

CHEVY TRUCKS

**CHEVY IS THE POWER
IN TRUCKS.**

**'82 CHEVY
VANS/SPORTVANS**

**1982 CHEVY VANS.
IMPROVED INSIDE, OUTSIDE
AND UNDER THE HOOD.**

For 1982, you'll find many important improvements in our cargo-carrying Chevy Vans and passenger-carrying Sportvans. In addition to attractive new exterior color choices, we've improved the exhaust system, rear springs, and universal joints in selected applications. For extra convenience, a column-mounted "Smart Switch," which combines headlight bright/dim, windshield wash/wipe and turn signals on one convenient lever, is now standard. And there are further improvements in anti-corrosion treatments.

To help you discover all that's new and all that's "too good to change," we've grouped information important to van buyers on this spread. Features of particular interest to Sportvan buyers can be found on pages six and seven. And information on features and components shared by both vehicles is on the pages that follow.

Important: A word about this catalog. We have tried to make this catalog as comprehensive and factual as possible and we hope you find it helpful. However, since the time of printing, some of the information you will find here may have been updated. Also, some of the equipment shown or described throughout this catalog are available as factory-installed options, dealer accessories and specialized equipment from various independent suppliers at extra cost. Your dealer has details and, before ordering, you should ask him to bring you up to date.

The right is reserved to make changes at any time, without notice, in prices, colors, materials, equipment, specifications and models. Check with your Chevrolet dealer for complete information.

Interior load space 125" WB

1982 CHEVY VAN. IT DELIVERS.

There are three ways to look at a new Chevy Van. There's styling, with seven handsome new colors. And interiors, with a choice of two ranging from comfortable to more comfortable. But most important, there is utility. And that's where 1982 Chevy Van really shines!

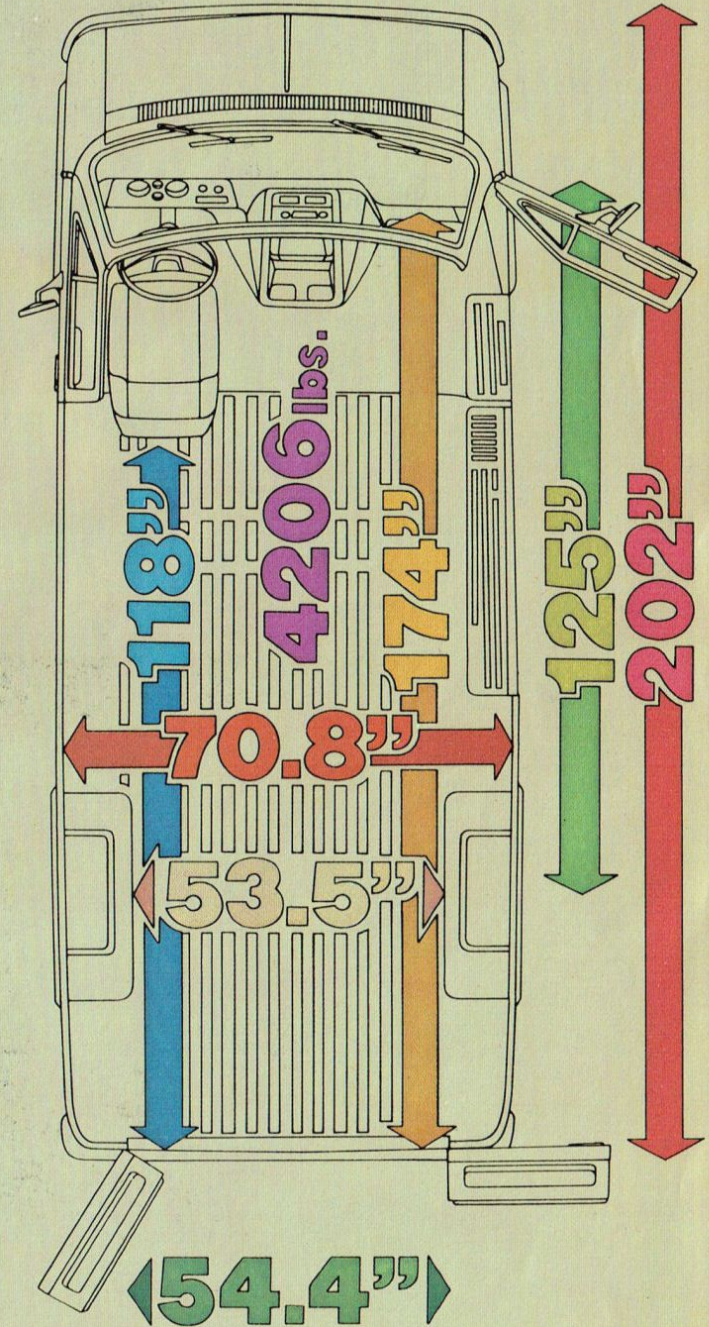

Our 110" wheelbase van handles from 1215 to 2855 lbs. of payload, including passengers, equipment and cargo. And our 125" van can haul a maximum of 4206 lbs. That's more payload than our two closest sales competitors' comparable vans!

Chevy Vans give you room. Lots of it. Our 125" van offers a full 296 cu. ft. of load space. Maximum load length is an outstanding 174". That's more maximum length than the comparable model from our closest sales competitor. Enough to haul a 14' ladder with room to spare! (See the diagram at right.)

What's more, Chevy Van side and rear doors open higher and wider than those of either of our two closest sales competitors. And to further assist in loading and unloading, rear doors swing open 180°.

Add to all of this Chevy Van's tough unitized body-frame construction and impressive mileage ratings and you'll understand why we believe Chevy Van really delivers!

To obtain EPA fuel economy estimates for Chevrolet light-duty trucks, check the wall poster at your dealer's showroom.

Left: Chevy Van in Midnight Blue

**FROM COMMUTING
TO CAMPING.
ERRANDS TO OUTINGS.
1982 CHEVY SPORTVAN
DOES IT ALL.**

From the outside, Chevy Sportvan is a handsome vehicle, made even more so for '82 with new color choices. It's attractive inside, too. With comfortable appointments, impressive visibility all-around, and standard seating for five.

But the real beauty of 1982 Sportvan is its flexibility. The 125" G20 Sportvan offers optional seating for eight and the 125" G30 model offers optional seating for eight or twelve. The quick-release rear bench seats help convert Sportvan from people-to-cargo-carrying in a hurry. And the optional travel bed package quickly transforms the rear seat into a comfortable bed.

Sportvan offers agility . . . Our 110" wheelbase Sportvan has a wall-to-wall turning circle of just 43.1 ft. And our 125" model does it in 47.9 ft. That's great for in-town traffic and tight parking spaces. It's also better than our two closest sales competitors' comparable passenger vans.

. . . and economy! With its standard 4.1 Liter (250 Cu. In.) L6 engine,* Sportvan offers both impressive performance and economy.

* 4.1L engine standard on G10-20 models; 5.7L engine standard on G30 models.

CHEVY VAN AND SPORTVAN INTERIOR COMFORTS.

Standard interiors for both Van and Sportvan begin with a high level of driving comfort. Each features a driver's side foam-padded bucket seat in striped vinyl upholstery. A matching passenger side front seat is optional in Chevy Van, standard in Sportvan. A three-passenger rear seat is standard in all Sportvans.

Bonaventure. This mid-level trim option for Sportvans is an attractive step up in interior comfort and exterior styling. The Bonaventure interior includes high-back bucket seats in dual-tone striped vinyl, full-length headliner, color-keyed floor mats and a deluxe instrument panel.

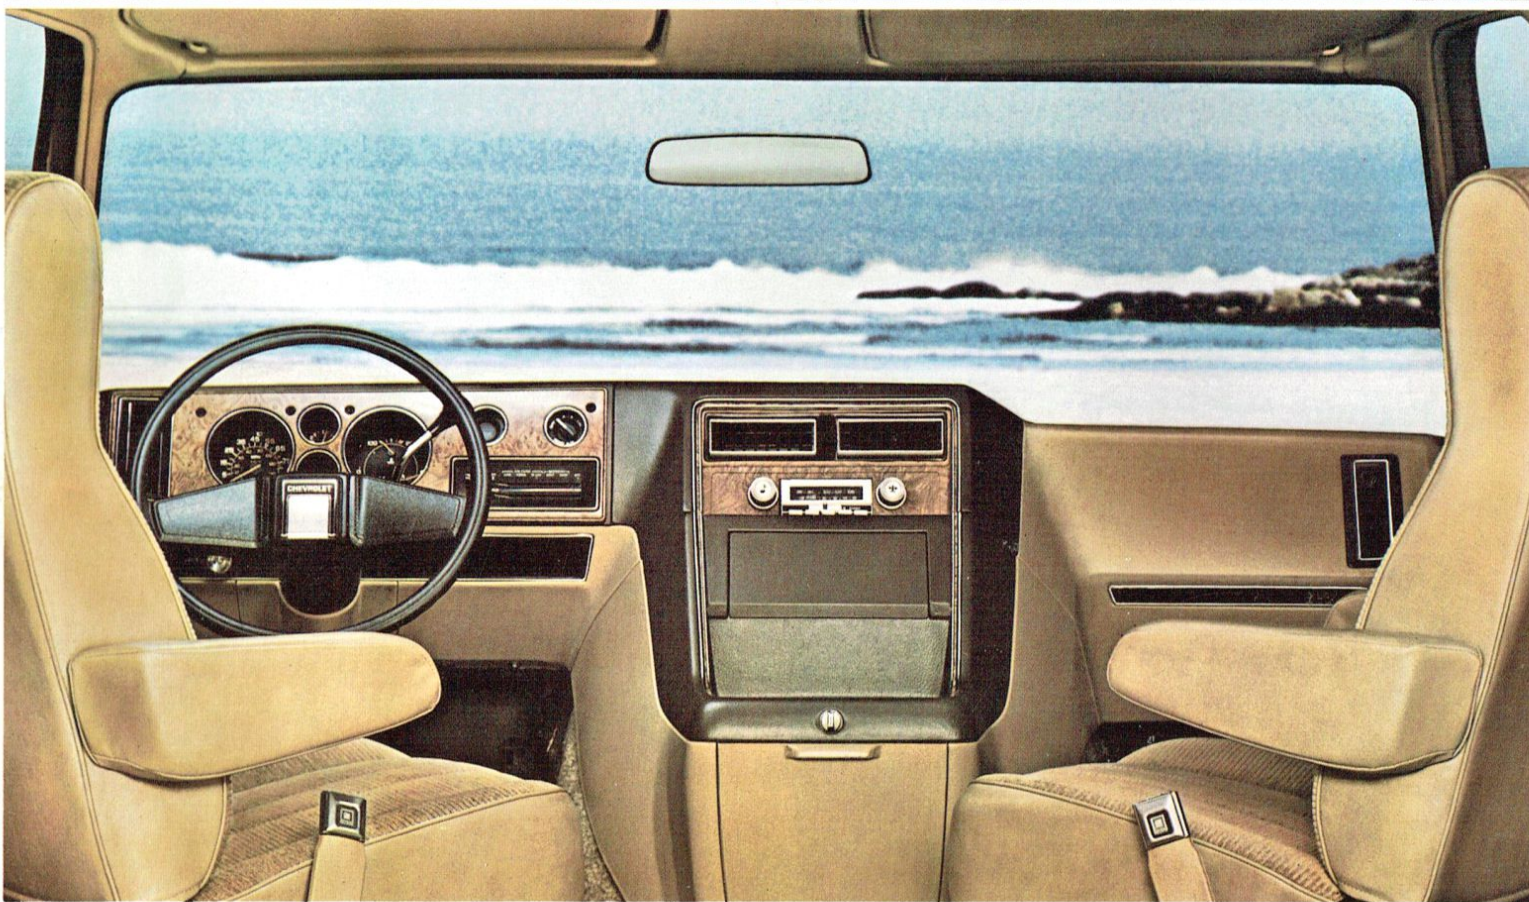

Outside, Bonaventure Sportvan is distinguished by Deluxe Front Appearance Package, chromed front and rear bumpers, and bright tail-light bezels.

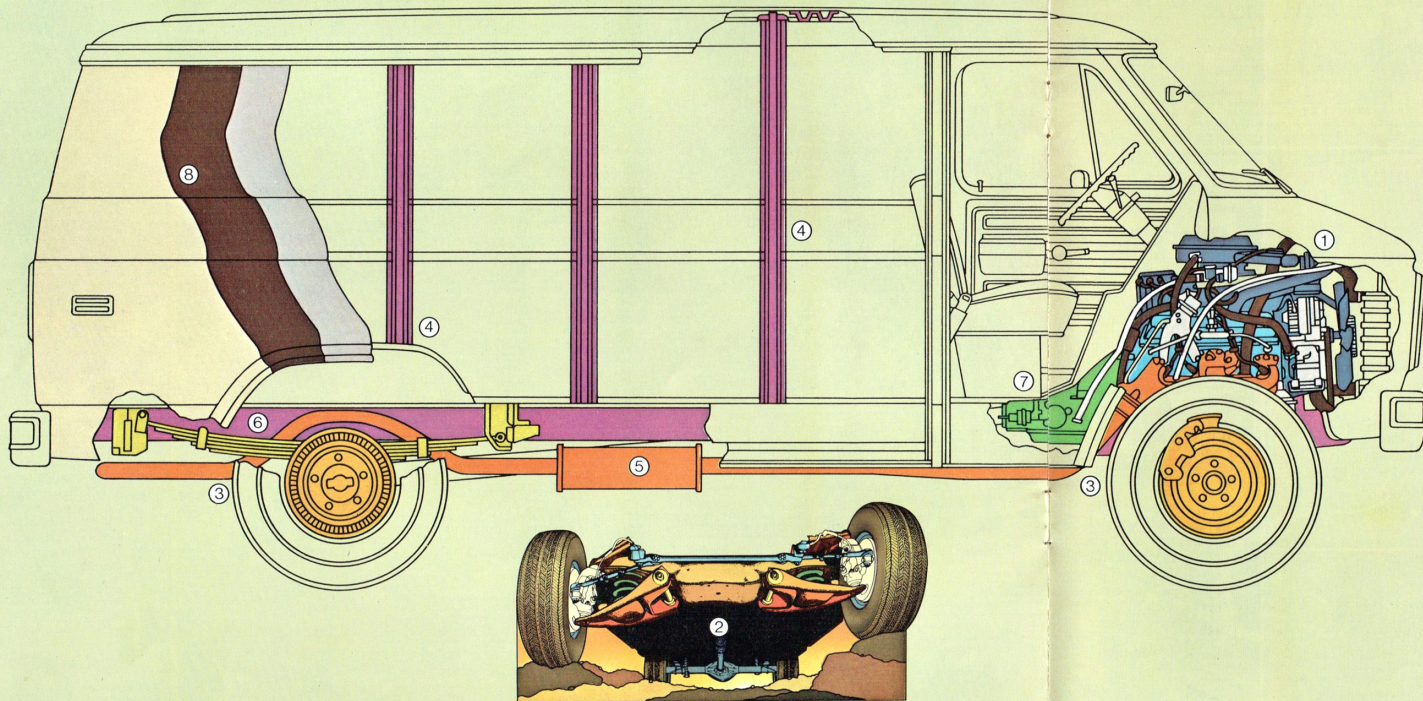

Beauville. Specify this top-of-the-line interior option for your Sportvan and you'll get two high-back front bucket seats in velour cloth or dual-tone striped vinyl, soft vinyl door and sidewall trim panels, color-keyed carpeting, front door stowage pockets, insulated cloth headliner, and a custom instrument panel.

Plus these styling touches: bright body-side and wheel-opening moldings, Deluxe Front Appearance Package, with rectangular headlights, chromed front and rear bumpers and more.

Optional swivel reclining bucket seats, shown far left in Beauville interior, add extra comfort and convenience to Sportvan models.

ENGINES AND ENGINEERING

1. Four engine choices. The 4.1 Liter (250 Cu. In.) six-cylinder engine, standard in all G10-20-30 Chevy Vans without C6P and G10-20 Sportvans, offers both impressive performance and economy.

For extra power, three V8s are available. A 5.0 Liter (305 Cu. In.) with Electronic Spark Control (not available in California). A 5.0 Liter V8 with 4-barrel carburetor for California Vans. And a 5.7 Liter (350 Cu. In.) V8 (Standard on G30/C6P Chevy Vans and all G30 Sportvans.)

See the Specifications chart on the back cover for engine availability in specific models.

2. Rugged girder beam front suspension. Standard in all Vans and Sportvans, this system features a thick steel beam for strength. Control arms, attached at each end, flex up and down allowing the front wheels to take on the bumps and ruts independently to help cushion the ride.

3. Computer-matched brakes. Front disc and rear drum brakes are computer matched to the GVWR of the Van or Sportvan you order. All have a wear sensor that sounds an audible signal when front disc brake pads need replacement.

4. Tough, unitized construction. All Vans and Sportvans have a body and frame that are integrated into a strong, single unit for big payload capability. Floor panels are welded to heavy-gage-steel side rails, cross sills and outriggers. Main underbody components are also heavy-gage steel, while components such as door step panels, rocker panels and wheelhousings are of corrosion-resistant steel.

5. Improved exhaust system. Standard with the 4.1 Liter engine, this new system reduces weight which contributes to fuel economy.

6. Leaf-type rear springs adjust to the load. To help provide a smooth, level ride, two-stage springs stiffen as the load grows heavier.

7. Manual and automatic transmissions. The 3-speed synchromesh manual transmission is standard on all Chevy Vans and on G10-20 Sport Vans. An automatic transmission is optional on these models and standard on G30 Sportvans.

8. Improved anti-corrosion treatments. ... Again in '82, Chevy Vans and Sportvans benefit from more extensive anti-corrosion measures. Hot-dipped galvanized steel is used in more areas. Front and rear painted bumpers incorporate new zinc-plated metal. And all brake and power steering lines now have Zincroteme® coating.

These improvements come in addition to a protection program that already includes extensive use of galvanized steel in critical areas, electrically charged priming, aluminized wax coatings on inner surfaces, and weatherproofing throughout.

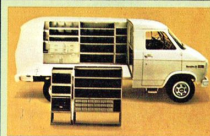

... backed by a three-year warranty. Vans and Sportvans are covered by Chevy's Three-Year Perforation-From-Corrosion Limited Warranty. Exhaust system components not included. See your Chevy truck dealer for details on other limitations.

A WORD ABOUT ENGINES.

Some Chevrolet trucks are equipped with engines produced by other GM divisions, subsidiaries, or affiliated companies worldwide. See your dealer for details.

Please refer to the Chevy Van and Sportvan powertrain information shown on page 13.

VANS FOR SPECIAL JOBS

Trade Packages. Special vocational equipment packages for general service, plumbing, heating and air conditioning service, or electric and gas appliance service are optional on special order. See your Chevy truck dealer for details.

Hi-Cube Vans. Combining many of the styling and comfort advantages of a Chevy Van with much larger load space, Hi-Cube Vans offer a selection of bodies ranging from 406 to 570 cu. ft.

Step-Vans. Popular as parcel delivery trucks, rescue vehicles and TV mobile units, Chevy Step-Vans are available with steel or aluminum bodies, load space of 579 to 717 cu. ft., and GVWRs of 6800 to 14,500 lbs.

For more information on Chevy Hi-Cube Vans or Step-Vans, ask your Chevy dealer for a Walk-In Van Catalog.
