THE ALL-NEW

► 08 ■

CTS

AND SUDDENLY – EVERYTHING IS DIFFERENT

CTS

Once in a long while, a car comes along that overturns the accepted order and changes the game forever. The all-new 2008 Cadillac CTS is just such a car. CTS puts the industry on notice that it's no longer acceptable for a car simply to offer a stylish body, or spirited performance, or a luxurious, technology-rich cabin. To be truly world-class a car now has to do it all, and do it at a very high level – just like the new CTS does. CTS. Change is good.

CTS
THE ALL-NEW
08

Cadillac

CTS

THE PASSION IS CONTAGIOUS
STUNNING

As functional as they are stylish, CTS's fast-illuminating LED tail lights alert following drivers almost instantaneously whenever you apply your brakes.

The sculpted, chrome-framed vents on CTS's front fenders extract hot air from the engine compartment.

A NEW POWER TAKES FORM
DETAILS

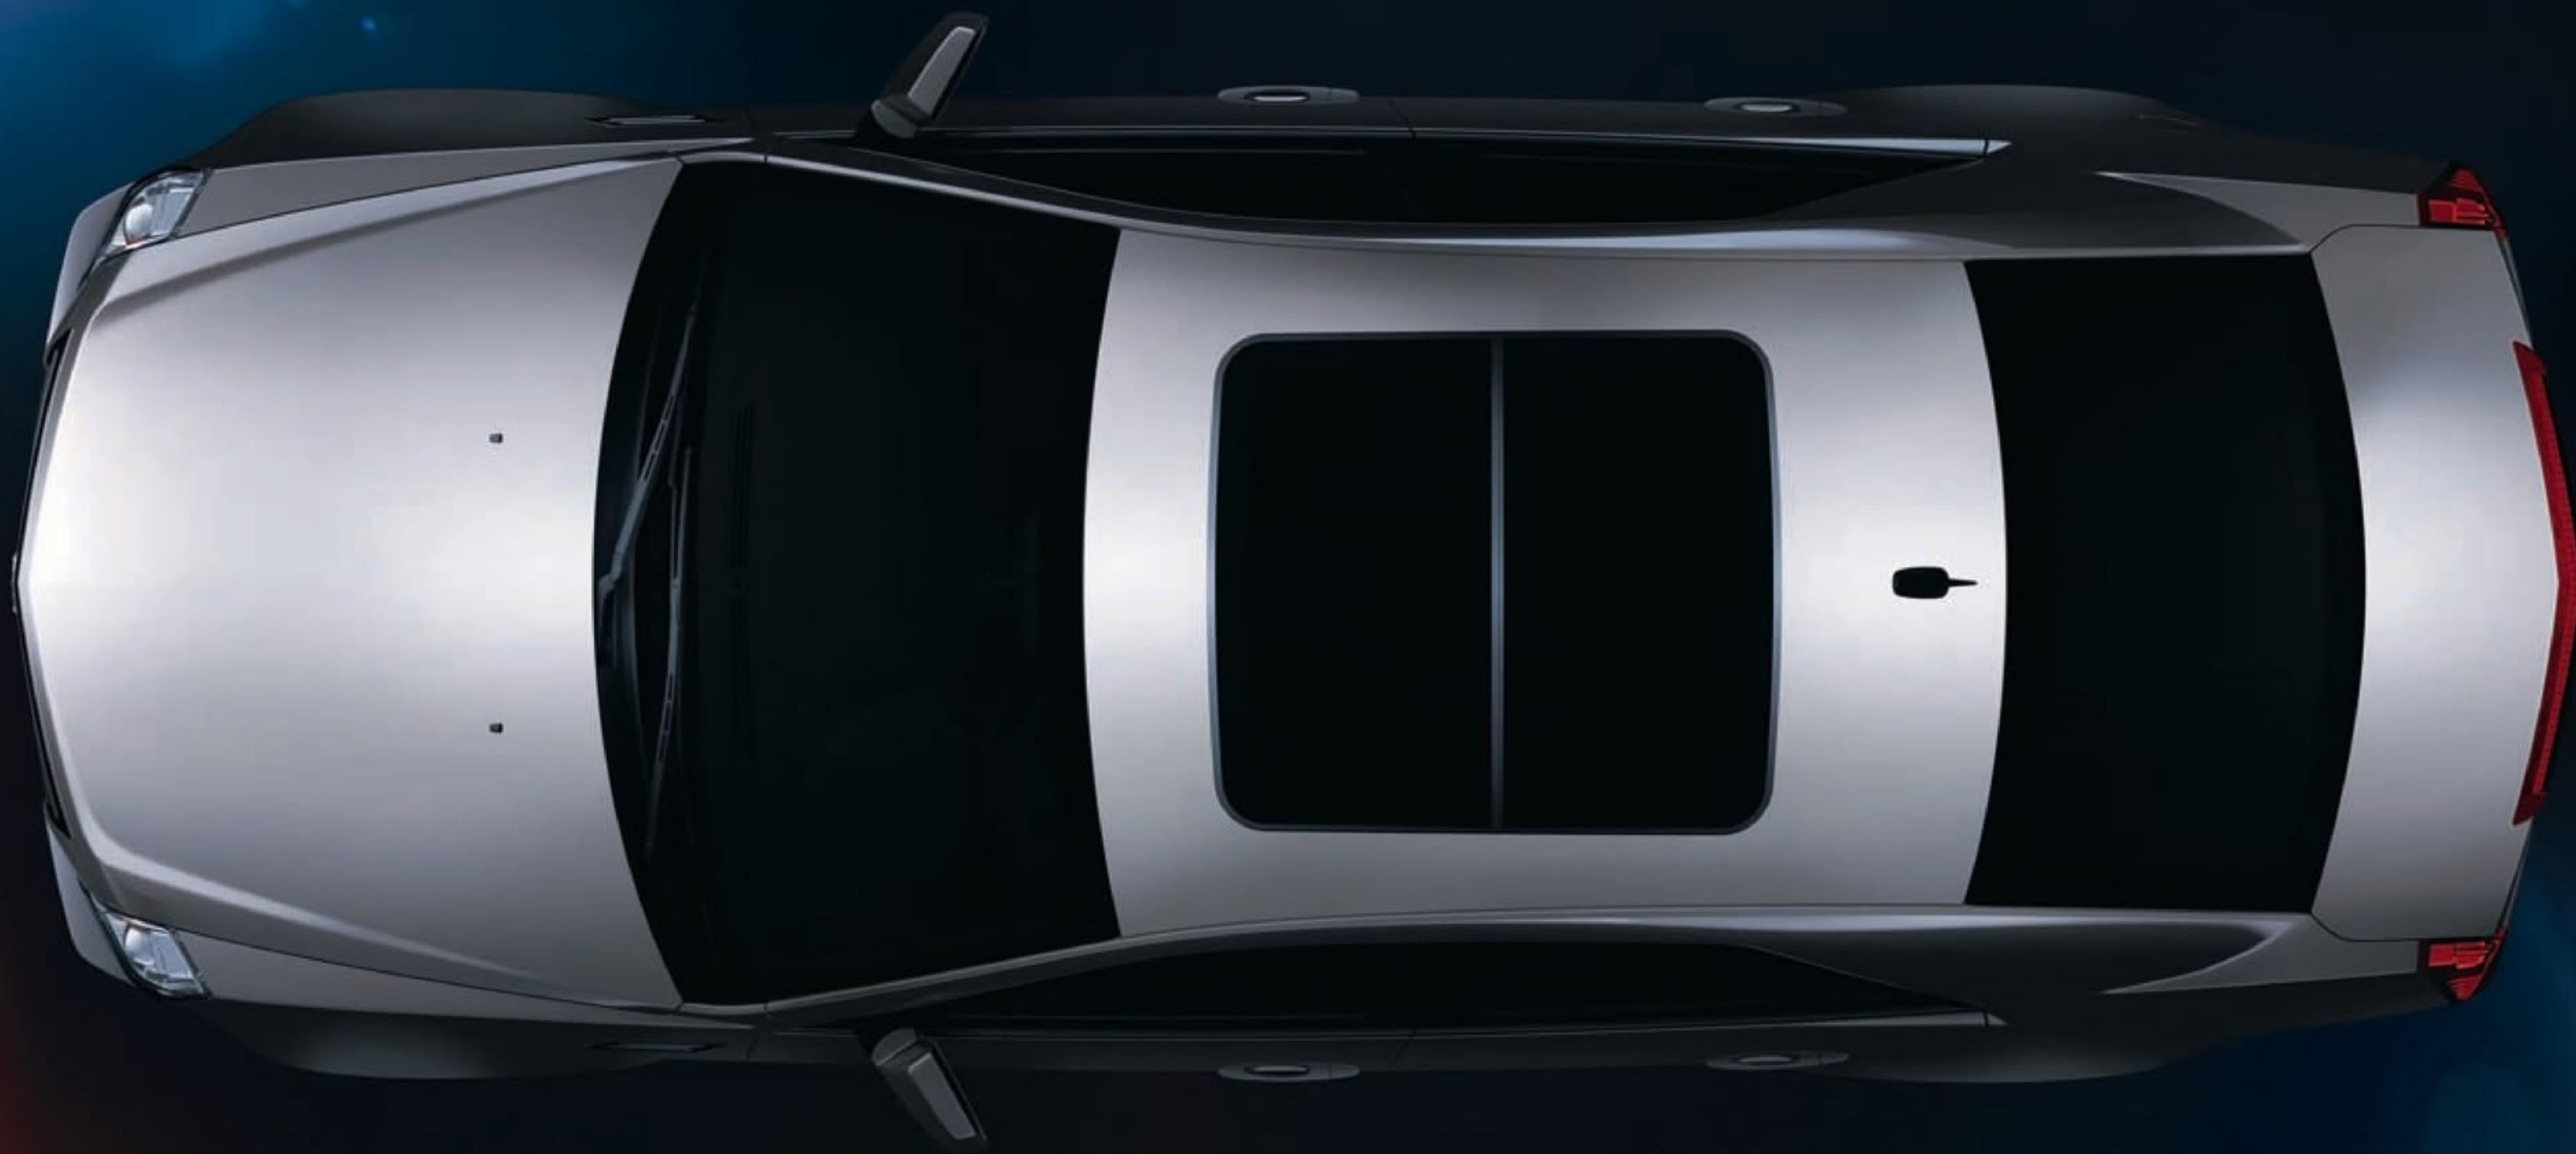

CTS

The 2008 CTS blends complex geometric elements with subtle organic curves. The result is a riveting new look that also honours Cadillac's avant-garde design tradition. Complementing the dramatic overall shape are a host of brilliantly executed details, like the functional air extractors on the front fenders and the distinctive LED tail lights. A wide track and flared fenders speak of the new CTS's increased performance capabilities, while the body's tight panel gaps and invisible roof joints – the product of advanced laser brazing technology – are visible demonstrations of CTS's world-class quality.

IMPROVE YOUR OVERHEAD
ULTRAVIEW

CTS

How do you improve on a sunroof? Cadillac's designers pondered. Their answer: make it larger — nearly 70 percent of the area of the roof — so it brightens the cabin for both front and rear passengers. The available UltraView sunroof they designed is one of the largest offered in any sedan. It also features a power-retracting interior sunshade for those occasions when a softer light is desirable.

The extraordinary CTS driving experience begins before you even enter the car, as the available Keyless Access System unlocks the doors without requiring you to remove the fob from your pocket or purse. The system also includes a convenient adaptive remote start function that allows you to start the engine and climate control system from up to 60 metres away. Once inside, you're surrounded by premium materials, handsome, powerful shapes and an unwavering sense of purpose. You'll find it's an environment that enhances your confidence, control and enjoyment in every driving situation.

BEAUTY IS AS BEAUTY DOES
CONTROL

CTS

CTS

21ST CENTURY TECHNOLOGY MEETS HAND-CRAFTED QUALITY
PREMIUM

The new CTS cabin brings together the best of two worlds. Among its traditional elements are supple leather seating surfaces and door, console and instrument panel trim that's cut, wrapped and hand-sewn by master craftsmen. Then there are the interior's many standard leading-edge amenities, including memory functions for the driver's seat and exterior mirrors, along with ten-way power adjustable front bucket seats which employ an advanced design that simultaneously maximizes occupant comfort and interior space. For an even higher level of comfort, heated and cooled bucket seats are also available.

CTS's steering wheel, transmission shifter, instrument panel, centre console and doors can be trimmed with the warmth of available genuine Sapele Pommele wood.

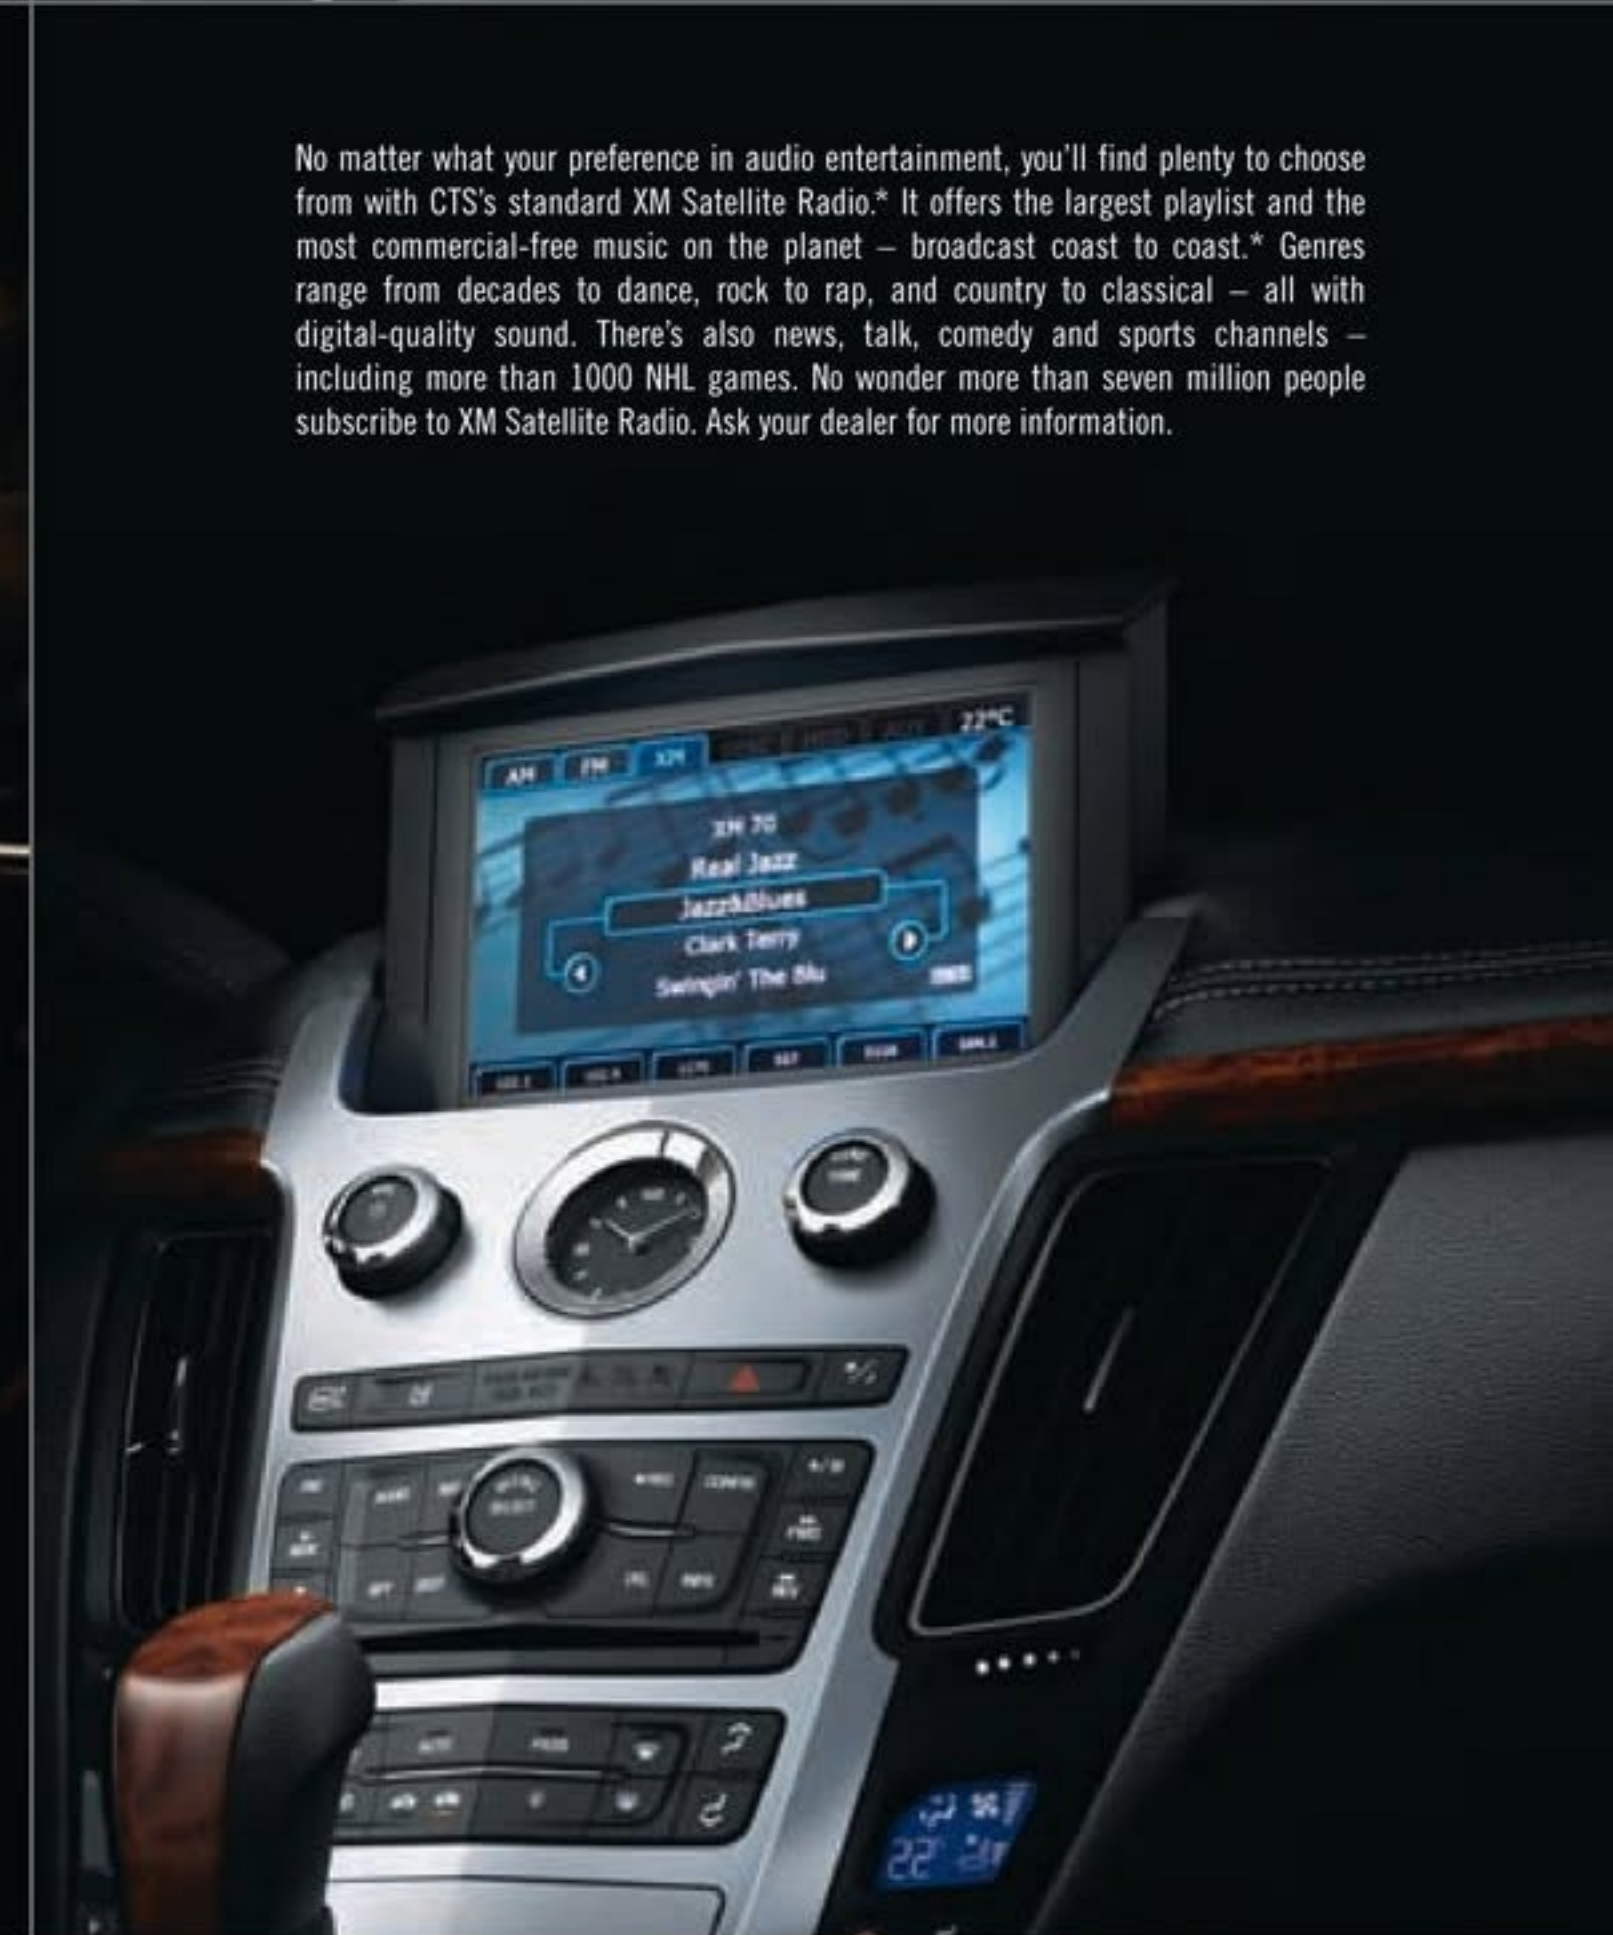

TURN ON — TUNE IN — GO INFOTAINMENT

CTS

The available DVD navigation system features a high-resolution VGA touch screen that recedes into the instrument panel when not in use.

No matter what your preference in audio entertainment, you'll find plenty to choose from with CTS's standard XM Satellite Radio.* It offers the largest playlist and the most commercial-free music on the planet — broadcast coast to coast.* Genres range from decades to dance, rock to rap, and country to classical — all with digital-quality sound. There's also news, talk, comedy and sports channels — including more than 1000 NHL games. No wonder more than seven million people subscribe to XM Satellite Radio. Ask your dealer for more information.

Information is power. Entertainment is joy. The new CTS delivers both, with some of the most up-to-the-minute electronics technology available. XM Satellite Radio™,* with its digital-quality sound and commercial-free music programming and an eight-speaker Bose® sound system. Options include a superb Bose 5.1 Cabin Surround® sound system and an advanced DVD navigation system complete with a telescoping touch screen.** Both optional audio systems include a 40 gigabyte hard drive device that enables a host of functions, including pausing and rewinding live radio and importing songs from CDs. Both are also designed for full iPod® integration and you can even use the steering wheel-mounted switches to advance music tracks.

*Includes three trial months beyond which service fees apply. Available in 10 Canadian provinces and 48 contiguous United States.

**At time of printing, detailed map coverage is available for most major urban areas of the United States and for certain metropolitan areas of Canada (Vancouver, Calgary, Edmonton, Winnipeg, Windsor, London, Toronto, Ottawa, Montreal, Quebec City and Halifax). Coverage is significantly limited outside these areas.

The CTS audio system was created in consultation with a host of industry experts, including the engineers behind the iPod.

A STROKE OF BRILLIANCE AMBIENT

CTS

The welcoming atmosphere of the CTS cabin is the direct result of extraordinary attention to detail. Case in point: the ambient lighting system included with the available Sight and Sound Package. It includes clean, white LED spot lights and fibre-optic light pipes strategically positioned throughout the interior. The result is soft backlighting of areas like the footwells, door pulls and instrument panel, for a premium look reminiscent of the recessed indirect lighting found in modern luxury homes.

POWER THAT NEVER TAKES A BACK SEAT PERFORMANCE

CTS

With a highly refined DOHC V6 engine generating 263 horsepower, the 2008 CTS puts more standard power at your disposal than the BMW 3-Series and 5-Series, the Mercedes C-Class and E-Class and the Audi A4 and A6.* Yet for CTS, that's just the beginning. There's also an available 304 horsepower V6 that features Cadillac's first-ever use of direct fuel injection, a leading-edge technology that enhances power, fuel efficiency and emissions performance simultaneously. Both of these sophisticated engines are paired with your choice of a standard six-speed manual or an available six-speed automatic transmission with Driver Shift Control.

*Based on 2008 Model Year data and the latest published competitive information available at time of printing. Excludes other GM vehicles.

The 2008 CTS's agile handling and excellent performance were inspired in part by Cadillac's successful CTS-V race car.

The 304 hp direct injection V6 features such a high compression ratio – 11.4:1 – that the pistons are dimpled to ensure adequate valve clearance.

Standard on both CTS engines Variable Valve Timing (VVT) adjusts valve opening and closing times as engine speeds change, helping to optimize efficiency.

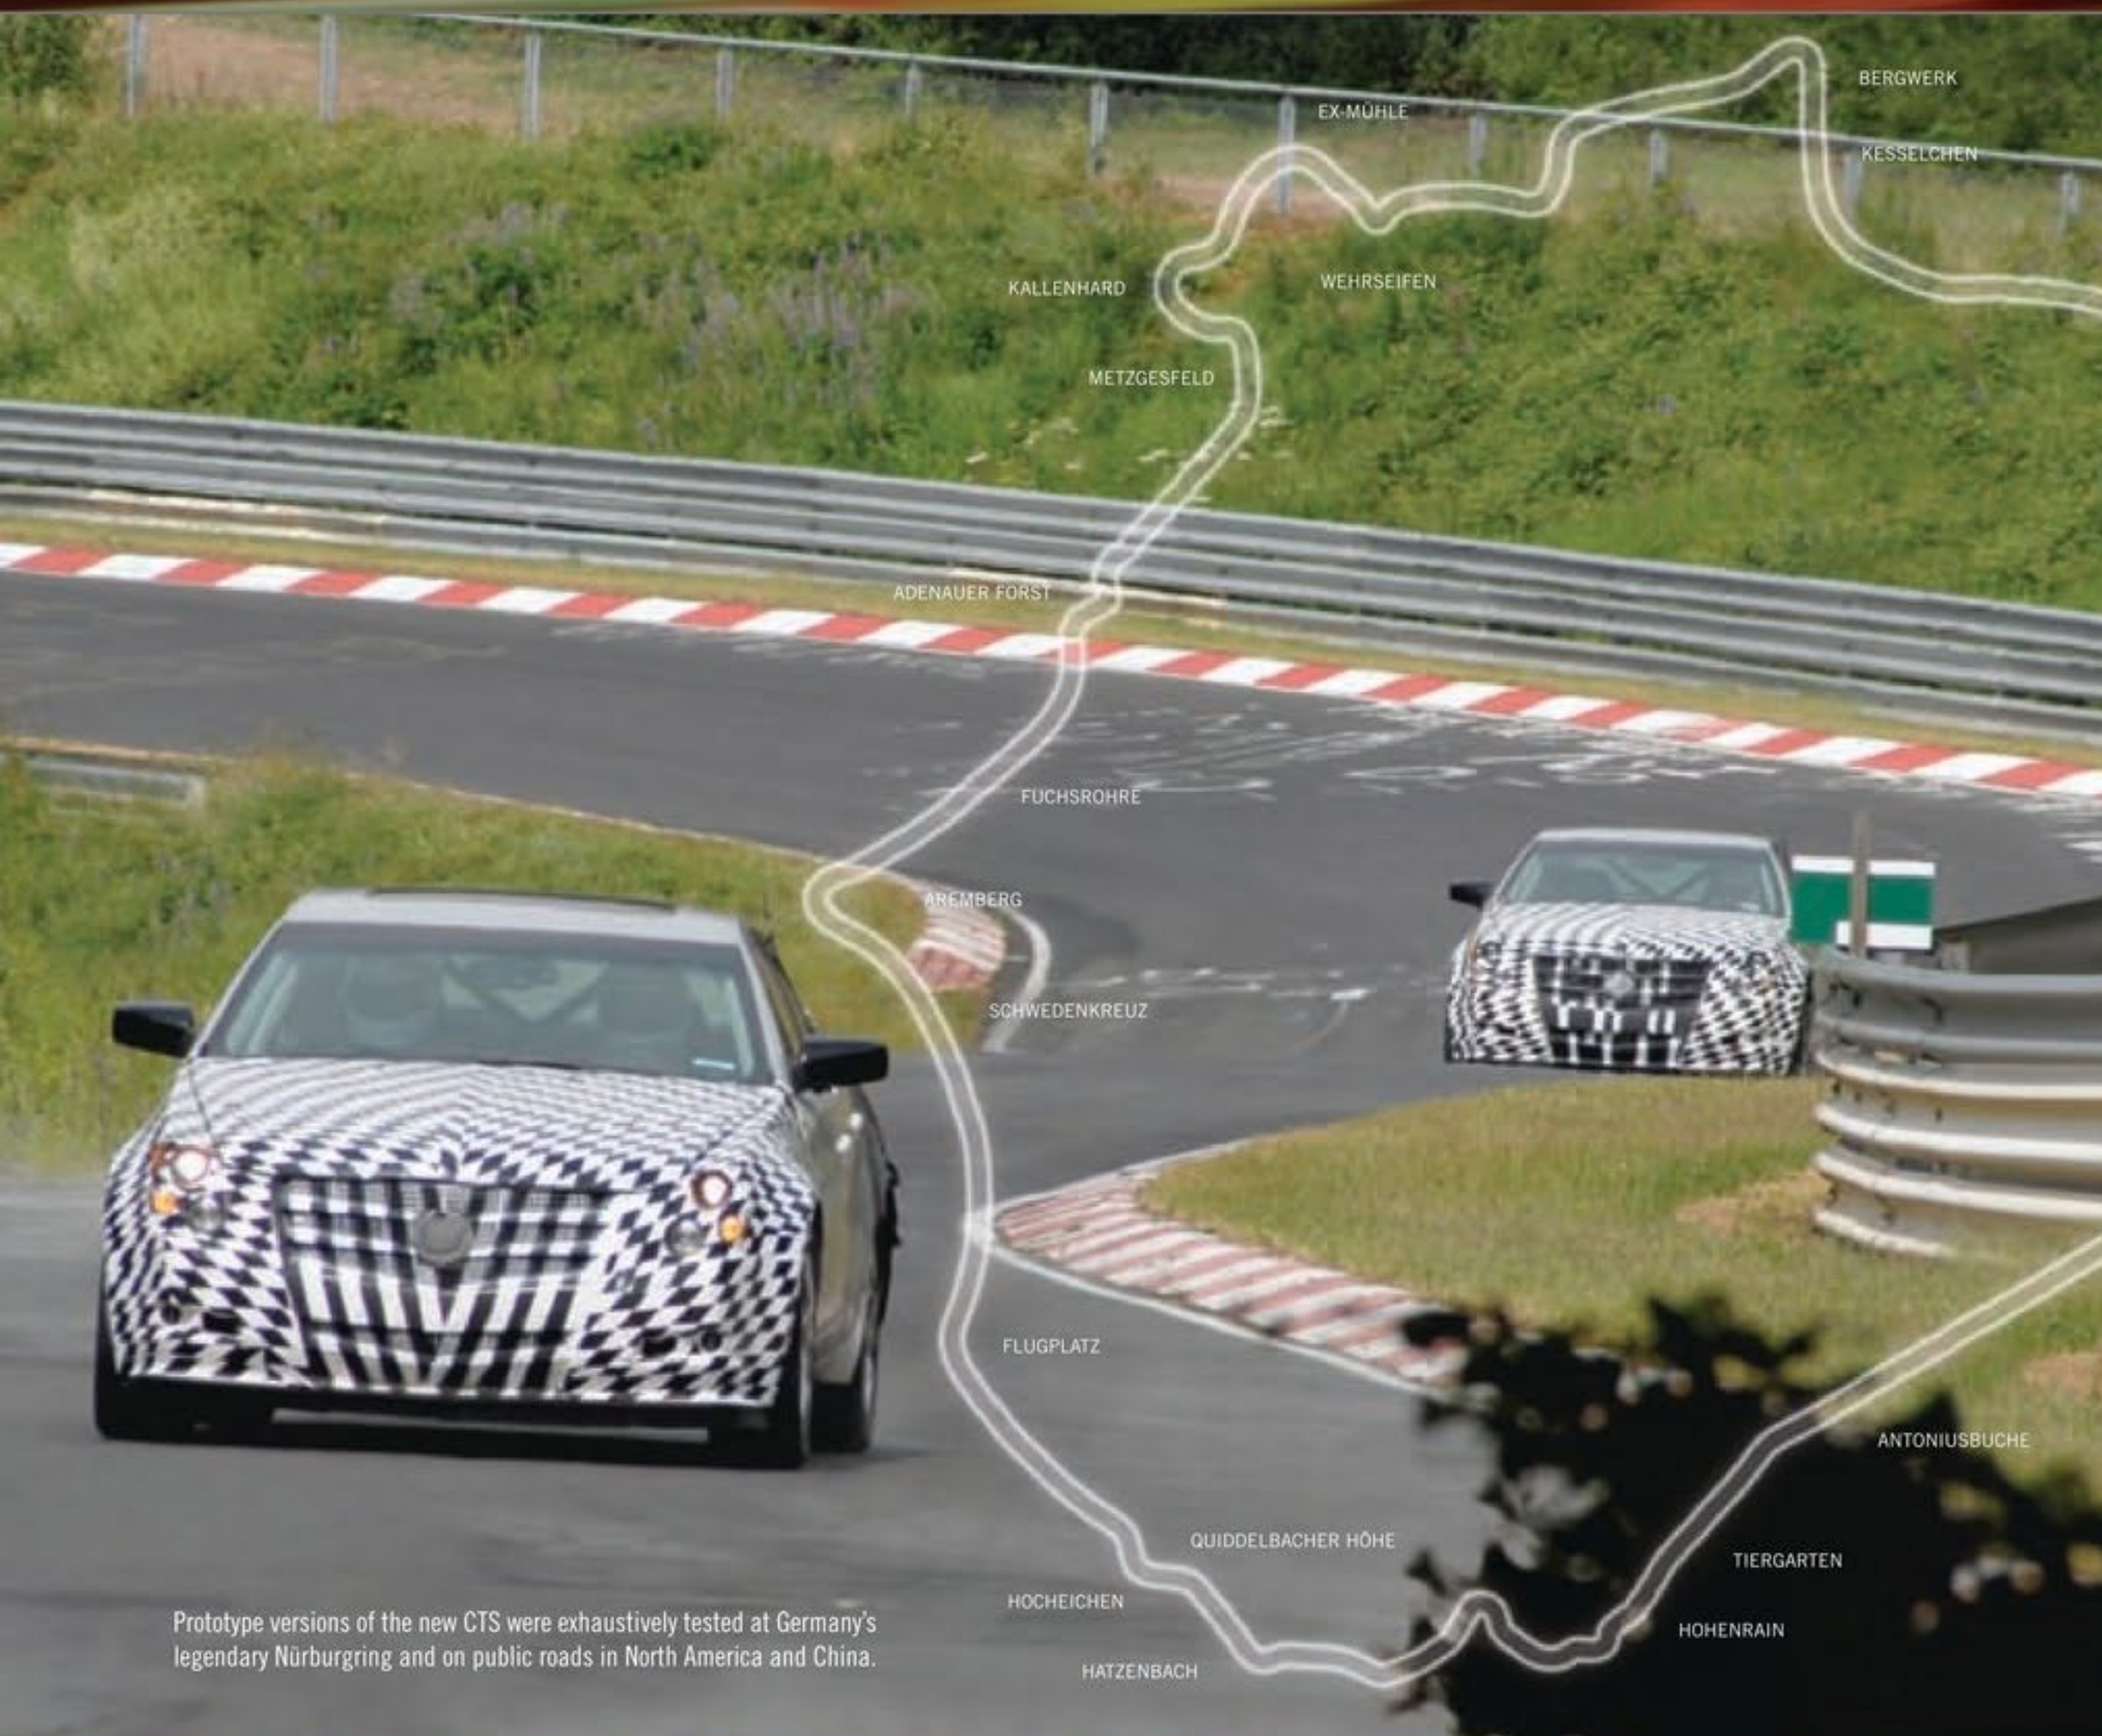

For outstanding engine protection even in severe conditions, both CTS engines are factory-filled with Mobil1® featuring SuperSyn Technology™.

In addition to Driver Shift Control, CTS's precision-engineered 6-speed automatic transmission includes such advanced features as grade braking and Performance Algorithm Shifting, which automatically adjusts shift patterns whenever it detects that spirited driving is underway.

CTS

IT CAN HANDLE IT
BALANCE

Prototype versions of the new CTS were exhaustively tested at Germany's legendary Nürburgring and on public roads in North America and China.

The 2008 CTS offers a choice of 3 suspension tuning levels:

- The standard suspension offers a comfortable ride and agile handling.
- The FE2 Sport Suspension emphasizes handling responsiveness.
- The FE3 Performance Handling Suspension offers the ultimate in agility and body control.

Responsiveness. Steering feel. Body control. High-speed stability. These are the things that great handling is made of. How do you achieve them? First, engineer a solid body structure. Then select premium chassis components, like a short/long arm front suspension, a multi-link rear suspension, StabiliTrak™ and Michelin Pilot and Pilot Sport tires. Then the real work begins, testing and tuning and retesting and retuning on roads and racetracks around the world. If your engineers are extremely skillful – as the Cadillac team assuredly is – the result is a car that meets the highest driving standards in the world. A car, in fact, like the new CTS. When you drive it, you get it.

When traction is compromised, CTS's AWD transfer case adjusts torque distribution within a fraction of a second to help make the most of the available power.

DIVIDE AND CONQUER
AWD CTS

With most cars, engine power is sent to just two wheels. Unless you happen to lose traction, that is, in which case all the power goes to just a single wheel – the one without any grip. The 2008 CTS offers a better solution. With the available All-Wheel-Drive (AWD) system – the first ever on a CTS – engine torque is divided 25/75 between the front and rear wheels under normal driving conditions. And when grip is in short supply, CTS's AWD alters the division of power as necessary to send the most torque to the wheels with the best traction. The result is a feeling akin to riding on rails. Winter will never know what hit it.

CTS

ENGINEERED FOR EVASIVE ACTION AVOIDANCE

WITH STABILITRAK

WITHOUT STABILITRAK

StabiliTrak constantly monitors for lateral skids, then adjusts individual brake pressure automatically, to help restore steering control.

Because there's no such thing as a good collision, the new CTS has been carefully designed to help you keep out of harm's way. Great visibility and ergonomically positioned controls are part of the story, as are responsive handling and the stopping power of four-wheel disc brakes with ABS. Every CTS also comes with a StabiliTrak electronic stability control system that can help correct most lateral skids before you even know they've started. There's even a standard tire pressure monitoring system that can alert you via the Driver Information Centre if one of your tires is low on air.

The available adaptive lighting system helps you see around corners by steering the headlights in the direction you turn the wheel.

VIGILANCE THAT NEVER QUILTS PROTECTION

CTS

In the event of a collision, as in every other situation, the 2008 CTS is designed to perform to the highest standards. Front and rear crush zones, safety cage construction and a strategic use of high-strength steel in the body structure all help to keep dangerous energy away from the passenger compartment. CTS also features six standard air bags, along with front-seat safety belt pre-tensioners that pull the belts snug the instant a crash is detected, for improved protection. Your CTS will even continue looking after you when the collision is over. If the air bags have deployed, a message is automatically sent to OnStar® personnel* who can dispatch emergency services as required.

CTS is equipped with six air bags, including roof-mounted head curtain air bags that protect both front and rear occupants. The frontal air bags are dual-depth units that automatically adjust their deployment based on crash severity, seat position and other factors.

With OnStar and one year of the Directions & Connections Plan including Turn-by-Turn Navigation**, CTS links you directly to the world's most comprehensive in-vehicle security, communications and diagnostics system.*

*OnStar services require vehicle electrical system (including battery), wireless service, and GPS satellite signals to be available and operating for features to function properly. OnStar acts as a link to existing emergency service providers. OnStar Hands-Free Calling requires a Hands-Free enabled vehicle, prepaid minutes or enrollment in a shared minutes plan and existing OnStar service contract. Subscription Service Agreement required.

**Turn-by-Turn availability impacted by some geographic/cellular limitations, advisor-assisted routing available.

CADILLAC OWNER PRIVILEGES

By choosing to drive a new 2008 CTS, you automatically enter a world of elite owner privileges, thanks to a host of programs that will enhance your safety and convenience and reduce your overall cost of ownership. For the first 4 years or 80,000 km of ownership*, Cadillac No-Charge Scheduled Maintenance will cover all regularly scheduled maintenance required by your CTS. During the same period, the Cadillac Limited Warranty will cover all parts and labour costs* that may be incurred to correct defects in material or workmanship. You are also covered by GM's Powertrain Limited Warranty, which is in effect for the first 5 years or 160,000 km of ownership.** While the Powertrain Limited Warranty is in effect, you enjoy the support of Cadillac Roadside Service* throughout Canada and the United States should you require towing, fuel delivery, a jump start or help with a flat tire or lock-out situation. In addition, Alternative Transportation* provides you with shuttle transportation for daily service and an alternate car (or reimbursement for rental or other transportation expenses) for overnight service, whenever your CTS requires scheduled maintenance or repairs covered under the Cadillac Limited Warranty. Other Cadillac owner privileges include Trip Planning* assistance and Trip Interruption Protection,* and you may be reimbursed by General Motors of Canada for reasonable hotel, meal and alternative transportation expenses incurred should your trip be interrupted by a repair covered under the Cadillac Limited Warranty. See your Cadillac dealer for complete details on all Cadillac Owner Privileges.

*Program in effect for the first 4 years or 80,000 km (whichever comes first) of ownership. Conditions and limitations apply.

**Whichever comes first, conditions and limitations apply.

ACQUISITION OPTIONS

In addition to the many exclusive privileges of Cadillac ownership, Cadillac and General Motors of Canada have created a range of supplementary support programs to enhance your ownership experience. Some of these programs assist you in purchasing or leasing the Cadillac of your choice. Others help protect you and your new Cadillac over the long term.

Purchasing & Leasing:

- **GMAC Express Credit Application** – a convenient way to get pre-approved credit towards the purchase or lease of your next GM vehicle
- **GMAC Purchase Financing** – on-the-spot financing at your GM dealership†
- **GMAC SMARTLEASE®** – a smart alternative to traditional financing†
- **GMAC SMARTWEAR™** – worry-free leasing protecting you against unexpected excess wear costs. Must be purchased when signing a GMAC SMARTLEASE agreement††
- **The GM Card** – eligible cardholders may be able to redeem up to \$3500 in GM Card® Earnings toward the total purchase price or lease down payment on selected vehicles.†† For more information on The GM Card please call 1-800-461-3279.

Additional Ownership Programs:

- **GM Protection Plan (GMPP)** – the only extended service plan backed by the resources and commitment of General Motors, GMPP may be purchased at the time of your sale or lease, or subsequently during the Cadillac Limited Warranty period.††

†Subject to eligibility. ††Conditions and limitations apply.

Information Resources:

You can obtain more information about Cadillac vehicles and programs from your Cadillac dealer, or at these information centres:

- The GM website at gm.ca
- The Cadillac Contact Centre at 1-888-446-2000 or (1-800-263-3830 for TDD users)
- For more information about GMAC visit gmac.ca or call 1-800-616-4622.

A word about this brochure

Some of the equipment shown or described throughout this brochure may be available at extra cost. We have tried to make this brochure comprehensive and factual. We reserve the right, however, to make changes at any time, without notice, in prices, colours, materials, equipment, specifications, models and availability. Specifications, dimensions, measurements, ratings and other numbers in this brochure and other printed materials provided at the dealership or affixed to vehicles are approximates based upon design and engineering drawings and prototypes and laboratory tests. Your vehicle may differ due to variations in manufacture and equipment. Since some information may have been adapted since the time of the printing, please check with your Cadillac dealer for complete details. General Motors of Canada Limited reserves the right to lengthen or shorten the model year for any product, for any reason, or to start and end model years at different times.

A word about assembly

Cadillac vehicles are equipped with engines and components produced and assembled by different operating units of General Motors, its subsidiaries and suppliers and these engines and components may change or be obtained from different sources from time to time. All such engines and components are approved for use in Cadillac vehicles. Certain equipment ordered may be unavailable at the time of assembly and we suggest that you verify that your vehicle includes the equipment you ordered, or if there are changes, that they are acceptable to you.

A word about corrosion

Cadillacs are designed and built to resist corrosion. All body sheet metal components are warranted against rust-through corrosion for 6 years. There is no deductible for rust-through repairs. Application of additional rust-inhibiting materials is not required under the corrosion coverage and none is recommended.

Trademarks

The marks appearing in this Cadillac CTS brochure including, but not limited to: General Motors, GM, the GM Canada emblem, the GM Canada website address, Cadillac, the Cadillac badge, Cadillac Owner Privileges, Cadillac Roadside Service, CTS, and their respective logos, emblems, slogans and vehicle model names and body designs; and other marks such as Rainsense, Solar-Ray, StabiliTrak and Twilight Sentinel are trademarks of General Motors Corporation and/or General Motors of Canada Limited, its subsidiaries, affiliates or licensors.

GMAC is a registered trademark of the General Motors Acceptance Corporation of Canada, Limited. SMARTLEASE is a registered trademark and SMARTWEAR is a trademark of GMAC.

OnStar, the OnStar logo and the OnStar button are registered trademarks of the OnStar Corporation.

TheftLock is a registered trademark of Delphi Automotive Systems.

Bose and Cabin Surround are trademarks or registered trademarks of the Bose Corporation.

Radio Data System (RDS) is a registered trademark of the U.S. National Association of Broadcasters.

The XM name and related logos are registered trademarks of XM Canada, Canadian Satellite Radio, Inc.

iPod is a trademark of Apple Computer Inc. registered in the U.S. and in other countries.

Mobil1 and SuperSyn Technology are registered trademarks of Exxon Mobil Corporation.

Canada 

TAKING ACTION TODAY. FOR TOMORROW.

At General Motors, our commitment to environmentally friendly transportation starts right at the top:

"What we do at General Motors profoundly affects the lives of many people. As the world's largest maker of cars and trucks, we realize our impact extends beyond those who drive our vehicles, who work here and who live in our communities. We also know that our actions today can positively affect the lives of future generations. It's a huge responsibility, but also a great opportunity. And that's why corporate responsibility is an integral part of everything we do at GM."

We're determined to be part of the solution to the environmental issues that we as a global community are facing. To that end, GM is investing billions of dollars in a broad-based advanced technology strategy to help reduce the world's dependency on oil. This includes everything from biofuels like E85 ethanol, to plug-in hybrids, to electrically driven vehicles powered by advanced batteries and hydrogen fuel cells. We've also made steady and significant progress over the past five years to reduce our own energy use, conserve natural resources and decrease greenhouse gas emissions from GM products and facilities."

Rick Wagoner

Chairman and Chief Executive Officer, General Motors
