

2009 Nissan 370Z™ Coupe

NOTHING ELSE FEELS LIKE A Z.®

The redline rush of a 332-hp 3.7-L V6 with Variable Valve Event and Lift (VVEL) technology

The satisfaction of one of the greatest performance values in the world

The smoothness of the world's first SynchroRev Match manual transmission

The aggressiveness of an automatic transmission with a variety of driver-selectable modes

The balance of zero-lift aerodynamics and a 50/50 dynamic weight distribution

The rigid feel of lighter overall weight with additional chassis reinforcements

The quick response of a lower center of gravity and a shorter wheelbase

The intuitive control of a driver-focused interior with multi-layer design

The intelligence of voice-activated navigation with real-time traffic alerts¹

The versatility of a 9.3 GB Music Box™ audio system with room for up to 2,900 songs

¹Never program while driving. GPS mapping may not be detailed in all areas or reflect current road regulations.

**THE ALL-NEW NISSAN Z.
NEARLY 40 YEARS OF DEDICATION TO
A SINGLE, ADRENALINE-FUELED GOAL.**

Nissan 370Z shown in Chicane Yellow with Sport Package.

**THE PURE RUSH OF 332
LEGENDARY VQ HORSEPOWER.**

> **THE MOST POWERFUL Z® EVER** The legend continues in the 370Z™ with the 4th-generation VQ. Now increased to 3.7 L for massive power, this 332-hp VQ engine features advanced Variable Valve Event and Lift (VVEL) technology that continuously tunes valve lift and timing for quicker response and a broader torque curve, while optimizing fuel economy and reducing emissions. And while this extensive engineering may sound intriguing on paper, the exhilaration from idle to the 7,500 rpm redline – on the straights or through the corners – is pure magic.

> **LIGHTWEIGHT COMPONENTS** If you want a true indication of a vehicle's performance, look no further than its power-to-weight ratio. So along with the added power of the 3.7-L VQ V6, Nissan scrutinized every ounce of the all-new 370Z™. Weight was reduced from areas you might expect – changing the rear hatch and doors to ultra-strong lightweight aluminum – as well as in areas you might not – 3.5 lbs. were shaved from the audio system. High-tech materials include a carbon-fiber composite driveshaft that is not only incredibly strong, but also helps the engine rev more quickly, as well as a weight-saving carbon-fiber composite radiator support structure. More power. Less weight. Quicker acceleration and agile response. Truly a win-win situation.

THE THRILL OF A PERFECTLY MATCHED DOWNSHIFT.

6MT designed for perfectionists

WORLD'S FIRST REV-MATCHING MANUAL TRANSMISSION In the past, smoothly downshifting required a delicate balancing act of matching the engine's rpm and letting out the clutch – fine for the racetrack, but difficult to execute on the street. With SynchroRev Match technology – included in the Sport Package – a seamless downshift is in the palm of your hand. By smoothing the transitions between shifts, the chassis stays more balanced, especially important when tackling an exhilarating corner – making this one transmission that's as much about handling as it is about power.

7AT designed for enthusiasts

EVERYTHING GREAT ABOUT A MANUAL – EXCEPT THE CLUTCH PEDAL. Take the traffic-beating convenience of an automatic, factor in the power and flexibility of a manual, and you've got the all-new 370Z's 7-speed automatic transmission. 7 speeds give you a wide spread of gearing for heart-pounding acceleration, while still providing improved fuel efficiency and quiet, high-speed cruising. With a choice of driver-selectable modes, you can custom-tailor your driving experience like never before. And with Downshift Rev Matching, you've got the kind of ultra-quick, seamless downshifts that no manual transmission can match. Except of course, the 370Z's SynchroRev Match 6-speed manual.

> **SYNCHROREV MATCH EXPLAINED** This groundbreaking technology monitors the 6-speed manual's clutch pedal operation, shift lever movement and vehicle speed. As you shift to a lower gear, the system will "blip" the throttle to the ideal engine rpm for a supremely smooth downshift as you let out the clutch. The system also works when upshifting to give you a smooth flow of power when accelerating. If you want to marvel at modern technology, feel the difference for yourself by turning the system off with a switch mounted next to the shift lever.

> **DRIVER-SELECTABLE MODES** Choose Automatic Mode for smooth, quick shifts. For momentary manual operation – for example to downshift to pass traffic – lightweight magnesium paddle shifters mounted on the steering column give you fingertip control. In Manual Mode, you get manual-style control with exceptionally quick shifts with a nudge of the shift lever or a pull of the paddle shifters. The transmission can even hold a gear in cornering for better balance, or downshift for more effective braking. And when a downshift is needed, Downshift Rev Matching automatically opens the throttle to match the rpm for smoother gear changes.

CONNECTED ON EVERY LEVEL.

You see fine stitching and quality materials creating one of the best-looking interiors ever put into a sports car. But to a Nissan engineer, it also looks like one of the smartest. Nissan's innovative three-layer design groups items by how the driver uses them, so you'll feel completely connected the instant you settle in behind the wheel. No detail is left unnoticed, from the iconic driver-angled triple gauges above the center console to a special kidney-shaped steering wheel rim designed from exhaustive studies of how a driver's hands grip the wheel.

INFORMATION LAYER //

Windshield pillar minimized to improve outward vision in corners
Oval steering wheel opening for enhanced viewing of large gauges
Gauges adjust with steering column, so view is optimized

OPERATION LAYER //

Illuminated Push Button Ignition
Center console controls grouped for easy operation
Steering column-mounted paddle shifters on 7-speed automatic

HOLDING LAYER ///

Uniquely bolstered driver's seat for enhanced support
Integrated knee pads on both sides of center console
Anti-slip material on seat cushions

A SUPERBLY BALANCED CHASSIS
THAT LOVES TO BE THROWN A CURVE.

Nissan 370Z Touring shown in Monterey Blue with Sport Package.

A WICKED LITTLE G-FORCE-INDUCED GRIN.

Designed to conquer every corner – even the corners of your mouth. The all-new 370Z™ starts with a lower center of gravity and a shorter wheelbase for quicker response. Structural supports under the hood and along the body reinforce the chassis to handle the loads the suspension can dish out. Add in an enthusiast's wish list of high-performance componentry. And at every turn of the wheel, find pure joy as the 370Z™ turns handling science into pure performance art.

W-rated high-performance tires

Aluminum suspension components

14" Front brake rotors

19" Forged alloy wheels

> **53:47 WEIGHT DISTRIBUTION** For many, a static 50/50 balance is considered the perfect weight distribution for handling. But Nissan engineers realized that a 53 front/47 rear static ratio is actually ideal. Entering a corner, heavy braking sends the weight forward, improving traction of the front tires and adding steering control. At the precise moment the driver accelerates out of the apex, the weight distribution shifts rearward and becomes an approximate 50/50 balance. This translates into enhanced tire contact for better acceleration, improved directional stability, quicker turns – and a handling feel that's uniquely Z®.

> **VEHICLE DYNAMIC CONTROL** A great sports car shouldn't just exhilarate, it should also inspire confidence. The 370Z's Vehicle Dynamic Control (VDC) continuously monitors the speed of each wheel, steering angle, yaw, lateral G-forces, and even braking pressure. It compares the data of the actual vehicle motion and, if it senses the onset of plowing (understeer) or fishtailing (oversteer), VDC brakes individual wheels and/or reduces engine power to help keep you on your steered course.¹

> **LIGHTWEIGHT SUSPENSION** The lighter a suspension's components – called unsprung weight by engineers – the more quickly it can react to the driver and bumps in the road. Increased use of strong yet lightweight aluminum in the Z's front suspension makes it extremely responsive. Its 4-link rear suspension helps to keep the tires vertical to maximize contact patch, and allows the shocks to be separated from the springs, to reduce friction and improve performance. For even quicker response, the available 19" forged alloy wheels² are nearly 20% lighter than those on the previous Z®.

> **4-PISTON BRAKE CALIPERS ON 14" FRONT ROTORS** Balance doesn't just apply to cornering – the more power you have, the better braking you need. To handle the most powerful Z® ever are the largest brakes ever offered on a Z® – available 14" front rotors with the gripping power of 4-piston front calipers². Purpose-designed ducting helps to reduce fade and provide predictable and precise stopping power.

¹VDC cannot prevent accidents due to abrupt steering, carelessness, or dangerous driving techniques. Always drive safely. ²Included in the Sport Package.

Nissan 370Z Touring shown with Navigation Package.

NAVIGATION

with real-time traffic reports

KNOWLEDGE IS POWER Spot traffic miles ahead and avoid it with the available touch-screen voice-activated Nissan Hard Drive Navigation System.¹ Its advanced XM NavTraffic² feature displays color-coded, real-time traffic advisories to help you steer clear of the gridlock. If the road you want to take is red, the navigation system can help you find an alternate route. Orange signifies some slowing, and green means the road is clear. With a clear road comes great peace of mind. Navigate through congested areas easier. In certain cities, the navigation system will even show surrounding buildings in their accurate shape and height perspective. Lane Guidance not only shows you where to turn, it also directs you to the appropriate turn lane.

¹Never program while driving. GPS mapping may not be detailed in all areas or reflect current road regulations. ²Required XM radio and XM NavTraffic monthly subscriptions sold separately after three-month trial period. Installation costs and other fees and taxes may apply, including a one-time activation fee. XM NavTraffic only available in select markets. Subscription fee is consumer only. All fees and programming subject to change. Subscriptions subject to Customer Agreement available at xmradio.com. XM service only available in the 48 contiguous United States and Canada. The XM name and XM NavTraffic are registered trademarks of XM Satellite Radio Inc. ©2008 XM-Satellite Radio Inc. All rights reserved. All other trademarks are the property of their respective owners. ³Driving is serious business and requires your full attention. Do not operate any devices con-

TECHNOLOGY THAT LOVES TO PLAY IN TRAFFIC.

BOSE® AUDIO SYSTEM Because even the most dedicated enthusiast might want to listen to something other than its spine-tingling dual-exhaust note, the 370Z™ features an available Bose® audio system that is custom-engineered for the unique shape of the Z's interior. And since it's also capable of playing MP3/WMA CDs, you can have the perfect soundtrack for any driving adventure.

> **iPod® INTEGRATION** Plug your iPod® into the available interface system and you can control its functions through the audio system or touch-screen monitor, plus get playlist-style readouts on the digital display.^{3,4}

> **MUSIC BOX™** With this available system, you can download up to 2,900 of your songs on its 9.3 GB hard drive and keep your CDs back at home. It also organizes your collection by mood, artist and song title for easy access and endless entertainment. For even more choices, the system offers the capability of playing MP3s from a CompactFlash® card.

> **BLUETOOTH®** Both hands on the wheel means no hands on the cell phone. The available Bluetooth® Hands-free Phone System has a voice-recognition feature that allows you to make and receive calls through the stereo speaker system.⁵

NISSAN INTELLIGENT KEY™ with Push Button Ignition

TOUCH AND GO Never take your keys out of your pocket or briefcase again. Nissan Intelligent Key is so intuitive, it senses your approach to the car and allows you to unlock the door by just tapping a button on the handle. Once inside, start the engine without ever putting a key in the ignition.

ected to the auxiliary audio input jack while driving. ⁴Always give your full attention to driving. Avoid operating your iPod in such a way that you can be distracted during vehicle operation. ⁵Availability of specific features is dependent upon the phone's Bluetooth® support. Please refer to your phone owner's manual for details. Cell phone not included. The Bluetooth word mark and logos are owned by Bluetooth SIG, Inc., and any use of such marks by Nissan is under license. ⁶Bose is a registered trademark of The Bose Corporation. ⁷CompactFlash is a registered trademark of SanDisk Corporation. ⁸iPod is a registered trademark of Apple, Inc. All rights reserved. iPod not included.

DESIGNED FOR THE REAL WORLD.

> **HIGH-PERFORMANCE PROTECTION** The Nissan Advanced Air Bag System includes dual-stage supplemental front air bags equipped with seat belt sensors and an occupant-classification sensor. These dual-stage air bags adjust their inflation rate, depending on the severity of impact and seat belt use. If the passenger seat is empty, a sensor actually deactivates that air bag. In addition, standard side-impact supplemental air bags are built into the seats, so they move with you as you adjust your seat. Standard roof-mounted curtain side-impact supplemental air bags help protect you and your passenger from above.¹

6 STANDARD AIR BAGS

> **CARGO AREA** Plenty of open space for the important things in life – like golf clubs. An available retractable cargo cover helps keep things out of sight.

> **CLEVER STORAGE** Built-in storage means everything has a place. A hidden compartment located behind the passenger's seat helps conceal valuables.

> **ACTIVE HEAD RESTRAINTS** help reduce the chance of whiplash injuries by moving up and forward during certain rear-end collisions.

> **SEAT BELT TECHNOLOGIES** utilize pretensioners to help tighten the belt when front air bags deploy. And if your body puts too much force on the belt, load limiters give a bit.

¹Air bags are only a supplemental restraint system. Always wear your seat belt. Do not use rear-facing child restraints in this vehicle. All children 12 and under should be properly secured in child restraints, booster seats, or seat belts according to their size. Air bags will only inflate in certain accidents. See your owner's manual for details. Inflated air bags shown for illustration purposes only. Actual air bags deflate after deployment. Cargo shown for display purposes only. Nissan recommends that all loose items be secured when transported. Cargo and load capacity limited by weight and distribution.

WANT? NEED? SAME DIFFERENCE.

Specifications

Engine	370Z™	370Z™ TOURING
VQ37VHR – 3.7-liter DOHC 24-valve V6 aluminum-alloy engine¹		
—Horsepower – 332 hp @ 7,000 rpm		
—Torque – 270 lb-ft @ 5,200 rpm		
—Bore and stroke – 95.5 x 86.0

From the moment you first think about a Nissan to the time you actually drive off the lot and long beyond, we want every experience to be special. Passionate. Exhilarating. Like the vehicles we design and build. After all, what’s excitement without commitment?

When you’re ready to buy or lease, **Signature Financing** offers financing options, attractive rates and flexible terms to make your decision easier and help make your purchase more accessible. Once you drive your Nissan home, it’s protected with New Vehicle Limited Warranties, including a 3-year/36,000-mile “bumper to bumper” basic coverage and a 5-year/60,000-mile powertrain coverage. Want additional peace of mind? Consider **Security+Plus**® our extended service contract. A variety of plans lets you tailor the coverage to your driving habits. **Maintenance+Plus**®, on the other hand, ensures your vehicle will receive up to 17 different services and over 33 different inspection items at each visit, using the most up-to-date diagnostic equipment available. Finally, demand **Genuine Nissan Parts**. When it comes time for service, any necessary replacement parts will be made using Genuine Nissan new or remanufactured parts, or Nissan-approved parts. And they’re the only parts to carry Nissan’s factory-backed limited warranty.

Nissan's philosophy toward the environment, "Seeking a symbiosis of people, vehicles and nature", describes our ideal for a sustainable mobile society, now and in the future. We launched the Nissan Green Program with specific objectives to realize this goal, and we are pursuing it energetically. For more information, log on to NissanUSA.com/green

At NissanUSA.com, you'll find virtual product demonstrations, a way to "build your own Nissan," a dealer locator, and more information about key Nissan support services. Or if you'd prefer, call **1-800-NISSAN-3** for answers to specific questions about 370Z™ or any other Nissan vehicle.
