

2026 BUYER'S GUIDE

Our latest spin on mobility. With automotive innovations that span over a century, FIAT® is best known around the globe for the FIAT 500. Introduced in 1957, this original city car has retained its unmistakable charisma in every version of itself, including the latest all-electric 500e. Slightly larger, highly efficient and technologically savvy, the FIAT 500e confidently glides into the model's main role: exquisitely bringing mobility to the masses.

The FIAT® 500e generates confidence with extensive range and charging features. Its 42-kWh battery will take you up to 149 miles* on a single charge. A versatile, Smart Charging Port enables AC home charging,² as well as public AC and DC fast charging, the latter delivering a 0 – 80 percent charge in as little as 35 minutes.³ Additionally, recent-year FIAT 500e models are now compatible with the North American Charging Standard (NACS), allowing fast charges with Tesla V3 and V4 Superchargers through an available adapter. Three-color LED feedback lights give you the charging status at a glance.
