New Ford TX3.

Styled for excitement.

It's new from Ford. The scintillating TX3. Born on the wind. Bred for the road. See how it crouches. Systems at the ready. Eager to explode into life.

Ford TX3. Now setting a whole new standard. With low point of entry, upswept waistline and sophisticated rear spoilers, TX3 is eye-catching at any speed.

Its sleek three-door body shell contrasts high-key paint colours with grey lower bodyside panels and bumpers highlighted with red accent stripes. TX3 sits tight on grey and silver alloy wheels shod with low profile tyres – a subtle hint of what is to come!

Under its Laser-inspired skin, the fuel-injected Ford TX3 is all go. All action. A car to satisfy the 'driver' with on-road ability designed to shock a lot of the so-called hot performers.

See the new Ford TX3 now and you'll know what excitement is all about.

New Ford TX3. Style, excitement, performance.

TX3 control.

Forget your pastel interiors. Ford TX3 is all business. With two-tone panelled seats in grey and black tweed.

Slip into the 6-way adjustable driver's seat. Tilt the sports wheel to where you like it. Switch on the excitement and feel the urge of its new-tech fuel-injected 1.6 litre OHC engine.

The gearshift sits in the palm of your hand. Instruments are deep-set within your line of vision. The full-face speedometer and tachometer flank supporting gauges and warning lights, reporting instantly on all vital systems. Electrically controlled rear view mirrors help you see where you've been.

And stopping with powerful four-wheel disc brakes is rapid, totally controlled and virtually fade-free.

But TX3 is not just a driver's car. Front seats move forward for easy rear seat access. The rear seat back is split 50/50 for added passenger/luggage flexibility – and features six-position recline, adjustable head restraints, and integral armrests.

Power to out-perform

For the letter 'i', read injection. Advanced fuel injection that turns the 1.6 litre OHC engine into a potent performer. Its advanced new-tech features include – easy-breathing crossflow alloy cylinder head, multi-spherical combustion chambers, belt-driven overhead camshaft, lightweight computer-designed cylinder block and High Energy electronic ignition. The 1.6i engine spins freely to generate outstanding power with excellent fuel economy.

More power to the road.

The five-speed floor-mounted gearshift features short travel and smooth-as-silk operation. Or push it through fast. You won't beat the lightning quick synchromesh or upset the special high performance clutch.

High performance handling.

TX3 strikes a superb balance between positive 'sports' road holding and ride comfort. Its fully independent four-wheel suspension includes McPherson struts/coil springs on the front, with Chapman struts/coil springs on the rear and sports shock absorbers. Front and rear stabiliser bars combine with low-profile 60 series tyres on alloy road wheels to ensure outstanding cornering stability. In addition, TX3's self-stabilising rear suspension and anti-swerve front suspension build driving confidence. Handling in corners and low-speed manoeuvrability is improved with 'variable gear ratio' rack and pinion steering. Power steering is available.

A super-quiet achiever.

Noise has been engineered out of TX3. Advanced aerodynamics help reduce wind turbulence. The computer-designed cylinder block is ribbed for quiet running. Engine and radiator mounts, suspension bushes and a steering column torsional damper all combine to ensure a new standard of quiet.

TX3 is 'luxury' performance motoring.

Special luxury features include variable intermittent windscreen wiper control, rear hatch window wash/wipe, remote control fuel lid and hatch openers, adjustable tilt steering column, passenger sunvisor with vanity mirror, electric remote control exterior mirrors, driver's footrest, illuminated entry system, interior lamp with map spotlight, door courtesy lamps, front passenger seat undertray and front door pockets.

Invest in a TX3.

The long-life anti-corrosion package employs special steels in rustprone areas, advanced chemical treatments and durable surface coatings to protect your investment.

See the style. Feel the excitement. Experience the performance.

Ford TX3 awaits your pleasure now.
