

1994 CHEVY  
**S-SERIES PICKUPS**

Welcome to the most advanced family of Chevy pickups, ever. This next generation of personal

**THE ALL-NEW 1994  
CHEVROLET S-SERIES.**

pickups brings you five exceptional new models— all designed to offer you more room, more comfort, more power, more safety enhancements and more contemporary styling, all with the rock-solid durability of Chevrolet: the most dependable, longest-lasting trucks on the road. Orders don't come any taller than that. But, then, pickups don't come any newer than this. The Chevrolet S-Series for 1994.

**SO NEW FROM THE INSIDE OUT,  
EVERYTHING ELSE IS HISTORY.**

As you consider making a 1994 S-Series Pickup an important part of your life, we hope you'll recognize this: you've been an important part of its life from day one. This all-new family of vehicles wasn't conceived in a computer. It didn't spring from a designer's pad. It didn't burst onto the scene as a clay engineering model. Each 1994 S-Series pickup was, instead, designed from the inside out around you;

your needs, your hopes, your expectations as they were passed along with passion and detail by pickup lovers from across the country. The result is more than an all-new truck. It's the next generation of pickup concept, design and engineering. And it all began with you.

**IT DIDN'T BEGIN  
WITH AN ENGINEER.  
IT BEGAN WITH YOU.**

*You've grown,  
we've grown.  
You need more room  
today than you did  
even a few years ago.  
So we've grown, too,  
into a whole new phi-  
losophy of contempo-  
rary truck building.*

*The next generation  
is forward-thinking.  
In order to make a  
more comfortable and  
roomier interior, we  
reinvented the cab  
area, stretching it  
and making it wider  
to gain valuable space.*

**Solar-Ray tinted glass.**  
Solar-Ray tinted glass reduces the total solar energy transmission by one-third.

**The windshield is moved forward.**  
This not only added to your cab space, it allowed us to take advantage of better aerodynamics to help reduce wind noise and increase economy.

**20% more glass area.**  
A larger glass area allows for better visibility, and that's just what you get in the new 5-Series.

**More head room.**  
We not only used our heads, we made sure we engineered more room for them.

**More hip room.**  
We designed the new cab to allow more hip room, and we designed all new seats that help, too.

**More shoulder room.**  
It's a wide world, and getting wider. So we increased your shoulder room by a full three inches.

**More seat travel.**  
We've increased the seat adjustment range by adding length to the seat rails, which means more comfort over the miles.

**More room to relax.**  
Expanding the cab rearward gives you more room to move the seat back and relax.

It's not magic. It's just brand-new, and very much state-of-the-art.

And the art today, as we see it, is nothing less than creating a new and complete harmony of design, with everything focused on the same single design priority. In this case, a roomier, more comfortable, more enjoyable driving environment for you and your passengers. Here are some of the new comforts, securities and conveniences you'll enjoy in this exciting new generation of pickup trucks.

**New large controls.**  
So well thought out, they're easier to find, easier to read and easier to use, even at night or when you're wearing gloves.

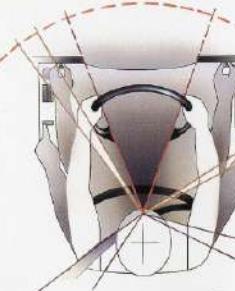

**Quicker heating/cooling.**  
Another whole new and totally improved S-Series system. Airflow has been increased by nearly one-third over our previous system, and our air conditioning refrigerant is non-ozone-depleting R-134a.

**Designed and built to minimize rattles.**  
New noise-reduction strategies help reduce the possibility of rattles developing in the instrument panel and other assemblies.

**Winning the war on noise.**  
A long list of improvements, from new aerodynamics and noise seals to new acoustic patches along floor and center panels, are designed to reduce wind and engine noise.

**New ergonomic environment.**  
Everything you see is ergonomically designed and intelligently placed, making the S-Series cab a very friendly place to spend your time.

**Easier fuse access.**  
One of the best-kept secrets in some trucks is now no secret at all. The fuses are easily found on the left side of the instrument panel.

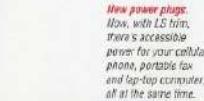

**New backlit analog.**  
You know analog instrumentation is easy to read. Ours is also excellent, making it easier than ever to read. A tachometer is included with the optional 4.3 Liter V6 with CPI and is available as an option for other engines.

**Passenger-side  
assistant grip.**

Because a pickup this comfortable should be easy to get into, easy to exit.

**New visible screw holes are a thing of the past.**  
You won't notice the customary screw heads in the interior trim. S-Series fasteners are out of sight, out of mind.

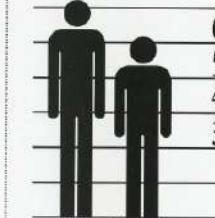

**New power plugs.**  
Now, with LS trim, there's accessible power for your cellular phone, portable fax and lap-top computer, all at the same time.

**New soft storage.**

If you've ever had coins or pens settle around in storage compartments, good news. These compartments are rubber-lined and removable—as in quiet and easy to clean.

**Memory-adjusted seat.**  
Here's another convenience you'll appreciate often. Slide the E-Z Entry passenger seat forward and it "remembers" its return to where you had originally set it.

**Designed for and by  
real-sized people.**

During the S-Series design program, plenty of real people—including the chief designers, who range from just over 5' to 6'2" tall—tried out the interior to make sure it comfortably satisfies both the long and short of things.

**Seatguard™  
Protector.**

You know the advantage of Seatguard™ Protector. Now you have it standard, on cloth and door trim fabrics and even on the carpeting.

**A new definition  
of comfort.**  
We designed the new S-Series seats to be the most comfortable ever, and then we added softer foam padding to achieve a whole new definition of comfort.

S-Series interior with optional luxury-level LS trim and optional reclining high-back bucket seats in Gray Deluxe Cloth. Additional options shown include: air conditioning, a full-lecture stereo with compact disc player, electric 4x4 transfer case shift, leather-wrapped steering wheel, Tin Wood™ Adjustable Steering Column, electronic speed control, tachometer and power windows, door locks and remote mirrors.

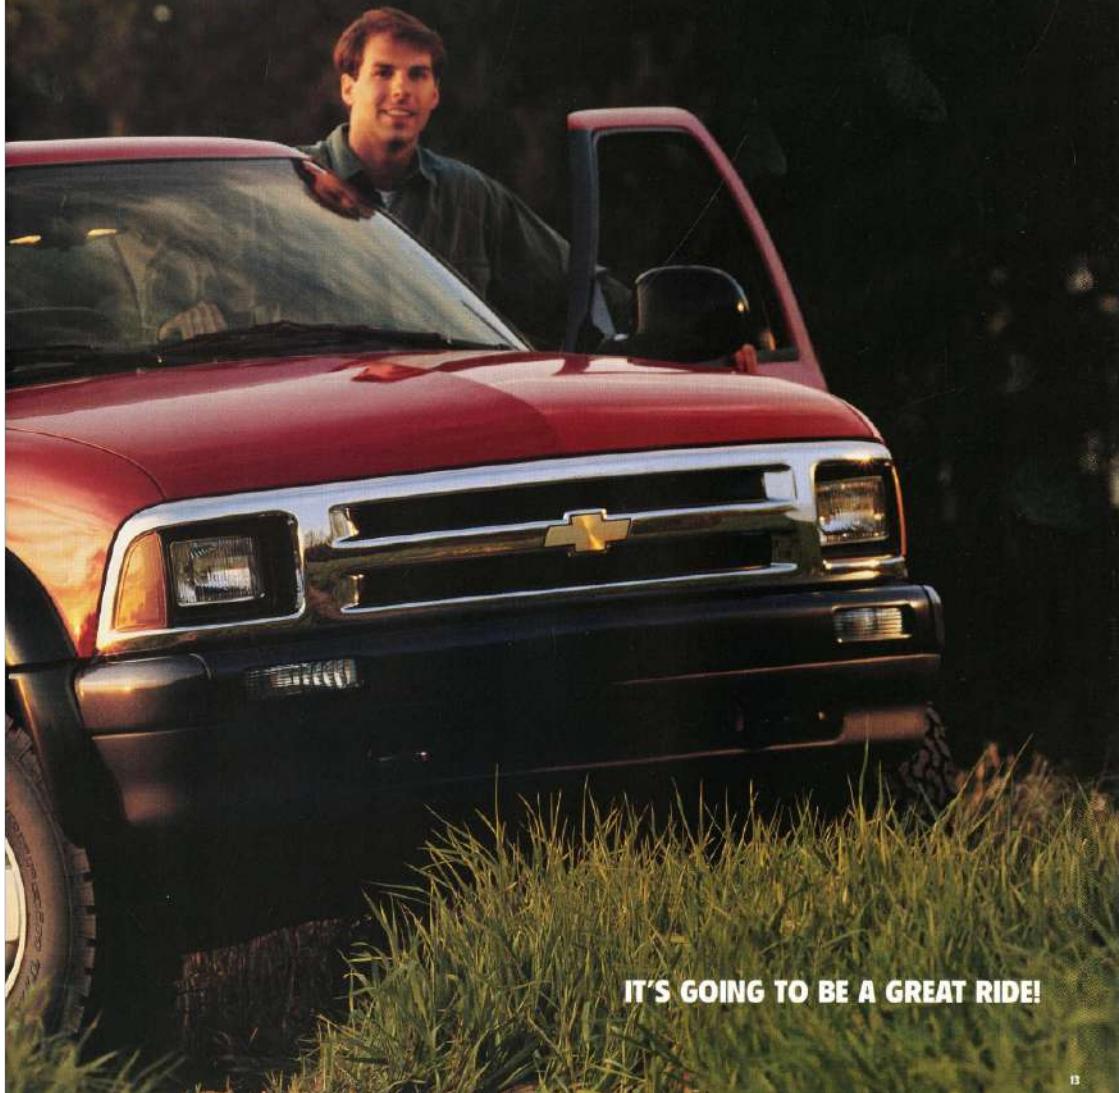

**SPACE: THE FINAL FRONTIER.**

S-Series 4x4 Pickup with optional ZR2 Package and optional aluminum wheels. Shown in Apple Red.

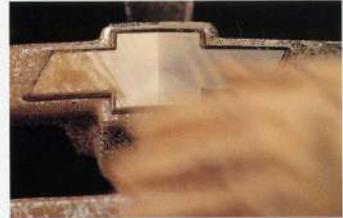

IT'S GOING TO BE A GREAT RIDE!

## ALL THIS, IN THE MOST DEPENDABLE,

For 75 years, we've been getting better every day. 75 years is a long time to build, learn and improve. We have, every step of the way.

**Bumper to Bumper Warranty:**  
3 years or 36,000 miles with no deductible. See page 20 for complete details of this limited warranty.

**Corrosion-resistant exhaust system.**  
A stainless-steel front exhaust pipe and 304-stainless steel from the catalytic converter back give you extra protection against exhaust system corrosion.

**Long-distance fuel tank.**  
A full 20-gallon capacity means you and your S-Series can cover long distances between fuel stops.

**Two-side-galvanized steel fights corrosion.**  
The superb corrosion protection of two-side-galvanized steel on major exterior body panels (except the roof and pickup box front panel) makes additional rustproofing unnecessary.

**4-wheel anti-lock brake system (ABS).**  
Standard on 4WD models and included on 2WD models when an optional V8 engine is ordered, ABS helps you maintain control even in severe braking conditions—including on wet and slippery roads.

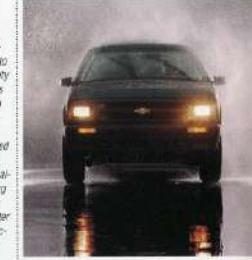

**Standard power steering.**  
One of many features standard on S-Series that come as an extra-cost option on some other vehicles.

**Triple-sealed doors.**  
For a quieter ride, new triple-sealed doors help keep road noise where it belongs: out on the road.

**New acoustical insulation.**  
Countering among the sound-deadening improvements are new applications of acoustical material on the floor and inner quarter panels.

**Noise-reduction bolts and seals.**  
Self-sealing, not just to keep them from working loose, but to keep them from allowing rattles.

**Double-wall construction.**  
There's double-steel-wall durability in new S-Series doors, front fenders, upper rear panels of the cab, box sidewalls and tailgate.

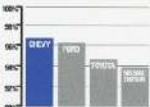

## LONGEST-LASTING TRUCKS ON THE ROAD.

**The most dependable, longest-lasting family of trucks.**

Heres a rock solid fact compared to all full-line truck companies—foreign or domestic—over the last 10 years, a higher percentage of Chevy trucks are still on the road.\*

\*Dependability based on longevity: 1980-1982 full-line truck company registrations. Excludes new and imports.

**5-layer paint system.**

Layers of protection over galvanized steel sheet metal include a zinc-phosphate coating, EPO coat, chip-resistant powder primer, a high-gloss base coat and a full clear-coat finish.

**The industry's most advanced chip-resistant primer.**

It leaves the paint gun as an electrostatically charged powder, but after it's triple-baked it becomes the glossy black primer coat that gives the S-Series finish its impressive chip resistance.

**Going out of the way for better paint.**

Paint booths in S-Series plants are designed to help ensure every truck gets an impressive finish. One example: non-essential movement in the area, including foot and vehicle traffic, is minimized to help control dust.

**6-YEARS  
100,000 MILES**

**6-year/100,000-mile corrosion-protection warranty.**

The kind of long-range warranty that eliminates the need for additional corrosion protection.

**Boxed frame construction.**

The S-Series frame is "boxed" (in cross-section it resembles two letter C's welded together) for extra-strength from the transmission support bracket forward.

**Larger shocks.**

New shock absorbers are over 20% larger than previous designs, helping to provide a smoother and more comfortable ride.

**New rear springs.**

S-Series rear springs unlike a variable-rate, two-stage, multi-indent design to help you get the support capabilities of strong springs without sacrificing a comfortable ride.

**Ride packages.**

Suspension, trim and shocks are combined into packages that match the way you use your truck most. See page 39 to select the package that best suits the way you will use your truck.

**Standard steel rear step-bumper.**

A convenient rear step-bumper is standard, except with the Regular Cab Base Preferred Equipment Group and the Super Sport package, which have a rear classmate panel instead. (A rear step-bumper is available as an option on these trucks.)

**New consistency, new quality.**

S-Series owners enjoy the comfort, stability and front ground clearance provided by independent front suspension—with coil springs on 2WD models and torsion bars on 4x4 models.

**Independent front suspension.**

S-Series owners enjoy the comfort, stability and front ground clearance provided by independent front suspension—with coil springs on 2WD models and torsion bars on 4x4 models.

**Enhanced 4.0 Liter V8 engine option.**  
195 horsepower in the largest V8 available. See page 37 for more about all three S-Series engines.

**New 2.2-liter 4-cylinder engine.**  
A major new S-Series powertrain entry, featuring Multi-Port Fuel Injection. Standard in 2WD models.

**Anti-lock brakes.**  
Four-wheel anti-lock brakes (ABS) standard in all 4x4s and in 2WD models with 4.0L V8. Rear-wheel anti-lock brakes (RWB) standard in 2WD models with the 2.2L engine.

**15" wheels, standard.**  
One big advantage: 15" wheels are standard on all S-Series pickups. New design cast-aluminum wheels are available for both 2WD and 4x4 models. (Please see page 43.)

**Easy-to-use sliding rear window.**  
Designed to open easily and close with a tighter seal and noise seal. Optional for all models, included with LS Preferred Equipment Groups AAA and BAM.

**Deeper cargo box for two-tier loading.**  
We made the new S-Series box deeper and added special notches so you can lay your 60-inch 2x6's crossways for two-tier loading.

**No exposed bolt heads in the bed.**  
A simple idea, but it's easier on cargo, and covering the bolt heads helps reduce chances for corrosion and buildup of dirt and debris.

**Drain holes in the bed.**

A simple idea.

It's easier on cargo.

And covering the bolt

heads helps reduce

chances for corrosion

and buildup of dirt

and debris.

**YOU DON'T HAVE TO BE AN ENGINEER** comfort and ride,  
**TO SEE HOW IT WORKS.** we never forget  
we're building a dedicated truck.

And that means one with the capacity to work, carry, climb and tow as you want to, without breathing hard and without asking for rest. Here are just a few of the rock-solid reasons why nothing works like a new S-Series truck.

**Convenient cargo tie-downs.**  
In all corners, for holding cargo securely in place.

**Tailgate removes without tools.**  
Another way your life just gets easier.

**Cable linkage for easier tailgate open/close.**  
Easier because now there's no rigid linkage to contend with. And cables are easier and quicker than link arms.

**New step-design steel rear bumper.**  
Makes loading and unloading the pickup box easier than ever and provides a lower step-up height.

**8000-lb. maximum towing capacity.**  
See page 41 for full towing information.

**Built-in light-duty trailer hitch.**  
Simply add a hitch ball and you're ready for light-duty towing.

4x4 S-Series Extended-Cab Pickup with optional luxury-level LS trim and optional Custom Two-Tone in Midnight Black and Onyx Silver Metallic.

*Progressive controlled  
crash zones.*

The F-Series frame and front-end body structure are designed to progressively dissipate energy in a frontal crash—before it can reach the passenger compartment.

**OCCUPANT PROTECTION.**

- Manual lap/shoulder safety belts, outboard front- and rear-seat positions
- Manual lap safety belts, center-seat positions
- Energy-absorbing steering column
- Energy-absorbing instrument panel
- Interlocking door latches
- Folding front seat-back locks, inertia-type

**Safety armrests**

- Breakaway inside rearview mirror
- Security door locks and door-retention components
- Laminated windshield glass, urethane-bonded
- Head restraints, front seats
- Side-guard door beams
- Tempered safety glass, side and rear windows

**Dual sun visors**

- Pressure-lock radiator cap
  - Self-aligning steering wheel
- CRASH AVOIDANCE**
- Four-wheel anti-lock brake system (*ARS*) in all 4x4 models, and 2WD models with 4.3 Liter V6 engines
  - Rear-wheel anti-lock brake system (*RWAL*) in 2WD models with 4-cylinder engine

## **SAFETY IS NO ACCIDENT.**

GM leads the automotive world in vehicle safety research, and our commitment to safety in the new S-Series Pickup is priority overgrowth of that overall corporate leadership. Behind it is nothing less than the industry's largest full-time safety research and test facilities, both in terms of personnel and capital investment. Here are just a few of the safety features built in to help protect you and your passengers.

**3-point safety belts and restraint.**  
Still the number one vehicle safety enhancement, 3-point safety belts are standard, as are safety head restraints, shown here in new high-back bucket seats.

**Front seats that help prevent submarining.**  
Special design gives added protection against occupant "submarining" under instrument panel area in the event of a frontal collision.

- Side-marker lamps and reflectors
- Parking lamps
- Four-way hazard-warning flashers
- Backup lamps
- Directional signal control
- Center high-mounted stop lamp
- Windshield defrosters, washers and multi-speed wipers
- Outside rearview mirrors
- Brake system with dual master

- cylinder plus warning light
- Starter safety switch
- Dual-action hood latch
- Low-glare finish—inside windshield moldings, wiper arms and blades, metallic steering wheel surfaces, inside rearview mirror frame and bracket
- Illuminated heater and defroster controls
- Tires with built-in tread-wear indicators

**Center high-mounted stop lamp.**  
The first goal is to avoid accidents. A center high-mounted stop lamp helps increase visibility of your braking signal to following vehicles.

**Standard anti-lock brakes.**

The first goal is to avoid

accidents. A center

high-mounted stop

lamp helps increase

visibility of your brak-

ing signal to follow-

ing vehicles.

- Safety road wheel rims
  - Inside day/night mirror
  - Audible disc brake lining-wear indicators
- THEFT DETERRENCE.**
- Visible vehicle identification number
  - Laser-etched VIN plate
  - Theft-deterrent steering column lock
  - Theft-deterrent key system (separate ignition key)
  - Remote inside hood release

**Side-guard door beams.**  
Every S-Series Pickup features standard extra protection within each door: strong steel guard beams designed to help protect driver and passenger from a side impact.

Shows with optional Special Two-Tone in Midnight Black and Khaki.

#### NO-DEDUCTIBLE BUMPER TO BUMPER WARRANTY.

The reasons go well beyond delivery of an exceptional truck. As a Chevy owner, you'll also get an outstanding warranty and many other benefits of purchase—all designed to keep you happy, long after the sale. GM's 3-year/36,000-mile, no-deductible, limited warranty covers repairs for all 1994 Chevrolet vehicles, including labor and parts, to correct any defects in materials or workmanship occurring during the warranty period. Warranty features include air conditioning repair, towing, no-cost warranty transfer, 6-year/100,000-mile body sheet-metal rust-through protection and a 5-year/50,000-mile emissions control system coverage. Items not covered include tires (which are covered by their manufacturer) and normal maintenance. See your Chevrolet dealer for terms of this limited warranty.

#### CHEVY CUSTOMER SATISFACTION SYSTEM.

Local Chevrolet dealerships are a vital link in our customer satisfaction system, and a strong one. Your salesperson will introduce you to the S-Series of your choice, explain all warranties and maintenance schedules, and accompany you on a test drive to make sure you're completely familiar with your new pickup's features and operation. Just as important, Chevrolet dealer service advisors and technicians are

highly trained and equipped with the most up-to-date diagnostic and repair equipment to help ensure your long-term satisfaction with any maintenance and repair work performed on your Chevy pickup. It's also good to know, when you travel long distances, that there are over 4500 Chevy dealers in the U.S., each one ready to provide you

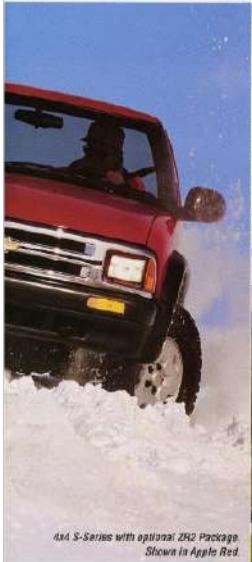

with professional service and genuine GM parts. You can phone the Chevrolet Customer Assistance Center toll-free at 1-800-222-1020 to talk with trained experts regarding any Chevrolet product or service problem you may have.

**CHEVROLET ROADSIDE ASSISTANCE CENTER.** Every buyer of a '94 Chevy pickup will enjoy the security of round-the-clock roadside assistance via a toll-free hot line. Your call for help will be answered by a roadside service phone advisor trained by Chevrolet and experienced with your pickup. If necessary, you'll be placed in contact with a nearby service center, and assistance with towing and other helpful, reasonably priced services will be arranged for you. Roadside Assistance Center personnel can also arrange alternative transportation, hotel reserva-

## IF YOU NEED US, WE'LL BE THERE.

You take home more than a truck and continued attention detailed below. Because we're serious about this: our relationship isn't over when you drive out of your dealership, it's just beginning.

toads, locksmith service and other services you may need while on the road. When roadside services are required, our advisors will explain any payment obligations that may be incurred for utilizing outside services.

### COURTESY TRANSPORTATION.

Retail customers who purchase or lease a new 1994 Chevrolet or Geo passenger car or light-duty truck will be able to take advantage of Courtesy Transportation at no additional charge when their vehicles are left at a participating dealership for repairs covered under the 3-year/35,000-mile New Vehicle Limited Warranty.

**GMAC FINANCING.**  
At your Chevrolet dealership, financing or leasing your new pickup can be as easy as saying GMAC. Also, ask about leasing your new S-Series with a SMARTLEASE® by GMAC.

**GM PROTECTION PLAN.**  
The GM Protection Plan offers service protection in addition to that provided by GM's new-vehicle limited warranty. It's available only in the U.S. and Canada. Ask your dealer about this option.

**AN ENVIRONMENTAL PERSPECTIVE.**  
Chevrolet takes considerable pride in its ability to provide a number of high-quality vehicles for the growing sport of off-roading. However, as the providers of such vehicles, we share a commitment for the preservation of that which makes the very thrill of off-roading possible: the natural environment. We share that commitment with you, the individual off-roader. Join us in a "pro-environment" attitude as you pursue the many pleasures of four-wheeling. Chevrolet encourages you to drive at least as carefully off-road as on-road—and to do your part to help preserve the beauty of America's wildlands.

Beginning with your family, friends, and enough personal belongings to start life all over again, in wonderful style. The 1994 Extended-Cab LS with optional Exterior Appearance Package\* sets a new benchmark for Chevy pickup design.

Add in the full shift-on-the-fly capabilities of Insta-Trac four-wheel-drive on 4x4 models and you're all set to enjoy one of the most comfortable and spacious vehicles on or off road.

**EXTENDED-CAB LS.  
MORE ROOM IN YOUR LIFE FOR  
THE THINGS THAT REALLY MATTER.**

134 S-Series Extended-Cab Piping in Purple Metallic. Shown with optional luxury-level LS trim, optional Exterior Appearance Package<sup>®</sup> and optional cast-aluminum wheels.

\*Chevrolet S-10 Ray or Cab Long Box, culture for LS trim. See dealer for details. © 1995 GM Corp. Includes 100% down payment. Can only be financed through GMAC. Based upon approved credit and cash down payment.

of everything we've reinvented

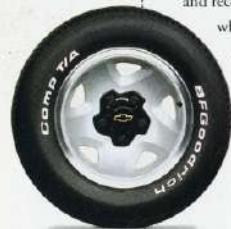

**YOU HAVE THE RIGHT  
TO REMAIN SILENT.**

truck design  
to achieve. All  
the quiet, all the comfort, all  
the generous new room, all the  
easygoing enjoyment of much  
of the very best that the new  
technologies of noise reduction,  
ergonomic efficiencies and  
creature comforts have to offer.  
The 1994 S-Series Extended-  
Cab LS 4x4. You also have a  
right to cheer.

Extended-Cab interior with optional luxury-level LS trim in Gray. Shown with optional Deluxe Cloth reclining high-back bucket seats. Additional options shown include power windows, door locks, electronic 4x4 transfer case shift button, electric remote mirrors and a leather-wrapped steering wheel.

Talk about a gracious way to cruise into the new generation of pickup! Start with LS-deluxe interior trim, an AM/FM stereo

with cassette tape player and a sliding rear window—all at a special savings when you select LS Preferred Equipment Group AAA6.<sup>1</sup> Then, choose the 2.2L 4-cylinder engine in your 2WD LS, or the optional automatic transmission with your 4x4 LS, and receive cast-aluminum wheels as a no-extra-cost Bonus Value.

**Cast-aluminum 16" x 7" wheels.**  
Get cast-aluminum wheels on your 2WD or 4x4 S-Series at no extra cost by choosing the special Preferred Equipment Group AAA6 Bonus Value Package. (2WD aluminum wheel shown with optional white-lettered tire.)

**Visors with extenders.**  
Dual color-keyed extendable visors give extra protection against the sun. A tinted vanity mirror and convenient map strip is included on each visor.

## LS BONUS VALUE. ANYTHING THIS GOOD IS WORTH LOOKING INTO.

4x4 S-Series LS Short-Box Pickup in Brilliant Blue Metallic. Shown with optional Preferred Equipment Group AAA6 and Bonus Value 4x4 cast-aluminum wheels.

**AM/FM stereo with cassette tape player.**  
An AM/FM stereo with cassette tape player, seek-scan feature plus easy-to-read digital clock is included with LS Preferred Equipment Group AAA6.<sup>2</sup>

<sup>1</sup> Also includes color-keyed front air def., bumpers and head caps with 2WD models. <sup>2</sup> Also available as an optional option with standard model (Bonus Preferred Equipment Group AAA6) or Bonus Preferred Equipment Group MAZ.

*LS luxury*  
interior trim  
Includes a new  
60/40 Deluxe Cloth  
split-bench seat with  
folding center armrest,  
full floor and back-panel  
carpeting, cloth side panel  
trim, color-keyed door  
trim, center console,  
auxiliary power outlet  
and more. Also available  
in LS models: optional  
Deluxe Cloth reclining  
high-back bucket seats  
with center console.

Welcome to the 1994 S-Series

Standard. It's all truck and it's all  
there, including 15" wheels with  
all-season tires, power steering,

halogen headlamps, Solar-Ray  
tinted glass, a dark argent grille,  
and rear-wheel anti-lock brakes.

Underhood you'll find a new  
118 HP S-Series 2.2 Liter (133  
cu. in.) four-cylinder engine  
with Multi-Port Fuel Injection.  
And at the rear there's a color-  
keyed close-out panel in place  
of the rear step-bumper found  
on other models.

## S-SERIES STANDARD. A BODY THAT JUST WON'T QUIT.

*S-Series standard Custom Vinyl interior  
in Graphite.*

*2WD S-Series Pickup in Raspberry Metallic.  
Shown with rear closeout panel included with  
standard S-Series (Base Preferred Equipment  
Group) and with Super Sport package. A rear  
step-bumper is optional for these trucks.*

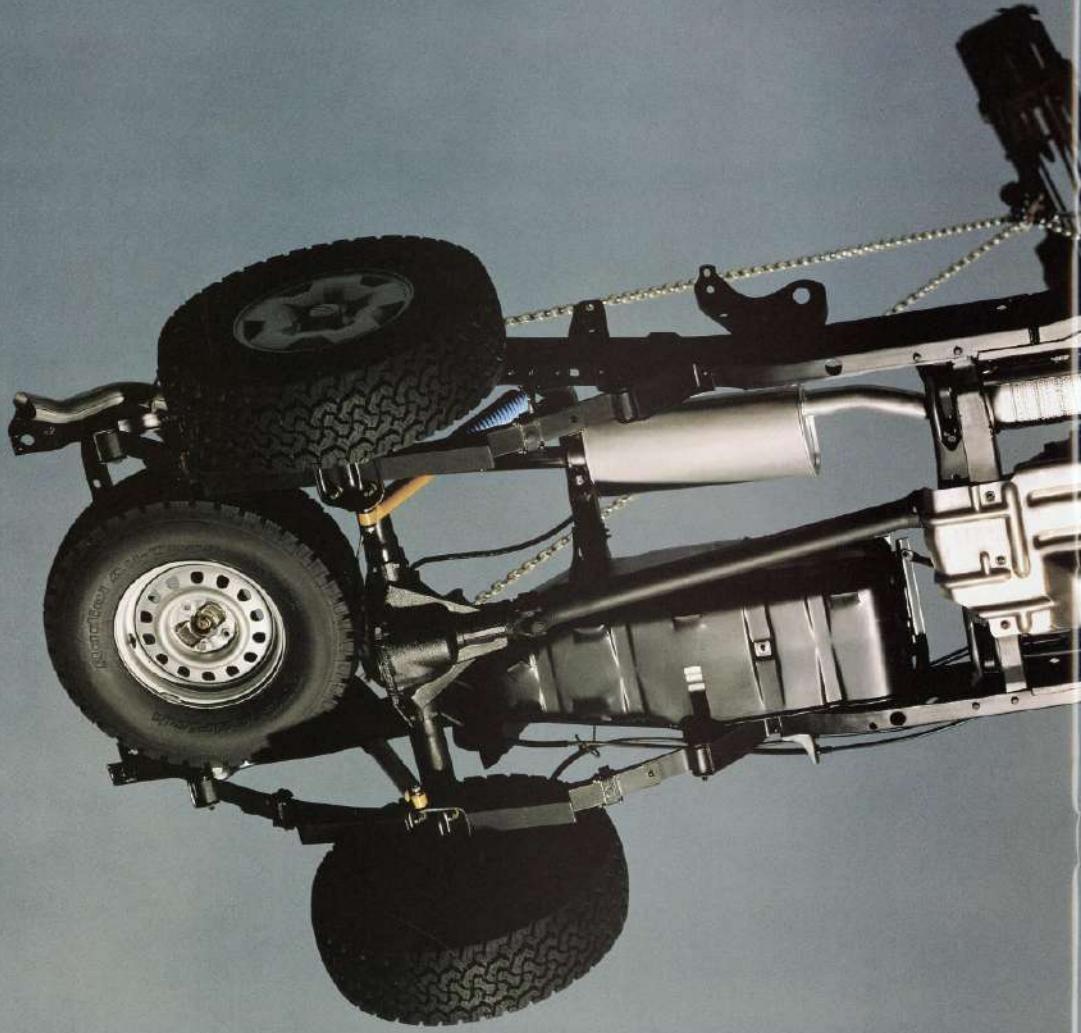

This is the mother lode. Off-road to the bone. The new ZR2 standard cast aluminum wheels optional. Bumpers and wheel flares are Spectre Gray; the ZR2 air dam has built-in tow hooks, and the glass is tinted Solar-Ray. The serious-minded will appreciate that we've also included a larger rear axle, axle shaft and wheel bearings. Feeling more serious about the LS3 ZR2 yourself? Turn the page.

**NEW 4X4 ZR2.** package for the  
**GO OFF-ROADING.** Regular Cab  
**SERIOUSLY.**

Its broad track is 100 mm (3.9") wider than our street trucks, front and rear, and it stands a good 2.98" taller. The tires are massive 31x10.5-inch specials. And 17-inch wheels are

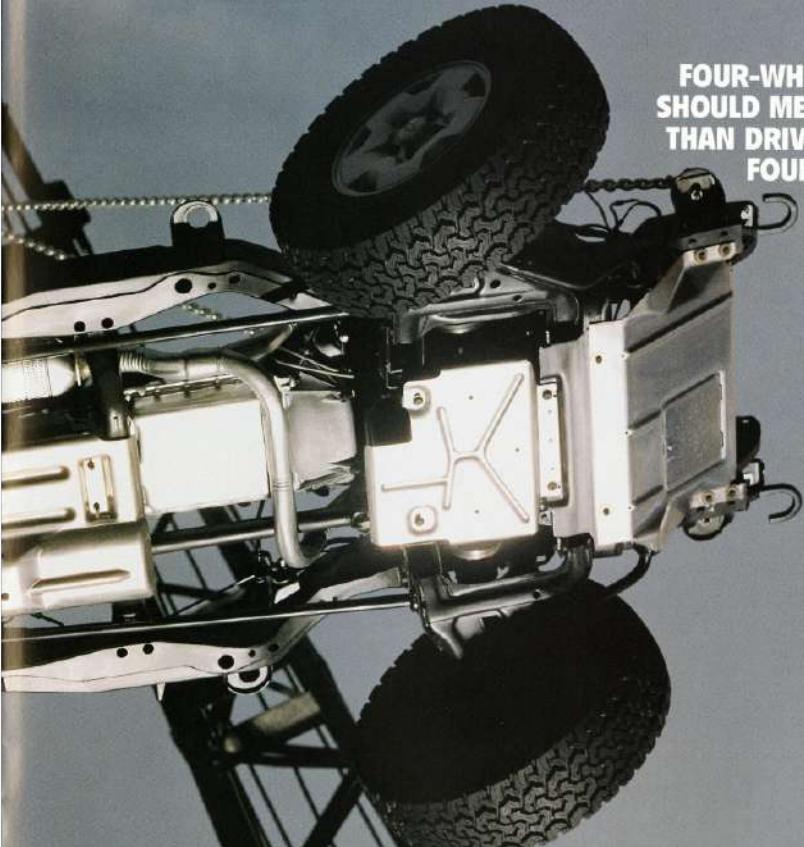

4x4 S-Series Pickup with available ZR2 package and optional cast aluminum wheels. Shown in Apple Red. Driving example shown was performed by a professional driver on a closed course. Do not attempt to duplicate this demonstration.

And more than just driving down dirt roads. It should, in the best of all worlds, mean this: a vehicle conceived,

designed and built to perform beautifully where few roads have ever gone, under conditions no ordinary truck would ever want to endure. Here is just some of the hardware it takes to provide such extraordinary 4x4 performance.

## FOUR-WHEEL DRIVE SHOULD MEAN MORE THAN DRIVING WITH FOUR WHEELS.

### ***Special tires:***

Aggressive wide-tread  
31" x 10.5" blackwall  
tires help the 4x4 2H2  
find its way while the

17" 3-link track bar  
helps maintain ground  
contact. Steel 13" x 7"  
wheels are standard and cast-aluminum  
wheels in the same  
size are optional.

### ***Rear axle ratio:***

Serious performance  
results from a serious  
3.73 ratio hypoid rear  
axle with 8.5" ring  
gear. Threaded and axle  
bearings are also  
larger with ZEV.

### ***Specialized track shocks:***

Specialized tuned-in front  
Bilstein high-pressure  
gas shock absorbers  
absorb the lateral  
acceleration signal of serious  
ZEV capabilities.

### ***A strong frame:***

The S-Series frame  
is built higher, stronger  
and has thicker, larger  
cross members isolated  
from the body to save 100  
lb. of front-end weight.

### ***Biggest V6 engine:***

V6 engines just don't  
come any larger than  
the S-Series 4x4's  
standard 4.9 L V6.  
And it's available with  
a 195 HP or the optional  
300 HP V-10. Both  
engines are mated to a  
five-speed manual or  
four-speed automatic  
transmission.

### ***Independent front suspension:***

Independent torsion  
bar coil front suspension  
with heavy-duty  
torsion members isolates  
the front from the body  
with General  
Pilot Plus tires.

### ***Special front axle:***

A special reinforced  
7.25" ring gear front  
drive axle nests the  
new S-Series 292  
inch-wide 4x4  
capable of impressive  
cornering, stability and handling.

**Twin-Trac 4x4.**  
The most advanced  
4x4 system ever.  
Shift on the fly with  
either manual or available  
auto-button operation. Also for 3x4,  
a manually shifted  
cable-activated transfer case (with four  
mounted couplers),  
designed to minimize  
noise and vibration  
emitting from the  
shift lever.

\*Must be equipped  
with optional  
upgrades of 4x4 models  
using the Twin-Trac 4x4  
option in conventional  
four-wheel drive systems.

### ***Steel skid plates:***

In addition to the 2WD  
steering linkage shield  
available on all S-Series  
4x4s, the F-150's 4x4  
package (optional for  
other two models)  
adds a front differential  
cover and a  
transfer case shield.

Our new Super Sport is equipped for serious driving and serious fun, 2WD style. The SS goodies include: fog lamps, a color-keyed bumper and grille up-front; a color-keyed filler panel instead of a step-bumper at the rear; 15" cast-aluminum wheels with bright center caps — all highlighted by special badging on the doors, tailgate and grille. Inside, there's a leather-wrapped steering

wheel and required LS interior trim. A 195 HP Enhanced Vortec V6 engine with automatic transmission, 3.42 rear-axle ratio, Sport Suspension package with heavy-duty shocks and a beefy front stabilizer bar are also required; and a locking differential is included, because we know you wouldn't have your Super Sport fun any other way.

*S-Series Super Sport in Midnight Black.  
Exterior color availability for the S-Series  
Super Sport is limited to three solid colors:  
Midnight Black, Apple Red or Frost White.*

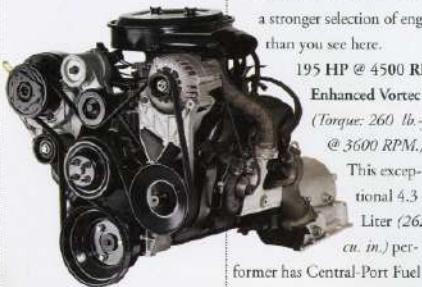

195 HP Enhanced Vortec V6  
with Central-Port Fuel Injection.

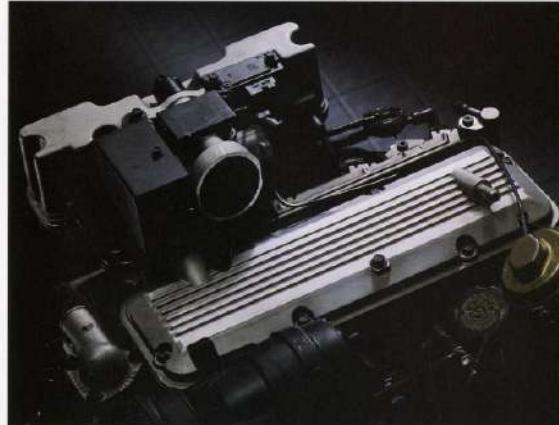

## MORE POWER TO YOU.

You know this about Chevrolet: we don't hesitate to feel proud about the engines we offer. And that's why we want you to know this: we have never before introduced a family of trucks in the S-Series class with a stronger selection of engines than you see here.

*A smooth transition of power.*  
Both the 165 HP Vortec V6 with Electronic Fuel Injection at right and the 118 HP Enhanced Vortec V6 feature an internal balance shaft to help minimize noise and vibration.

*A more powerful standard engine.*  
The new 118 HP 2.2 Liter four-cylinder standard 2WD S-Series engine features Multi-Port Fuel Injection.

### 165 HP @ 4000 RPM Vortec V6.

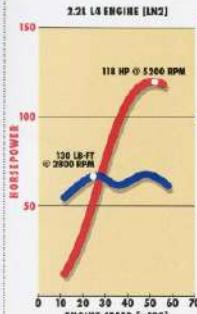

(Torque: 235 lb.-ft. @ 2400 RPM.)

High performance, high efficiency, high marks across the board distinguish the Vortec V6. And its 4.3 liters (262 cu. in.) of displacement makes it the largest V6 engine on the road.

### 118 HP @ 5200 RPM 2.2 Liter L4.

(Torque: 130 lb.-ft. @ 2800 RPM.)

A welcome new S-Series powertrain entry for 1994, this 2.2 Liter (133 cu. in.) L4 engine produces impressive torque and is designed for outstanding power with striking new efficiencies. Multi-Port Fuel Injection and a direct ignition system that never needs adjusting are among the advanced features of this engine.

4x4 S-Series Pickup in Teal Green Metallic.

## WE EVEN MADE CHOOSING THE RIGHT SUSPENSION A LOT MORE COMFORTABLE.

We've not only taken a new and better approach to designing and building the 1994 S-Series Pickup, we're also offering a new and better way to order your truck. The chart below shows how we've put optimum combinations of S-Series suspension components together into just seven easy-to-understand, easy-to-order groups.

Just choose the ride characteristics you want most, then check the body-style availability and review the major component specifications listed to the right. The mini glossary below the chart can help you better understand the ride characteristics and content these packages offer. It's just one more way Chevy is helping you get exactly the truck you want for 1994 and beyond.

1—Standard. G—Optional. SWB—Short Wheelbase. LWB—Long Wheelbase. 1 4500-lb. GVWR for Regular Cab only, which does not fit GM's NCW when equipped with an optional #2 rear tire. 2—Included with Super Sport.

### MINI GLOSSARY

#### 2WD SUSPENSION PACKAGES

**Solid, Smooth Ride** (RPO Z83). The choice for car-like comfort and quiet—but still provides everything a suspension requires for light-duty hauling and trailering.

**High Payload/Firm Ride** (RPO Z85). A tougher suspension for heavier-duty hauling and trailering, on both paved and gravel roads. Provides a firmer but still comfortable ride.

**Sport/Performance** (RPO ZQ8). Tuned to provide maximum response in hard-breaking and quick-cornering situations. Included with Super Sport.

#### 4x4 SUSPENSION PACKAGES

**Solid, Smooth Ride** (RPO Z83). An excellent balance of 4x4 capability with on-road comfort and quiet. Perfect for light-duty hauling or trailering, most often over paved or gravel roads.

**High Payload/Firm Ride** (RPO Z85). A tougher suspension for heavier-duty hauling and trailering, most often over paved and gravel roads. Provides a firmer but still comfortable ride.

**Off-Road/Very Firm Ride** (RPO ZM6). Built to take a pounding and carry the load on the road or where the road is going to be.

**ZR2 On-/Off-Road/Firm Ride** (RPO ZR2). Outfitted with the right hardware for serious off-roading, RPO ZR2 provides suspension stamina for the ZR2 4x4 S-Series Pickup.

### DEFINITIONS

**GVWR (Gross Vehicle Weight Rating).** The total allowed weight of a vehicle (includes weight of the vehicle, passengers, equipment and cargo).

**Shock Absorber Type.** S-Series suspension packages use Delco shock absorbers designed to help isolate passengers and cargo from road irregularities and contribute to suspension control. Twin tube shocks are engineered to provide optimum ride characteristics even when combined with firm-tube suspension components required for higher payloads or GVWRs. Delco/Bilstein monotube shock absorbers (included with RPO ZM6 and ZR2 4x4 ride packages) are charged with nitrogen gas and fluid, separated by a floating piston. They are specially designed to function more reliably and stay cooler during off-road use.

**Front Stabilizer Bar.** Helps to control body lean or sway through curves and corners. Larger diameter bars used with firmer suspensions provide more resistance to these forces.

**NOTE:** Tie-downs should not be used on S-Series 4x4 Pictures measured with optional P235/75R-15 tires or larger because they could cause damage to these vehicles.

### BALL HITCH AND FIFTH-WHEEL TRAILERING — S-SERIES MODELS

ENGINE TRANSMISSION	2.2 Liter L4 Automatic or Manual			4.3 Liter V6 w/EFI or CPI Automatic			4.3 Liter V6 w/EFI or CPI* Manual		
	Max. Trailer Weight* (lbs.)	Max. Tongue Load (lbs.)	Available Axle Ratio	Max. Trailer Weight* (lbs.)	Max. Tongue Load (lbs.)	Available Axle Ratio	Max. Trailer Weight* (lbs.)	Max. Tongue Load (lbs.)	Available Axle Ratio
2WD S-Series Pickup	2000	200	3.73	5000	600	3.08	3500	450	2.73
	2000	200	4.16	4500	750	3.42	4000	500	3.08
4WD S-Series Pickup				2000	200	3.08	2000	200	3.68
				4500	650	3.42	3500	450	3.42
				5000	700	3.73	2000	200	3.73*

\* 7/94-4/95. \*Without V6 with CPI it is available with 5-speed manual transmission only when the optional 2WD Package is selected for S-Series and Regular-Cab Short-Box Pickup. An automatic transmission is required with all other models or suspension packages when this engine is desired. \*\* Maximum gross trailer weight includes all passengers, equipment and cargo in the vehicle, plus any cargo in the trailer. \*NOTE: S-Series trailering-related equipment included power steering, power brakes, a 20-gallon fuel tank, 100 amp alternator and front stabilizer bar. • Chevrolet strongly recommends using the optional 4-speed automatic transmission for towing with an S-Series Pickup. • Any S-Series Pickup over a 2000-lb. trailer without special equipment. • All vehicles towing a trailer over 2000 lbs. require optional trailer hitching equipment (PPO 202) which includes a weight-distributing hitch system, 7-way trailer wiring harness and heavy-duty coupling (PPO 101 with AWD, A4, 4X, FFV 06) and an increased GVW package. • A 3.68 with CPI includes heavy-duty coupling. • Intramotor steering requires heavy-duty coupling (PPO 101 with AWD, A4, FFV 06 and Intramotor 3.68 package). • Please read the "Towing Caution" on page 44 before hitching your new vehicle.

### GROSS COMBINATION WEIGHT RATINGS (GCWR)

The USE OF GAUGES TO DETERMINE ENGINE, TRANSMISSION AND REAR AXLE RATIOS. Perhaps you prefer to use Gross Combination Weight Ratings (GCWR) to determine the engine and rear axle ratio you will require. To determine a specific value with your Chevy S-Series Pickup, the chart below shows you the maximum allowable GCWR based on the maximum S-Series engine and rear axle ratios with the standard automatic transmission. The GCWR includes the total loaded weight of both the S-Series Pickup and the trailer. Any available engine may be used for trailering. If the GMCR shown is not exceeded.

GCWR (lbs.)	AUTOMATIC TRANSMISSION				MANUAL TRANSMISSION			
	6500	8500	9500	10,000	5000	5500	6000	6500
ENGINE				Rear Axle Ratio				
2.2L I4 with EFI	4.10				3.73	4.10		
4.3L V6 with EFI	3.68	3.42	3.73			2.73	3.08	3.42
4.3L V6 with CPI*	3.08	3.42	3.73			3.08	3.42	3.73

\* 7/94-4/95. V6 with CPI is available with a 5-speed manual transmission only when the optional 2WD Package is specified for the S-Series and Regular-Cab Short-Box Pickup. An automatic transmission is required with all other models or suspension packages when this engine is desired.

\*\* NOTE: Maximum allowable GCWR based on the trailer. Any available engine may be used for trailering. If the GMCR shown is not exceeded.

### BOX DIMENSIONS (in.)

Model	Reg.-Cab	Reg.-Cab	Ext.-Cab	Short-Box	Long-Box	Short-Box
Length	72.6	86.6	72.6			
Inside Width @ Top Rear	54.5	54.8	54.6			
Inside Width @ Rear	56.5	56.5	56.5			
Inside Width @ Wheelbase	39.5	39.5	39.5			
Inside Depth	16.5	16.8	16.8			
Overall Height (2WD/4x4)	60.5/61.3	60.5/61.3	60.5/61.3			

NOTE: Illustrated measurements apply to many products such as bedding and personal gear that are designed for use in camp trucks. However, such products will not fit in the bed of a standard cab S-Series pickup truck. The 1994 or newer Chevy S-Series Pickup. Please contact the manufacturer or distributor who can better advise you regarding your specific needs concerning the product you want to transport on your new vehicle by comparing with the product manufacturers' or by checking the catalog or manufacturer's web page for further information.

To have your own truck, you deserve your own look, your own sound, your own

## MAKING YOUR S-SERIES TOUCHES, THROUGH YOUR OWN TRUCK.

and through. These pages can help. The trim levels are easy to understand and easy to choose. Special packages are complete as well as distinctive. Ten S-Series solid color choices are available, or choose optional Special or Custom Two-Tone paint. Delco sound systems are superb, right up to the optional AM/FM stereo with compact disc player. And there's a selection of wheels designed to make your new truck as personal as your signature.

S = Standard. 0 = Optional.

\*In the event of a collision, this advanced, self-aligning steering wheel (which is mounted on an energy-absorbing steering column) is designed to give way under impact and align itself with the driver's chest and torso to help minimize injury. \*\*Standard on 4WD models. \*\*\*Standard on 2WD models with 16" x 6" 4.2 Liter V6.

\*\*Fuel economy estimates are based on GM's GM-estimated Fuel Economy Guide and on Super Sport package. \*In the event of a collision, a rear bumper is required. The rear bumper is available as an option for these trucks. \$Includes an airbag wheel-cover module. \$Includes an AM/FM stereo package.

**NOTE:** The trim features indicated reflect only a portion of the total content of each S-Series trim level. See your Chevrolet Dealer for additional options and details.

**AM/FM Stereo With Compact Disc Player.** Optional for your listening pleasure on all S-Series models. Includes four premium speakers.

**AM/FM Stereo.**  
This electronically-laced AM/FM stereo is included with LS trim and is optional in standard S-Series.

**AM/FM Stereo With Cassette Tape Player.**  
Enjoy your favorite cassette tapes with this optional S-Series AM/FM stereo sound system.

**AM/FM Stereo With Cassette Tape Player And Equalizer.**  
Includes a graphic receiver for custom-timed sound. Optional in all S-Series models.

**2WD 15" Steel Wheel.**  
Standard on 2WD models. Argent-color level. Block center cap with bright center cap.

**2WD 15" LS Wheel.**  
Included with LS trim model. Argent-color level. Block center cap and bright trim ring.

**2WD 15" Cast-Aluminum Wheel.**  
Optional (RPO N60\*) on 2WD models. Black center cap.

**2WD Super Sport 15" Cast-Aluminum Wheel.**  
Included with Super Sport. Bright center cap.

**4x4 15" Steel Wheel.**  
Standard on 4x4 models. Block center cap, trim ring included with LS trim.

**4x4 15" Special Aluminum Wheel.**  
Optional (RPO N5P\*) on all 4x4 models.

**4x4 15" Cast-Aluminum Wheel.**  
Optional (RPO N60\*) on all 4x4 models.  
\*Not available with Recaro® equipment (G10).

## PREFERRED EQUIPMENT GROUPS

*Please remember active packages must be taken to take the S-Series Pickup to your specs specifications and can save you money. You would pay extra by doing things like options in a Preferred Equipment Group as individual options. Savings based on comparison to Manufacturer's Suggested Retail Price of active package vs. MSRP of individual option purchased separately.*

**Bonus Value:** When you order a 1984 S-Series 700 Pickup with Preferred Equipment Group AAAAE and an L3 14 engine, or an S-Series 4WD with Preferred Equipment Group AAAE and automatic transmission, you can also receive a \$1000 bonus toward the total.

### TRIM LEVEL

### SPECIAL PACKAGES

**SUPER SPORT PACKAGE** (available only in Applefest, Midnight Black or Frost White) includes body-color grille with red bowtie emblem, front air dam with fog lamps, front step-upper delete (not silver panel), red SS badging, aluminum wheels with bright center caps, leather-wrapped steering wheel and locking differential.

(Available with 2WD Short-Box only, requires 185 HP V-6 4.3 Liter 16, automatic transmission, Sport chassis package, 3.42 rear axle ratio and US Preferred Equipment Group AAAE or AAAG.)

**SP2 PACKAGE** includes front air roof, light-duty suspension package with 21 x 10.5R-15LT/C blackwall tires. (Available with 4WD Regular-Cab Short-Box only, requires LS trim level.)

\* Available in Preferred Equipment Groups.

1 Standard equipment shown. 2A rear step-upper delete. 3 May upgrade FWD V-6 155 hp engine. Appearance Package includes dark gray body-side moldings with bright inserts, bright wheel-spring meetings and body-color bumpers. 4 May substitute FWD 14 engine.

**NOTE:** For more features included choose only a portion of the tone content or such S-Series Pickup trim level. See your Chevy Truck dealer for additional option availability.

### IMPORTANT:

#### A WORD ABOUT THIS CATALOG.

We have tried to make this catalog as comprehensive and factual as possible. We reserve the right, however, to make changes at any time, without notice, in prices, colors, materials, equipment, specifications, models and availability. Since some information may have been updated since the time of printing, please check with your Chevrolet Truck dealer for complete details. NOTE: Product comparisons published in this catalog exclude other General Motors products, except as noted. A WORD ABOUT ASSEMBLY.

Chevrolet trucks are assembled by different operating units of General Motors, its subsidiaries or suppliers to GM worldwide. Chevrolet trucks incorporate thousands of components produced by different operating

units of GM, its subsidiaries or suppliers to GM worldwide. We sometimes find it necessary to produce Chevrolet trucks with different or differently sourced components than originally scheduled. All such components have been approved for use in Chevrolet trucks and will provide the quality of performance associated with the Chevrolet name. Since some options may be unavailable when your vehicle is assembled, we suggest that you verify that your vehicle includes the equipment you ordered or, if there are changes, that they are acceptable to you.

#### A WORD ABOUT ENGINES.

Chevrolet trucks are equipped with engines produced by different operating units of GM, its subsidiaries or suppliers to GM worldwide.

### A WORD ABOUT

### UPATED SERVICE INFORMATION.

Chevrolet regularly sends its dealers useful service bulletins about Chevrolet products. Chevrolet monitors product performance in the field. We then prepare bulletins for servicing our products better. You can get these bulletins, too. Ask your dealer. Or, to get ordering information, call toll free: 1-800-551-4123.

### A WORD ABOUT

### CORROSION PROTECTION.

\*

Chevrolet trucks are designed and built to resist corrosion. All body sheet-metal components are warranted against rust-through corrosion for 6 years/100,000 miles. Application of additional rust-inhibiting materials is not required under the corrosion coverage.

### A WORD ABOUT

\*

1994 CHEVY TRUCK BROCHURES.

In addition to Chevy S-Series Pickups, you may want one or more of the other four brochures on 1994 Chevy light-duty trucks, Chevy C/K Pickups, Chevy Sports Utility and Chevy Van. They will give you an excellent overview of Chevrolet's many personal-use trucks. Commercial Chevys include Chevy trucks designed specifically for hard work in business and industry. Ask your Chevrolet dealer for any of them, depending on your needs and interests. Please call our toll-free information number, 1-800-950-2438 (C1-EV), for additional '94 Chevy truck brochures, answers to any product questions you may have, or simply to determine the location of your nearest Chevy Truck dealer.

- The trailer brake parts must be able to take 3000 psi of pressure. If not, the trailer brake system must not be used with your vehicle. If everything checks out this far, then have a qualified individual make the brake fluid cap at the ports on the master cylinder that sends fluid to the rear brakes.
- Don't cap into your vehicle's brake system if the trailer's brake system will use more than 0.02 cu. in. of fluid from your vehicle's master cylinder. If it does, neither braking system will work well. You could even lose your vehicle brakes.

- The trailer brake parts must be able to take 3000 psi of pressure. If not, the trailer brake system must not be used with your vehicle. If everything checks out this far, then have a qualified individual make the brake fluid cap at the ports on the master cylinder that sends fluid to the rear brakes.
- Don't use copper tubing, because it will bend and ultimately break. Use only steel brake tubing.

**HITCHES.** It's important to have the correct hitch equipment. Crosswinds, large trucks going by and rough roads are just a few of the reasons why you'll need the right hitch. Here are some rules to follow:

- If you'll be towing a trailer that, when loaded, will weigh more than 2000 lbs., be sure to use a frame-mounted, weight-distributing hitch and sway control of the proper size. This equipment is very important for proper vehicle loading and good handling when you're driving.
- NOTE: The safety steps described here are by no means the only precautions to be taken when trailering. See the Owner's Manual for the Chevy truck of your choice for additional guidelines and trailering tips.
