

The new EV6

Movement that inspires

Sinuous new look

The new EV6 takes on a more sinuous look with dynamic, new front-end styling that flows into a side profile accented by new side mouldings, automatic flush door handles and new wheel designs. All of this is book-ended by the latest iteration of Kia's signature Star Map front and rear lighting treatments.

In addition to an enhanced battery pack that helps extend driving range, EV6 now features an NACS charge port, giving you access to thousands of additional fast-charge stations across Canada and the United States.

Digital Key 2 turns your smartphone into a secure key that unlocks the doors and starts the vehicle. A Share Key function lets you share access with others on their phones.^{2*}

A next-generation heads-up display (HUD) uses augmented reality (AR) technology to project a three-dimensional snapshot of essential driving information on the inside of the windshield.*

The new EV6 is equipped to receive over-the-air (OTA) updates to many of its electronically controlled systems, including the powertrain. You get easy access to updates and available upgrades with fewer dealership visits over the life of the vehicle.

* Available feature. Visit kia.ca for full details.

EV6 offers remarkable roominess and comfort for 5 adults. It comes with standard heated front seats and available amenities that include air-cooled front seats, heated rear seats, a driver's seat memory function and a luxurious Meridian Premium Audio System featuring multi-channel surround sound.

A blind view monitor displays the blind spot in the direction your turn signal is indicating.*

The full display digital ECM rear-view mirror provides a panoramic view of the rear of the vehicle -when your vision might otherwise be obstructed.*

Dual 12.3" Supervision LCD/TFT instrument cluster and infotainment screens place every system control within easy reach of the driver.

* Available feature. Visit kia.ca for full details.
