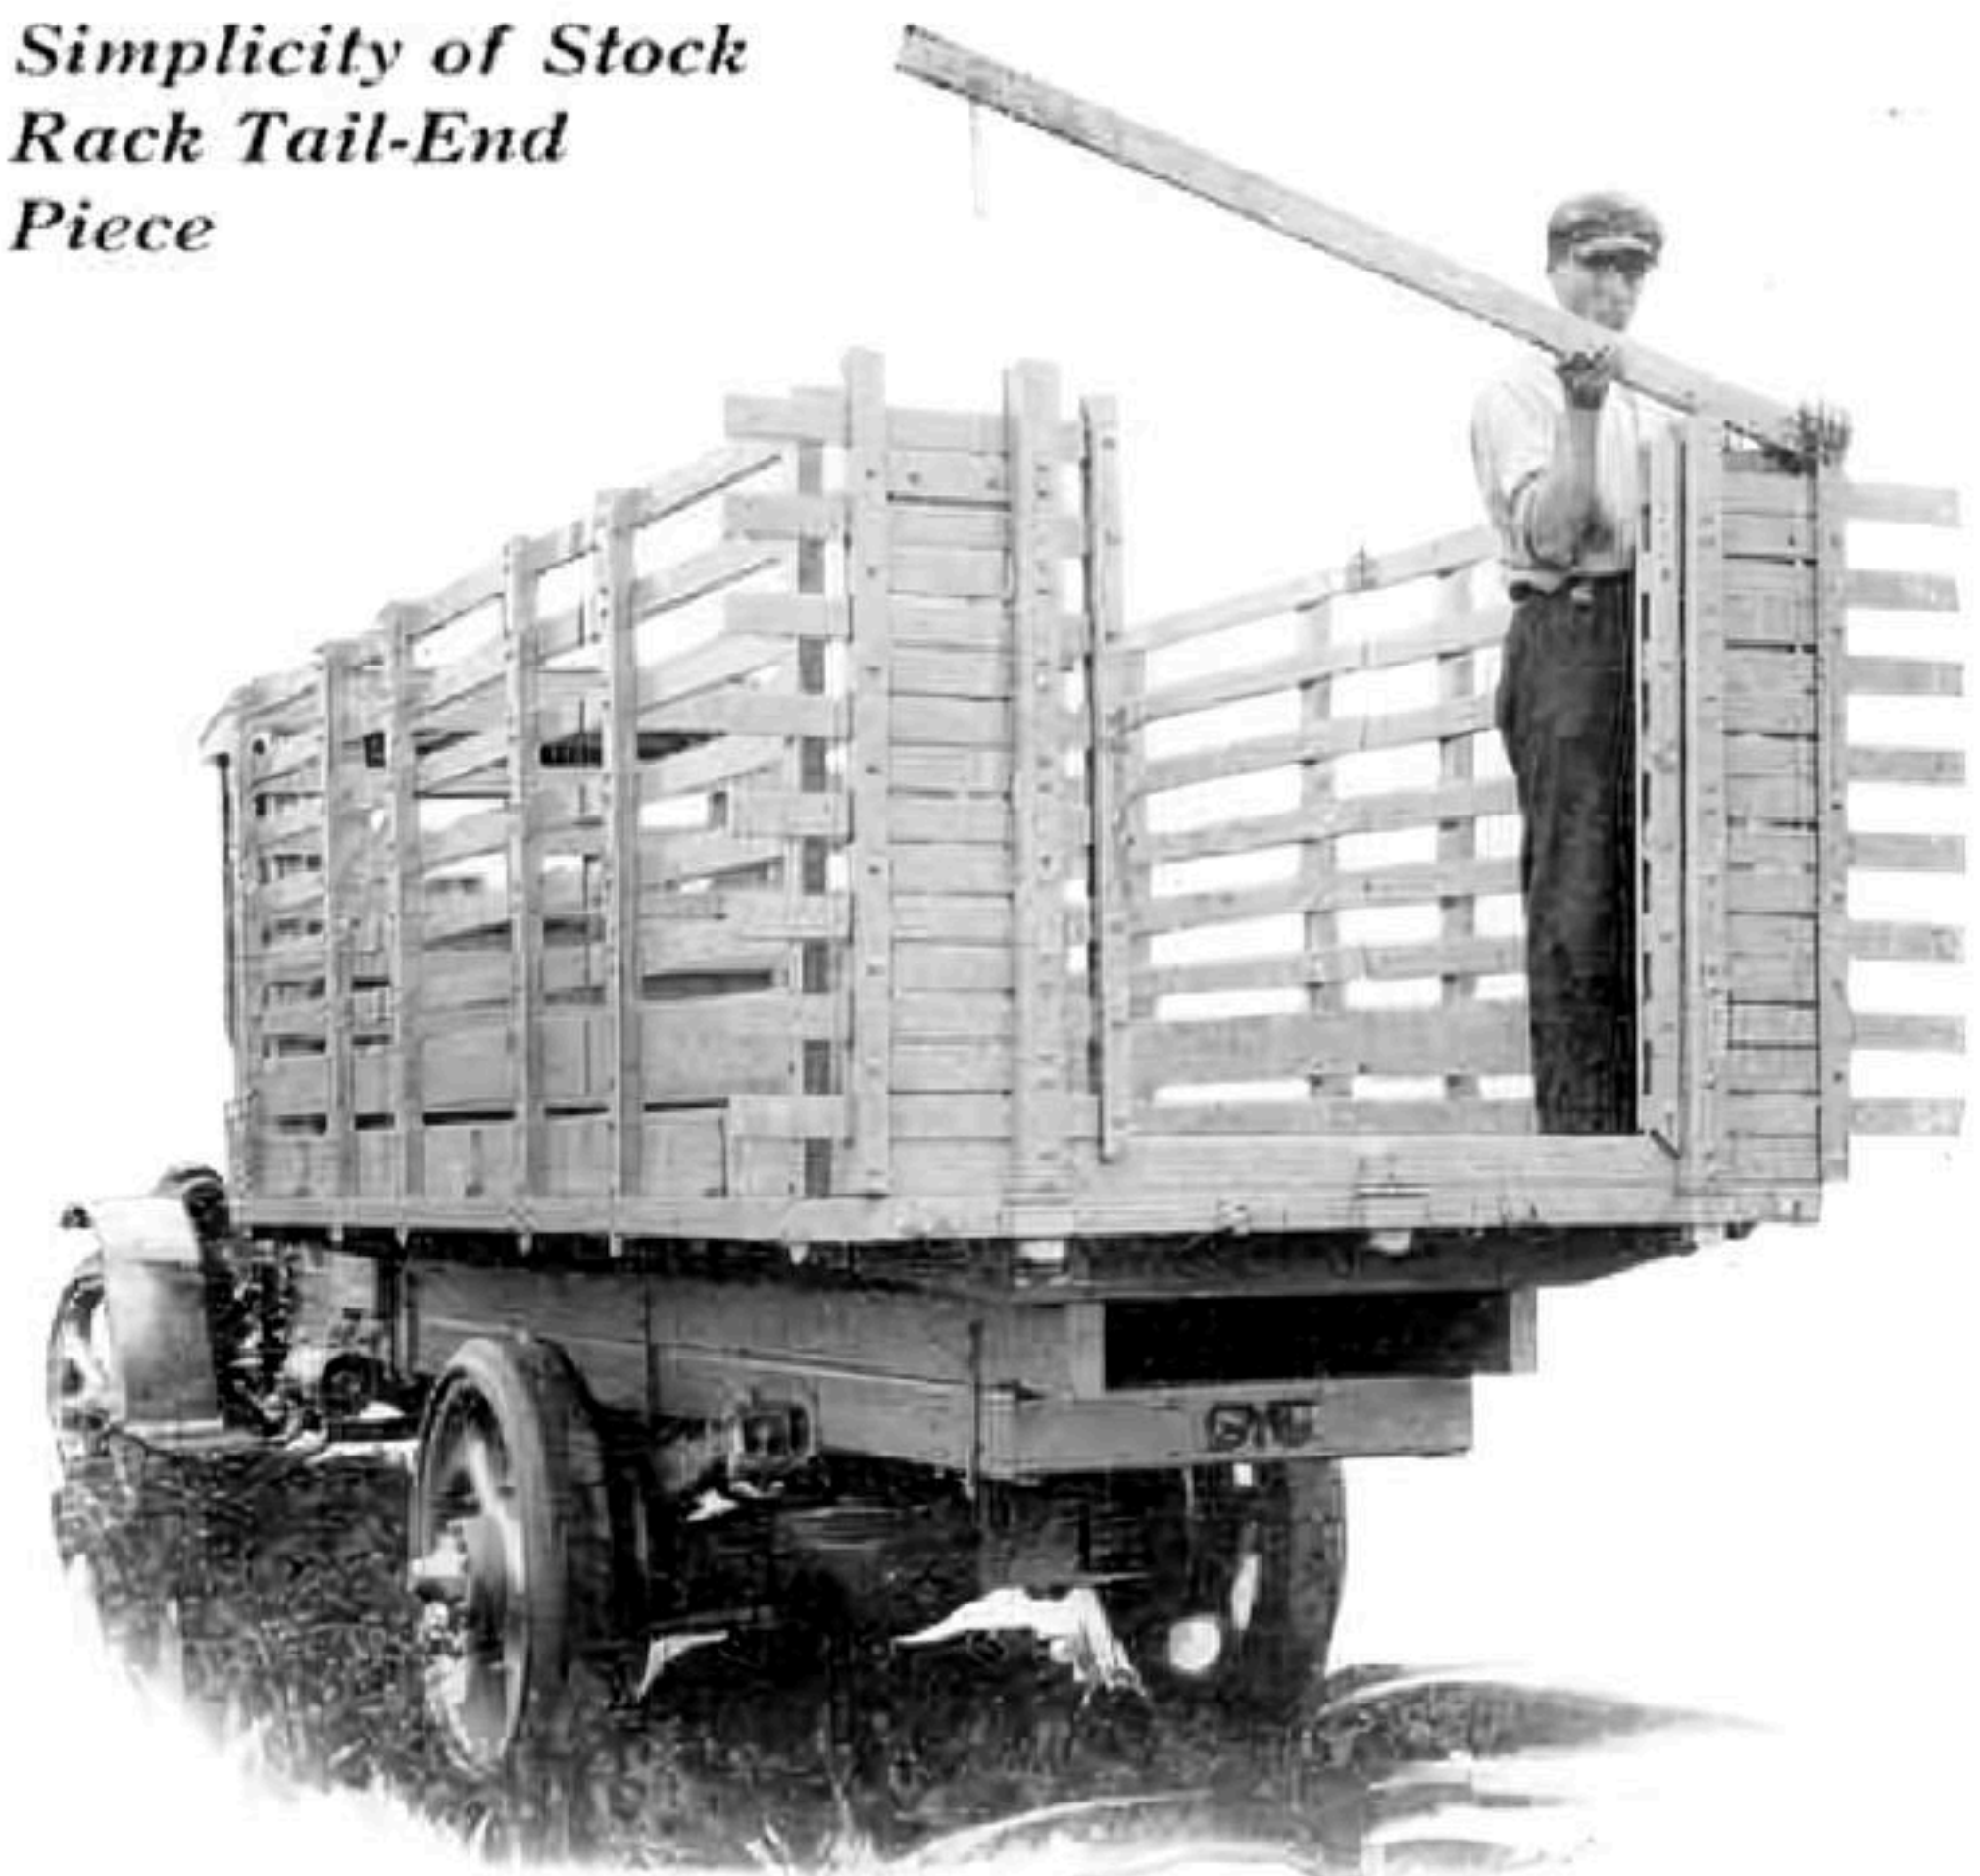

Stock Rack

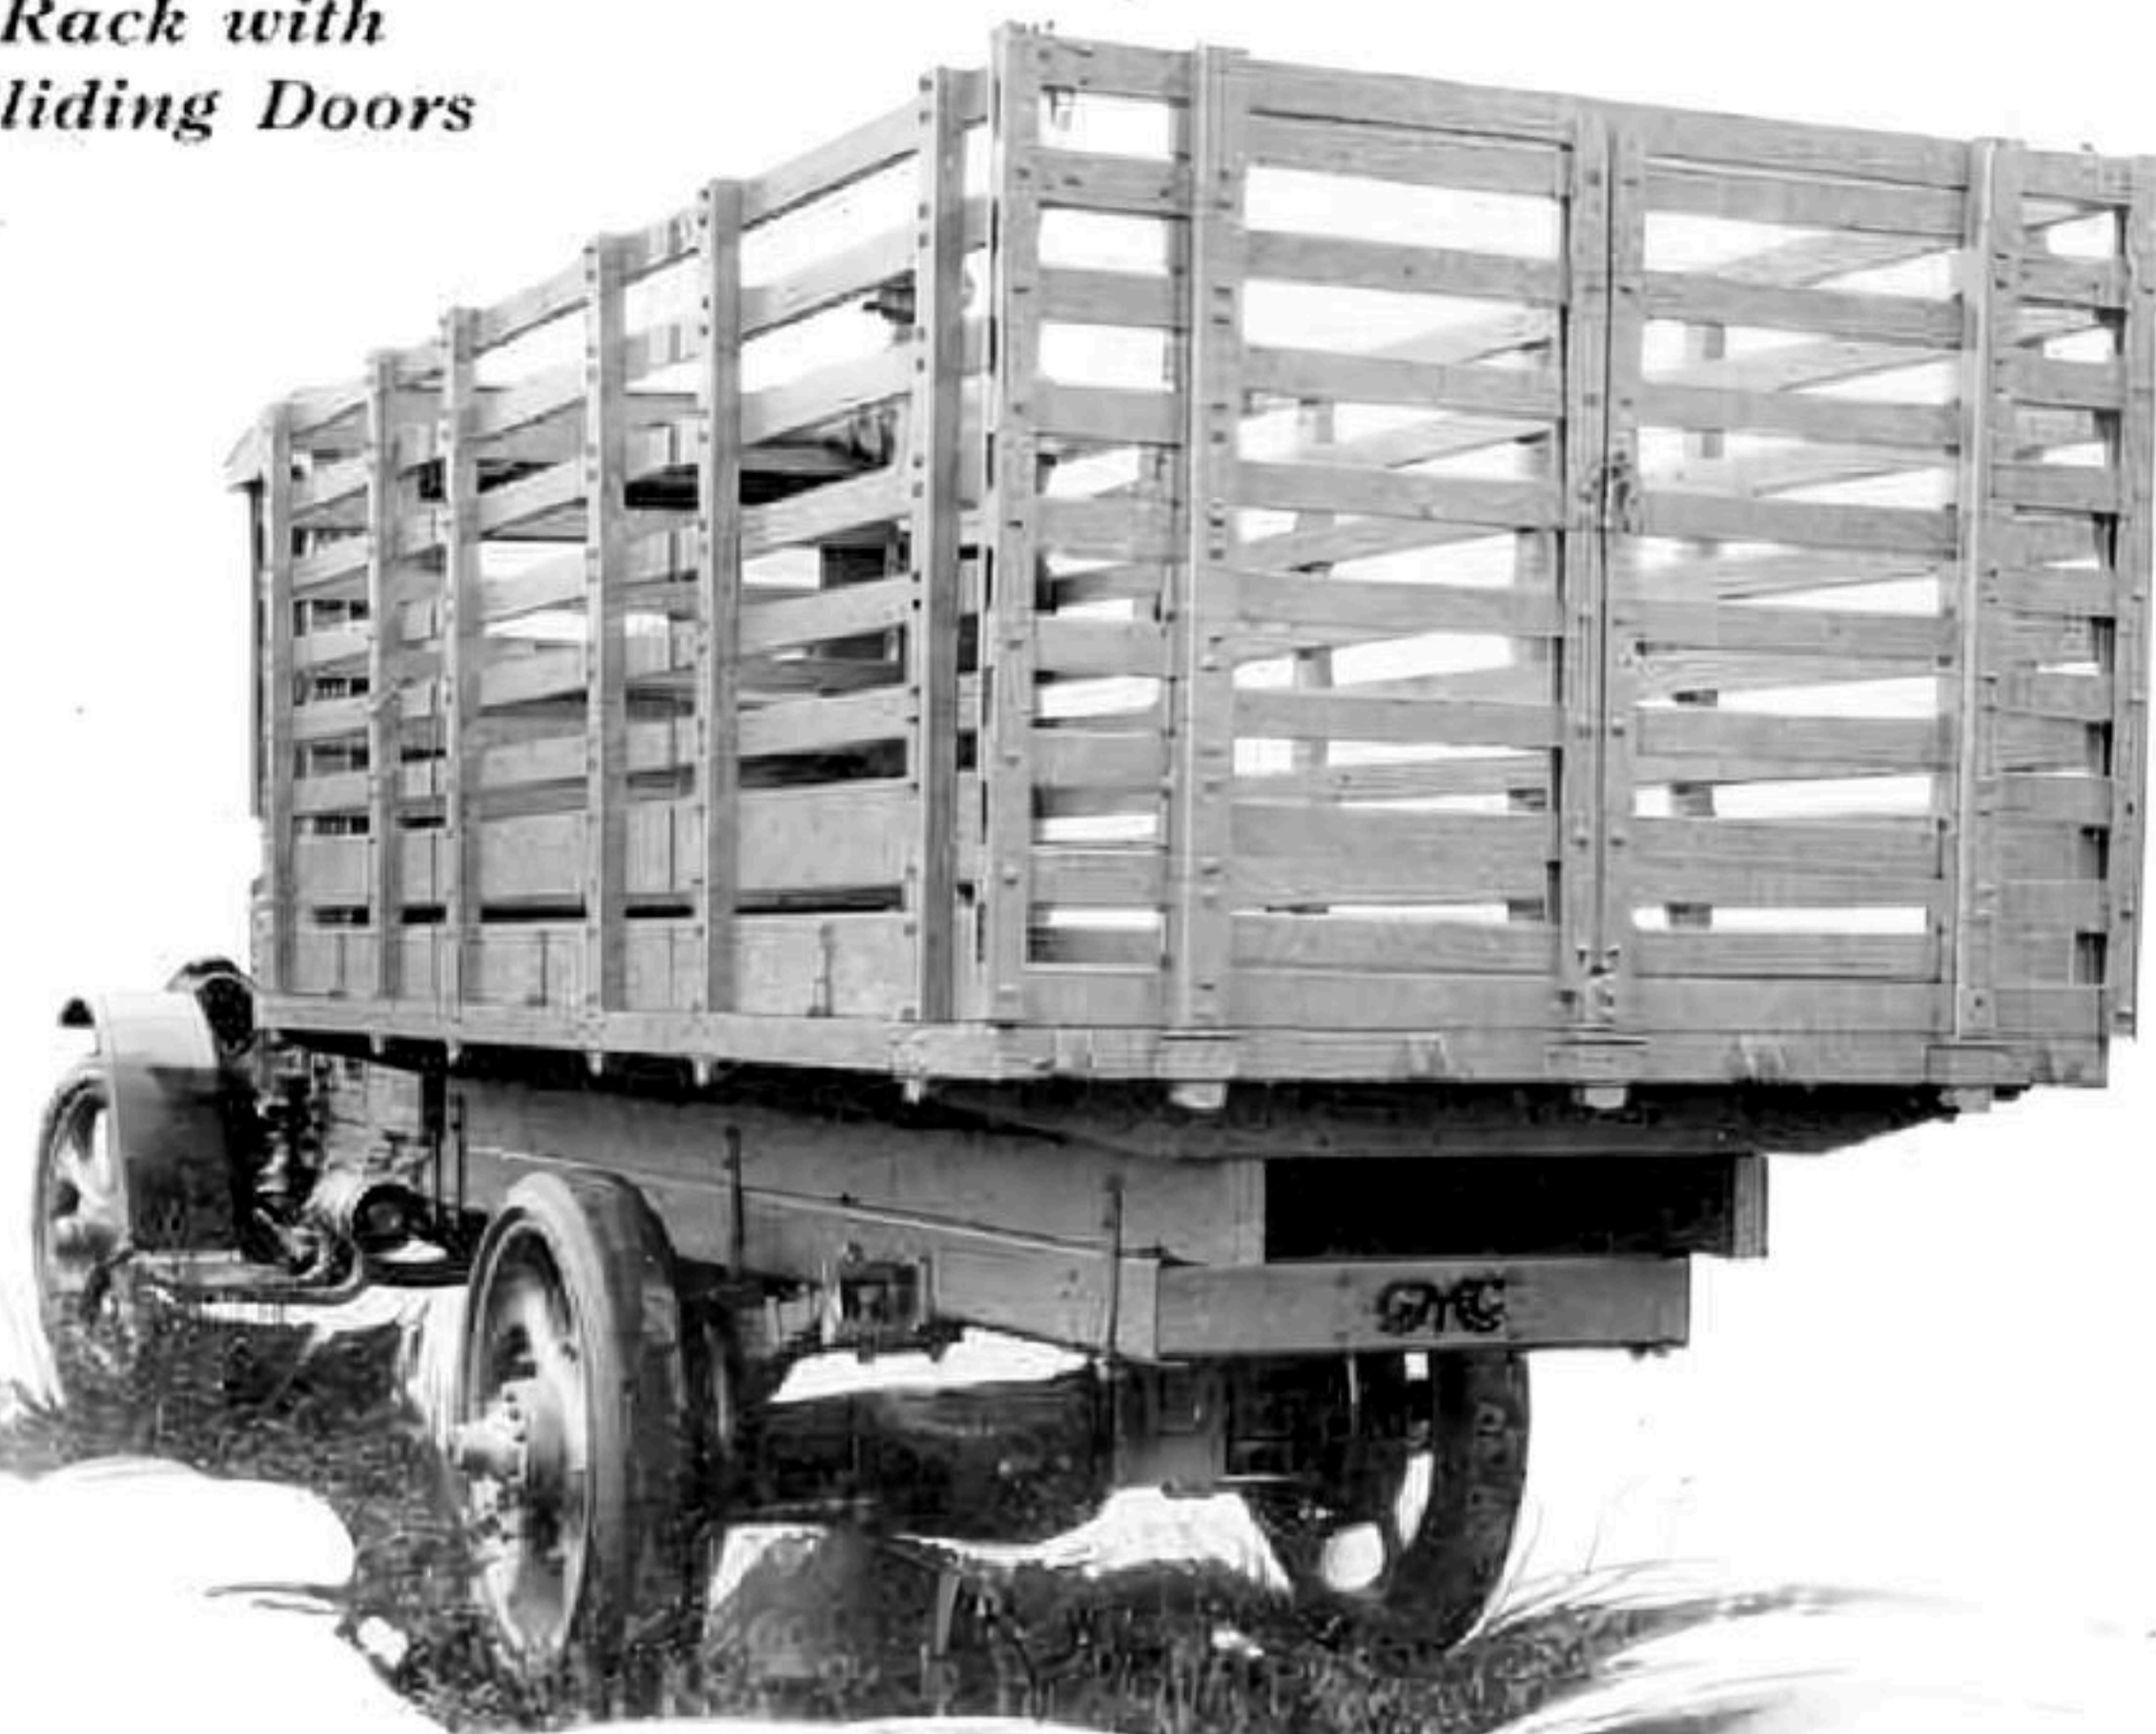

Simplicity of Stock Rack Tail-End Piece

The high sides of the stock rack fit firmly and are bolted to the platform. Special construction of the rear end gate insures absolute rigidity.

The sliding door arrangement in the rear end gate makes it particularly easy to load or unload live stock, as the rear end gate does not have to be removed.

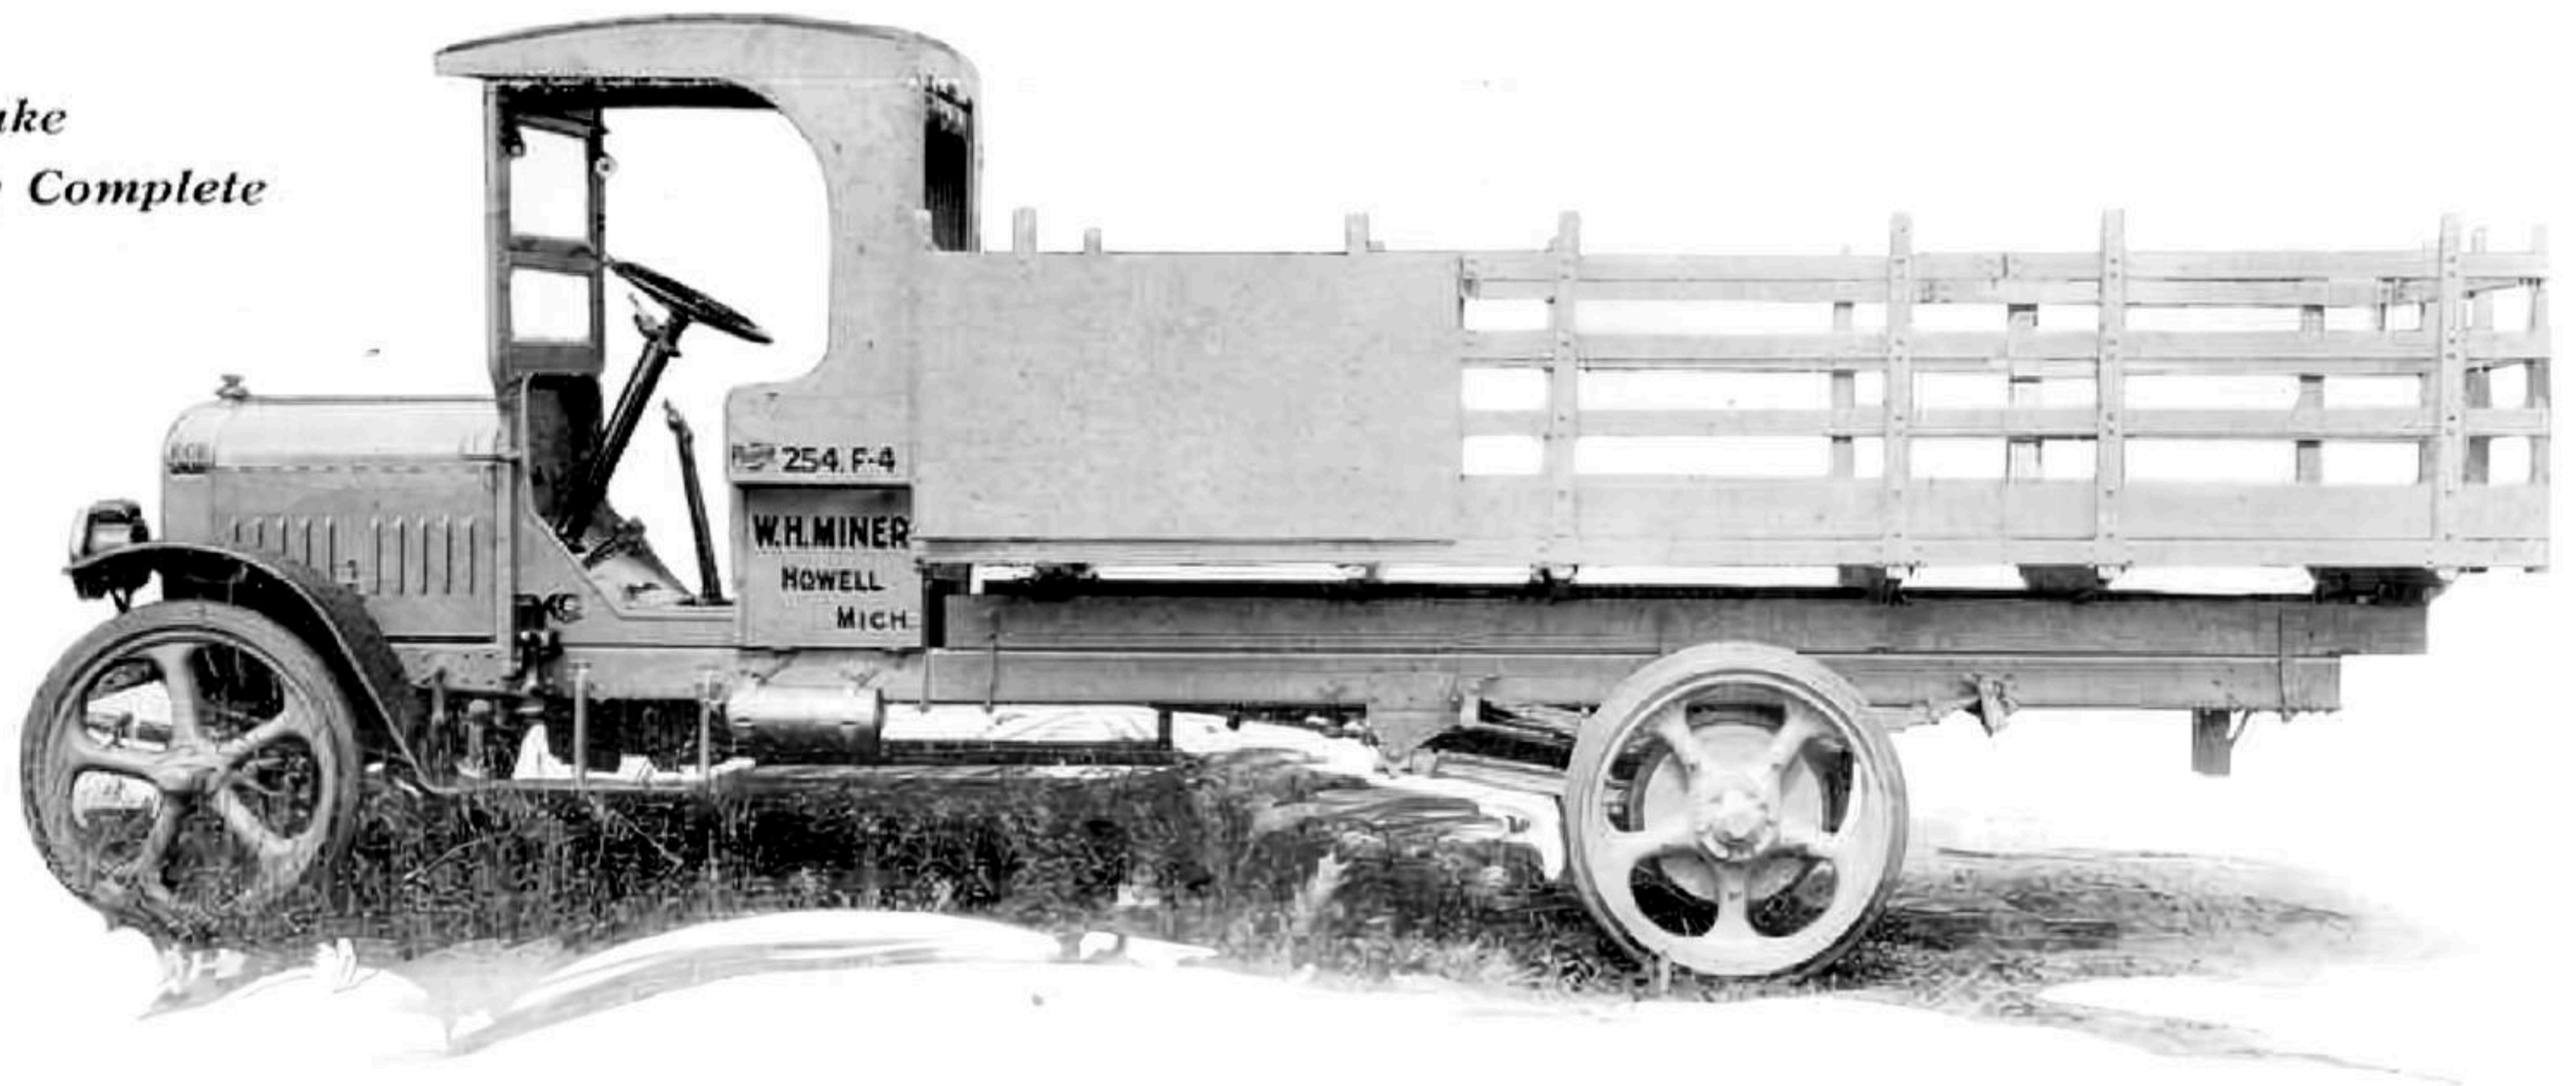

*Stock Rack with
Sliding Doors*

Gate Stake

In the gate stake sides, the All-Service body offers a specially flexible equipment. The gate stake is suitable for hauling package or other commercial freight. The sides fit perfectly and are solid, the sections being pin-hinged together.

*Gate Stake
Body Complete*

The gate stake sides offer users many opportunities to increase the hauling done by their trucks.
