# VENUE

# Big things happen in this Venue.

Venue was built to match urban energy with personal style and versatility. It's a small SUV with big doses of savvy design, smart technology and sophisticated safety features that shine under the city lights. Offered in three trims, Venue is always in fashion thanks to its chiseled angles, cascading mesh grille and an available two-tone roof.

Entertainment is always cued up without having to plug in, thanks to wireless Apple CarPlay® and Android Auto™ integration.<sup>1</sup> You can effortlessly stream playlists from your compatible smartphone while viewing maps, messages and more on Venue's touchscreen center display.

When you're on the move, Venue SEL's Proximity Key makes it easy to get going quickly. It lets you open up and start up without taking the key from your pocket or purse. Venue's push button start fires up a Smartstream 1.6L engine rated at up to an EPA-estimated 31 combined MPG.<sup>2</sup>

Dial in your drive with the available Drive Mode Select feature, and you can choose between Normal driving dynamics, Sport responsiveness or Snow mode for enhanced traction. So your Venue will navigate the city as confidently as you do.

VENUE SEL with Two-tone Roof in Black Cloth/H-Tex™ combination

# Fits everything you need. Even your vibe.

With all the versatile storage space inside Venue, it's easy to pack up and go to your next gig, game or girls' night out. Hyundai designers carefully studied the types of gear you carry, then created innovative storage solutions to maximize cargo capacity.

To start, there's an available two-level cargo floor. The standard height is designed for easy loading without having to lean in to set down your cargo. Or the floor can be lowered to gain greater clearance for taller items. The cargo cover that conceals your stowed stuff can also be removed and stored when more cargo height is needed.

Now that everything is packed in its proper place, it's time to put yourself in the proper frame of mind. Press a button, and the available power sunroof slides open to let in sunlight. Tap the big, bright touchscreen display to call up your favorite tunes from your phone's playlists, then enjoy how rich and full your music sounds on Venue's standard 6-speaker audio system.

Like you, Venue knows how to be comfortable in different situations. Whether it's hot or cold outside, an available automatic temperature control maintains preset temperatures inside the cabin. Heated front seats are also available to take the chill off. And like you, Venue is totally plugged in. Front-seat passengers can charge their devices using dual USB ports or a 12-volt power outlet. On SEL trims, friends in the rear seat can stay charged with dual rear USB ports.

Versatile cargo area

Wireless phone charger and dual USB ports

# Expand your safe space.

Venue helps protect you from nearly every angle with Hyundai SmartSense, our remarkable suite of advanced safety and driver assistance technologies.<sup>3</sup> To help keep you aware of potential hazards in front of you, there's Forward Collision-Avoidance Assist with Pedestrian Detection.<sup>4</sup> Whether it's a slowed vehicle detected in your path, or a pedestrian detected to be walking in the road, Hyundai Venue can alert you to the trouble ahead. If necessary, emergency braking may automatically be applied to help you avoid a collision.

Should you begin drifting outside of your lane without signaling, Lane Keeping Assist can help alert you and actively engage your Venue's steering to gently nudge you back into your lane.<sup>5</sup> If fatigue or inattentiveness is detected in your driving behavior, a feature called Driver Attention Warning alerts you that it may be time to take a break.<sup>6</sup>

Beyond these standard features, Venue can be equipped with advanced technologies that act as an extra set of eyes. If your Venue detects a vehicle in your blind spot while the turn signal is activated, available Blind-Spot Collision Warning issues an alert before you change lanes to help avoid a collision. It also monitors for vehicles approaching from behind to help prevent collisions when you are exiting a parallel parking spot.<sup>7</sup> Backing out of a head-in parking space and wondering whether there is traffic coming your way? Rear Cross-Traffic Collision Warning helps alert you of another vehicle approaching from the side.<sup>8</sup>

Even as you exit your vehicle, Venue looks after your family's safety with a standard Rear Occupant Alert feature that reminds you to check the rear seats before leaving.<sup>9</sup>

## Footnotes

<sup>1</sup>Apple is a registered trademark of Apple Inc. Android Auto™ is compatible with Android™ phones running Android 5.0 or higher. Android Auto may not be available on all devices. Additional apps may be required. Android and Android Auto are trademarks of Google LLC. <sup>2</sup>2026 VENUE: 29 City/33 Hwy/31 Combined MPG. All figures are EPA estimates and for comparison purposes only. Your actual mileage will vary based on options, driving conditions, driving habits and the vehicle's condition. <sup>3</sup>Safety features vary by model and trim level. For details, refer to the Features chart in this brochure or visit [HyundaiUSA.com](https://HyundaiUSA.com). <sup>4</sup>Forward Collision-Avoidance Assist with Pedestrian Detection (FCA-Ped) is intended to be a supplement to safe driving practices. The system is not designed to detect certain stationary objects such as trees or poles, and may not detect all vehicles or pedestrians under certain conditions. FCA-Ped is a driver assistance system and is not a substitute for safe driving. The driver is responsible for being attentive and maintaining control of the vehicle, and should not wait for the FCA-Ped's alerts before braking as there may not be sufficient time to brake safely. See Owner's Manual for further details and limitations. <sup>5</sup>Lane Keeping Assist (LKA) will not work under all circumstances. It operates above 40 mph and only when it is able to detect painted lane markings. It cannot function if the lane markings cannot be seen clearly. If the lines cannot be seen clearly due to poor road conditions, weather, or lighting conditions, it may not function. It also may not function on very rough roads, when walls, curbs or concrete barriers are close by, or if following another car too closely. Since it "sees" the lane markings using a camera in the upper windshield area, it is imperative this area be clear and free of blockage such as stickers, dirt, snow, tinting material, markings and labels. Lane Keeping Assist is not a substitute for safe driving practices, but is a supplemental assist only. The driver is responsible for always maintaining command and control of the vehicle and must keep hands on the wheel at all times. See Owner's Manual for further details and limitations. <sup>6</sup>Driver Attention Warning (DAW) is only a warning to inform the driver of a potential lack of attention or drowsiness. It does not detect or provide an alert in every situation. It is the driver's responsibility to remain alert at all times. See Owner's Manual for details and limitations. <sup>7</sup>Blind-Spot Collision Warning (BCW) can assist the driver by warning of other cars in the blind spot region. While your turn signal is on, it can alert you visually, by sound and/or by haptic feedback when equipped. It senses the rear side territory of the vehicle when it is traveling over approximately 12 mph. There are limitations to the function, range, detection and clarity of the system. It will not detect all vehicles or objects in the blind spot. Its operation depends on the size, distance, angle and relative speed difference between your car and other cars. BCW may not operate if sensors are obscured in any way. Do not rely exclusively on BCW. BCW is a supplemental system, and the driver must still be attentive and exercise caution when driving. It is the driver's responsibility to be aware of the surroundings and ensure it is clear before changing lanes or directions. See Owner's Manual for further details and limitations. <sup>8</sup>Rear Cross-Traffic Collision Warning (RCCW) helps drivers back out of a parking space by detecting traffic coming from either side of the vehicle. It can alert the driver to a potential hazard. RCCW is active when the vehicle is in reverse gear and operating at low speeds. Never rely exclusively on RCCW when exiting a parking space, as it is not a substitute for attentive driving. Always look over your shoulder and use your mirrors to confirm rear clearance. There are limitations to the function, detection, range and clarity of the system. See Owner's Manual for further details and limitations. <sup>9</sup>Upon turning the engine off, Rear Occupant Alert (ROA) will provide a visual alert on the instrument cluster. ROA is not a substitute for driver attentiveness. Never leave a child or pet unattended in a vehicle. See Owner's Manual for details and limitations.

**Hope comes standard on every Hyundai.**

Each time we sell a Hyundai, a portion goes to Hyundai Hope On Wheels® to help find a cure for childhood cancer. Over the last 27 years, Hyundai Hope On Wheels has donated \$277 million to pediatric cancer research. Hope is our greatest feature. And it comes standard on every Hyundai.
