# WHAT'S NEW ON THE FRONTIER?

Let's first cover some old ground. Frontier™ is the seventh-generation Nissan truck and the third generation built in the U.S. at our plant in Smyrna, Tennessee. And like its ancestors, the new 1998 Frontier is built not just to haul, but for the long haul. Frontier has also taken the short road straight to the head of its class with its class-leading standard towing and bed depth\* as well as **best-in-class standard horsepower\*** on the 4x2. Frontier's new 2.4-liter DOHC engine gives you enough power to reach the campsite or carry cargo until the cows come home. And with its proven **4x4 abilities**, you'll make it to just about any destination whether the terrain is steep, soggy or just plain slippery.

Frontier's **longer, wider exterior** has been redesigned to set a tone of overall toughness with solid curves and a brawny front end. Yet Frontier feels more refined and spacious inside. The relaxed comfort you'll feel in the cabin is the perfect match for Frontier's smooth, quiet ride. And for your peace of mind, this is the first Nissan truck to offer the safety of dual air bags, including a key-type shut-off switch for the passenger air bag.\*\* Ultimately, the Frontier has everything you expect from a legendary Nissan truck: **toughness, dependability, quality and safety.** But we also managed to set the legend on its ear, with a dash of sophistication and a healthy shot of fun.

\* Compact pickup class.

\*\* Air bags are a supplemental restraint system. You must always use seat belts and child restraints properly, as explained in your owner's manual. See your owner's manual for the proper use of the front-passenger air bag shut-off switch.

# INTERIOR

Even tough guys have a tender side. Similarly, you'll find a **comfortable cabin** full of amenities nestled within Frontier's rugged shape. The supportive contours of the King Cab's **low-fatigue front bucket seats** cradle your body, perhaps weary from a long day at work or play. The spacious **interior is quieter**, thanks to more sound-deadening materials. Air conditioning (XE, SE) keeps you cool and has large, easy-to-use controls, one example of Frontier's **smart design**. Plus, new for 1998, every model has an **LCD odometer** with two trip odometers, as well as at least one cup holder (some models have up to three).

## LISTENING TO TUNES

From bluegrass to ska, all your music will sound great on Frontier's Clarion® stereos. SE models get a 100-watt (max.) AM/FM/CD/cassette stereo with four speakers (optional on XE King Cab\*), while all XE models include a standard AM/FM/cassette stereo.

## FRONTIER'S POWER TOOLS

For greater convenience, Frontier SE comes standard with power windows, mirrors and door locks, not to mention a remote keyless entry and vehicle security system. Or you can include these items on your XE King Cab as part of the optional Power Package.

## WHY GET A KING CAB?

Maybe four of you are going on the hike. You'll need King Cab's fold-down rear jump seats\*. When not in use, they fold flush into Frontier's walls and provide 14.4 cubic feet of storage for groceries or gear. But even when you're traveling solo, King Cab makes sense. In addition to extra cargo room, King Cab models add low-fatigue front bucket seats and a center console armrest with storage and dual cup holders.

\*Rear jump seats are not suitable for child-restraint system usage.  
 ®Clarion is a registered trademark of Clarion Corporation of America.

## ARE YOU SURE IT'S A TRUCK?

**low-fatigue front bucket seats**  
 (KING CAB)

**CENTER CONSOLE ARMREST WITH STORAGE  
 AND DUAL CUP HOLDERS** (KING CAB)

**air conditioning** (XE, SE)

**CRUISE CONTROL** (SE; OPT. ON XE)

**tilt steering column** (SE; OPT. ON XE)

**FLIP-UP GLASS SUNROOF** (SE)

**power windows, mirrors and door  
 locks** (SE; OPT. ON XE KING CAB)

**FOLD-DOWN REAR JUMP SEATS\*** (KING CAB)

**tachometer** (SE; OPT. ON XE)

**LCD ODOMETER WITH TWO TRIP ODOMETERS**

**sliding rear window** (SE; OPT. ON XE)

**AUXILIARY 12-VOLT DC POWER OUTLET**  
 (SE; OPT. ON XE)

# PERFORMANCE

Having the right tool is just as important on the road as it is at the workbench. Frontier's **more powerful 2.4-liter engine** takes advantage of dual overhead cams to put out a potent **143 horsepower**, more than enough to tackle your chores. The powerplant also yields **154 ft-lbs of torque** at 4,000 rpm, most of it coming in the crucial lower rpm range. Yet this engine is quieter, smoother and more efficient, thanks to measures designed to reduce friction and optimize response. Of course, like any good tool, Frontier is versatile. You'll find

that it maneuvers as impressively as it accelerates. Frontier's **retuned front suspension** delivers crisp handling and, because of the softer settings of the springs and shocks, a more carlike ride. An enhanced body-on-frame design also gives Frontier outstanding **body rigidity**, which translates into better handling and less noise. The result is the best ride quality a Nissan truck has ever offered: smooth, composed, solid. But if you need a reminder that you're driving a truck, step on the gas. The torquey response of Frontier's engine will help you remember.

## IMPROVED AUTOMATIC TRANSMISSION

Frontier 4x2's optional automatic transmission has been refined to reduce harsh shift shock and "gear hunting" up steep grades. Perhaps more important, the shifter is now column-mounted, which frees up extra leg room.

## TOWING CAPACITY

If your plans include towing a boat to the lake or a trailer full of dirt bikes to the trail, Frontier has you covered. Its powerful engine and rigid body structure let you tow up to a class-leading\* standard 3,500 lbs. with manual transmission (2,000 lbs. with automatic transmission).

## CARGO BED AND PAYLOAD

It pays to be a deep thinker. That's why Nissan engineers gave Frontier the deepest cargo bed in its class (17.1").\* Deep thinking also shows up in Frontier's new Flexible Loading System, which lets you divide the bed into two horizontal or up to three vertical sections depending on the size and shape of your cargo. And sturdy double-wall construction means that dents and dings inside the bed won't show up on Frontier's exterior. It also means you can handle up to 1,400 lbs. of payload easily.

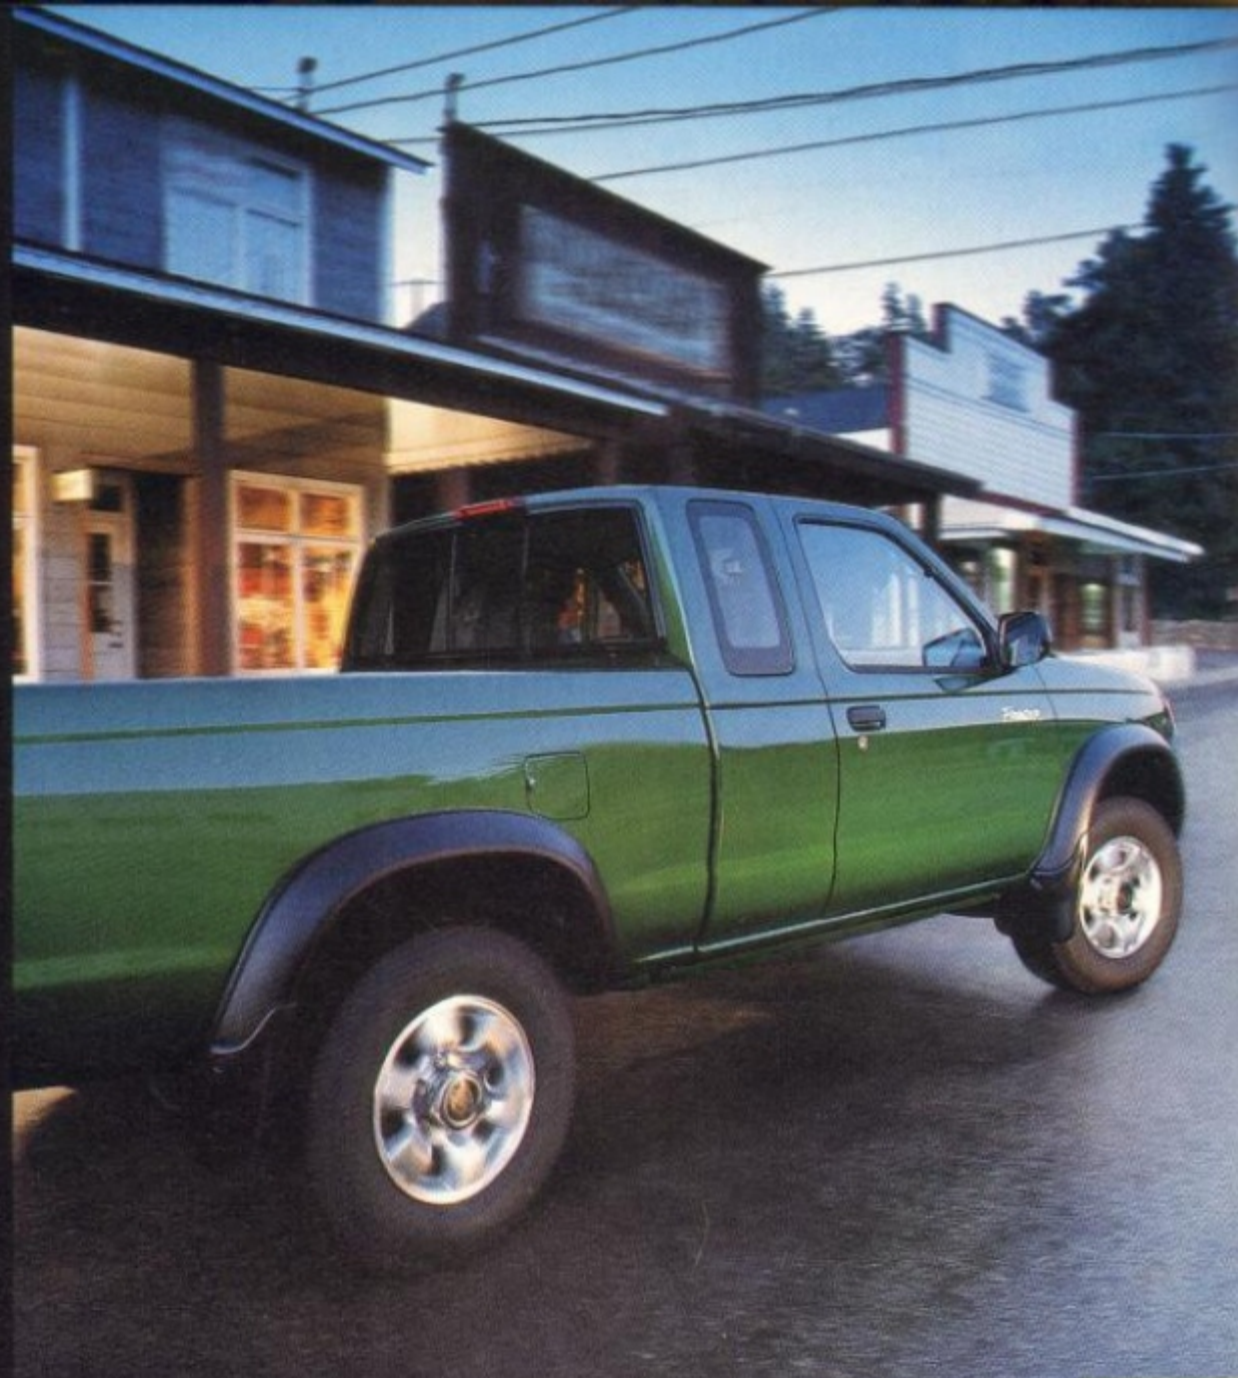

\* Compact pickup class.

No vehicle unlocks more possibilities than a truck, which is why Americans are so attached to them. Since introducing the first compact pickup to America in 1959, Nissan has been fueling this love affair. Like the **1960 1200 Pickup** (above), the 1998 Frontier continues the tradition of durable vehicles that, at different times, act as workhorse, travel companion and limousine for their owners. Most of all, though, we know you rely on your Nissan truck to help get the job done, whatever it may be. Of course, in addition to offering legendary reliability, Nissan trucks have always been a blast to drive; so fun, in fact, our founder fondly called his truck, "my square-backed sports car." Just drive the new Frontier. You'll see what he meant.

# 4x4

2H

4H

## WHEN TO USE 2-WHEEL DRIVE (2H)

Most of the driving you'll do in your Frontier will be in 2-wheel drive. Use it in everyday driving scenarios when there is plenty of road traction. Of course, being in 2-wheel drive provides the best fuel economy as well.

## WHEN TO USE 4-WHEEL DRIVE HIGH (4H)

The 4-wheel-drive system's High mode will come in handy in situations when traction is somewhat limited, such as rain-slicked pavement, smooth dirt roads or certain icy conditions.

## WHEN TO USE 4-WHEEL DRIVE LOW (4L)

4-wheel-drive Low gives you maximal torque at speeds under 30 mph. Use it to climb or descend steep hills and drive in mud or heavy snow where even a slower speed demands great control. But please venture safely into each new place. And see your owner's manual for more information about the proper use of 4WD.

## WHY CHOOSE A 4x4 MODEL?

Maybe that special fishing hole is in a place only you and the fish have seen. Or maybe the directions to the job site simply said, "Turn left at the big, gray boulder." Good thing Frontier's **4-wheel-drive** boasts a 2-speed transfer case, so you can match the effort to the terrain. And Frontier SE's **auto-locking hubs** allow you to roll into 4WD\* without stopping or exiting your vehicle. Every Frontier 4x4 also comes equipped with a 3-channel/4-sensor **4-wheel Anti-lock Braking System (ABS)**. In addition, there's a g-sensor that lets the ABS work in 4-wheel drive. And to take on the rugged places you'll go in your 4x4, **wide mud-and-snow radial tires** are standard. Top it off with **fender flares** and **mud guards**, which enhance Frontier's tough appearance and help protect its finish, and you have a truck that gives you all the options: Whether you want an everyday partner or a hill-tackling ally, Frontier 4x4 has the guts to meet the challenge.

4L

# SAFETY

A fallen tree. A child chasing a ball. On the road, the unexpected could be lying around the next curve. That's why Nissan provides a **long list of safety features**. Frontier's agile handling lets you side-step obstacles and change lanes confidently. **Standard ABS** helps you stop with control, in case the hazard is directly ahead and coming up fast. But when a collision is unavoidable, Frontier comes through with features like a **front crumple zone** and **pipe-style steel side-door guard beams**, which help absorb the energy of an impact, reducing your chance of injury. Because in an uncertain world, it's nice to be sure that Frontier is designed with your safety in mind.

## WHEN SHOULD I USE THE FRONT- PASSENGER AIR BAG SHUT-OFF SWITCH?

Every Frontier is equipped with "Second Generation" dual air bags, which have been designed to inflate with less force.\* But because Frontier does not have appropriate rear seating for a child restraint, we've equipped it with a key switch that lets you deactivate the front-passenger air bag. Use the switch when you secure a child under 20 lbs. in a rear-facing restraint. For additional information on the air bag shut-off switch, child safety and how to properly restrain a child in your Frontier, please see your owner's manual and the "Commitments" section of this brochure (page 16).

### ANTI-LOCK BRAKING SYSTEM (ABS)

Frontier 4x4s now come equipped with Nissan's newest 4-wheel ABS, which has been upgraded to be lighter and quieter with reduced pedal kickback. The system pumps up to 18 times per second to help prevent wheel lockup and maintain steering control while braking. (4x2 models have rear-wheel anti-lock brakes.)

### REMOTE KEYLESS ENTRY/VEHICLE SECURITY SYSTEM

For the first time, a remote keyless entry and vehicle security system is available on a Nissan truck. This feature, standard on SE and part of the optional Power Package on XE King Cab, locks and unlocks the doors, turns on the dome light, activates the security system and even offers a panic alarm. It's a good thing to have when your arms are loaded down with a weekend's worth of gear.

\* Air bags are a supplemental restraint system. You must always use seat belts and child restraints properly, as explained in your owner's manual.

# ACCESSORIES

A. Your favorite tunes will play for hours with this **3-DISC CD AUTOCHANGER**. It combines in-dash convenience with features like random play and high-speed search.

B. These carpeted **FLOOR MATS** can withstand the punishment of your work boots. So even if you spend your days kicking around in the mud, it won't ruin the carpet inside your new Frontier.

C. Designed specifically for your Frontier, this tough vinyl **NOSE MASK** fits snugly and helps protect the finish against dings, bugs and debris.

D. For misty mornings and the twilight of dusk, **FOG LIGHTS** help cut through darkness and low visibility.

E. Think of all the things your Frontier lets you carry. Why should it be punished for that? Help protect the bed area of your Frontier with this **UNDER-RAIL BEDLINER**. An over-rail style is also available.

F. **FENDER FLARES** add a dimension of strength and ruggedness to your Frontier while they help safeguard the cab and rear quarter panels from nicks and scratches.

**ADDITIONAL OPTIONS:** Air Bag Anti-Theft Bolt, Air Conditioning, Air Conditioning Filter, AM/FM/Cassette Stereo, Cellular Phone Docking Station\*, Cigarette Lighter Element, Compact Disc Player, Hood Bug Deflector, Side-Window Deflectors,\*\* Splash Guards, Step Rails, Tailgate Lock, Vehicle Cover with optional Cable Lock, Wheel Locks, Wood Trim (Genuine)

G. A rubber **BED MAT** will help protect the floor of your Frontier's cargo bed from scrapes and dents. You may also choose an envelope-style, mesh **CONVENIENCE NET**, designed to keep groceries and other items upright and in place. And for improved cabin ventilation, a convenient **SLIDING REAR WINDOW** is definitely the way to go.

H. In addition to giving your Standard trim level Frontier a shiny look, this **DELUXE CHROME REAR BUMPER**, built of heavy-gauge steel, can endure the tough tasks you've got planned. For a more rugged finish, a powder-coated **STANDARD BLACK REAR BUMPER** is also available. And in case your plans include towing a trailer, this frame-mounted Class II **RECEIVER TOW HITCH** will do the trick. A **HITCH BALL** (rated up to 3,500 lbs.) and **HARNESS** are available separately to meet your towing needs. Please see your owner's manual and *Nissan Towing Guide* for complete details.

\*For use with most Motorola® MicroTac® cellular phones only. Available late 1997.  
\*\* Available early 1998.

FRONTIER PACKAGES

Frontier XE models are available with three different packages, so you can customize your truck to fit your particular needs and personality. Adding one or all of these packages to your XE enhances its sharp look, raises the bar on comfort and convenience, and makes your Frontier an even better value.

APPEARANCE PACKAGE

- (Available on XE. XE Regular Cab 4x2 requires alloy wheels option.)
- Upgraded AM/FM/cassette 60-watt (max.) audio system with four speakers (XE Regular Cab only)<sup>8</sup>
  - Sliding rear window
  - Body side graphics<sup>9</sup>
  - Tailgate finisher
  - Fender flares (4x2)
  - Passenger-side assist grip (4x2)
  - Alloy wheels (4x4)
  - Tachometer (4x4)

COMFORT PACKAGE

- (Available on XE, requires Appearance Package.)
- Tilt steering
  - Cruise control
  - Variable intermittent wipers
  - Passenger-side visor vanity mirror
  - 12-volt DC power outlet (auxiliary)
  - Low-fuel warning light
  - Rear privacy glass
  - Tachometer (4x2)

POWER PACKAGE

- (Available on XE King Cab, requires Appearance and Comfort Packages.)
- Upgraded AM/FM/CD/cassette 100-watt (max.) audio system with four speakers
  - Power windows
  - Power door locks
  - Dual outside power mirrors
  - Remote keyless entry and vehicle security system

FLEXIBLE LOADING SYSTEM

WHAT IS THE FLEXIBLE LOADING SYSTEM?

Frontier's cargo bed has several ridges and grooves that make it easy to divide the bed into sections. This makes your Frontier's bed as flexible as a good tackle box, with a place for almost everything.

DIVIDING THE BED FOR SIDE-BY-SIDE STORAGE

To divide the cargo bed into three sections lengthwise, cut two pieces of plywood to the width of the bed. Place the pieces between the notches that run perpendicular to the bed's floor (top drawing at right).

DIVIDING THE BED FOR TOP AND BOTTOM STORAGE

Your Frontier's cargo bed also has notches in it that run parallel to the bed's floor. Insert planks into these notches. On top of these supports, rest a sheet of plywood cut to match the length and width of the bed (bottom drawing). The weight is now supported by both the planks and the rear wheel housings. This dual-level storage lets you carry 4-foot-wide sheets of lumber or building materials on top and still have room for other items underneath.

COMMITMENTS

NISSAN WARRANTY\*

Every Nissan offers you the protection of a 3-year/36,000-mile "bumper-to-bumper" limited warranty. And a 5-year/60,000-mile limited powertrain warranty helps make it one of the best warranties in the business.

SECURITY+PLUS

For extra peace of mind, add Nissan's own Security+Plus® Vehicle Protection Plan. Ask for it by name; it's the only extended service agreement approved by Nissan. Security+Plus – available in a variety of comprehensive coverages – is convenient, economical and provides long-term mechanical protection.

FINANCE CHOICES

Buy or lease your Nissan vehicle with one of the many attractive SignatureFINANCING programs from Nissan Motor Acceptance Corporation (NMAC). You'll enjoy competitive finance rates and terms, plus the convenience of quick response to your credit application – often within minutes. Visit your Nissan retailer for information about NMAC financing opportunities.

PARTS AND SERVICE

When it comes to parts for your Nissan vehicle, be sure to select Genuine Nissan Products. Every part is made to the same exacting standards as the original by the people who built your vehicle in the first place. And they are the only parts to carry our factory-backed warranty. At your Nissan retailer, you'll also find factory-trained technicians to service your Nissan, using the most up-to-date diagnostic equipment.

CUSTOMER ASSISTANCE AND INFORMATION

For the name of your nearest Nissan retailer or for specific product brochures, call 1-800-239-8810 toll-free. Or call 1-800-NISSAN-1 for answers to product-related issues and solutions to your transportation needs. You may also visit our website at <http://www.nissan-usa.com>.

WHENEVER THERE'S A CHILD IN YOUR FRONTIER

With a front-passenger air bag, a rear-facing child restraint must never be used in the front-passenger's seat with the passenger air bag turned on. An inflating air bag can cause serious or fatal injuries to a child in a rear-facing child restraint. Nissan and the federal government recommend that children 12 and under be properly restrained in the rear seat in passenger cars. Of course, Frontier's rear jump seats are not suitable for child-restraint system use. See your Frontier owner's manual for proper child safety. Remember, the risk of serious or fatal injury to children in automobile accidents can be reduced with a properly installed child restraint. In some cases – depending on the vehicle, the child restraint and its seating position – you may also need a locking clip, supplemental buckle/belt or tether strap to install the child restraint correctly. This is especially true with older vehicles on the road today. Before you install a child restraint in your vehicle, please consult your Nissan owner's manual to see if your vehicle requires an additional part. You should also study the child-restraint manufacturer's instructions for proper installation and the correct routing of the seat belt.

All illustrations, photographs and specifications in this publication are based on the latest product information available at the time of printing. Some vehicles shown with optional equipment. See the actual vehicle for complete accuracy. Availability and delivery times for particular models or equipment may vary. Nissan Motor Corporation U.S.A. reserves the right to make changes at any time, without prior notice, in prices, colors, materials, equipment, specifications, and models, and to discontinue models or equipment. Specifications, options and accessories may differ in Hawaii, U.S. territories and other countries. For additional information on availability, options or accessories, contact your Nissan retailer.

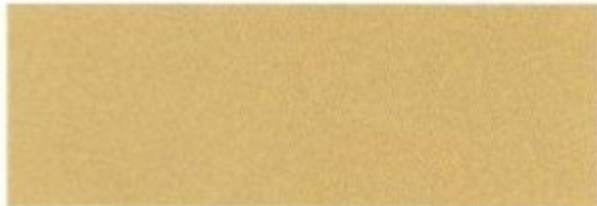

\* For complete information concerning warranty coverage, conditions and exclusions, contact your Nissan retailer and read the actual warranty.

\*\* Limited availability.  
\*\*\* Graphics delete option available on Appearance Package. (Not available when combined with Comfort or Power Packages.)

Nissan has taken care to ensure that the color swatches presented here are the closest possible representations of actual vehicle colors. Swatches may vary slightly due to the printing process and whether viewed in daylight, fluorescent or incandescent light. Please see the actual colors at your local Nissan retailer.

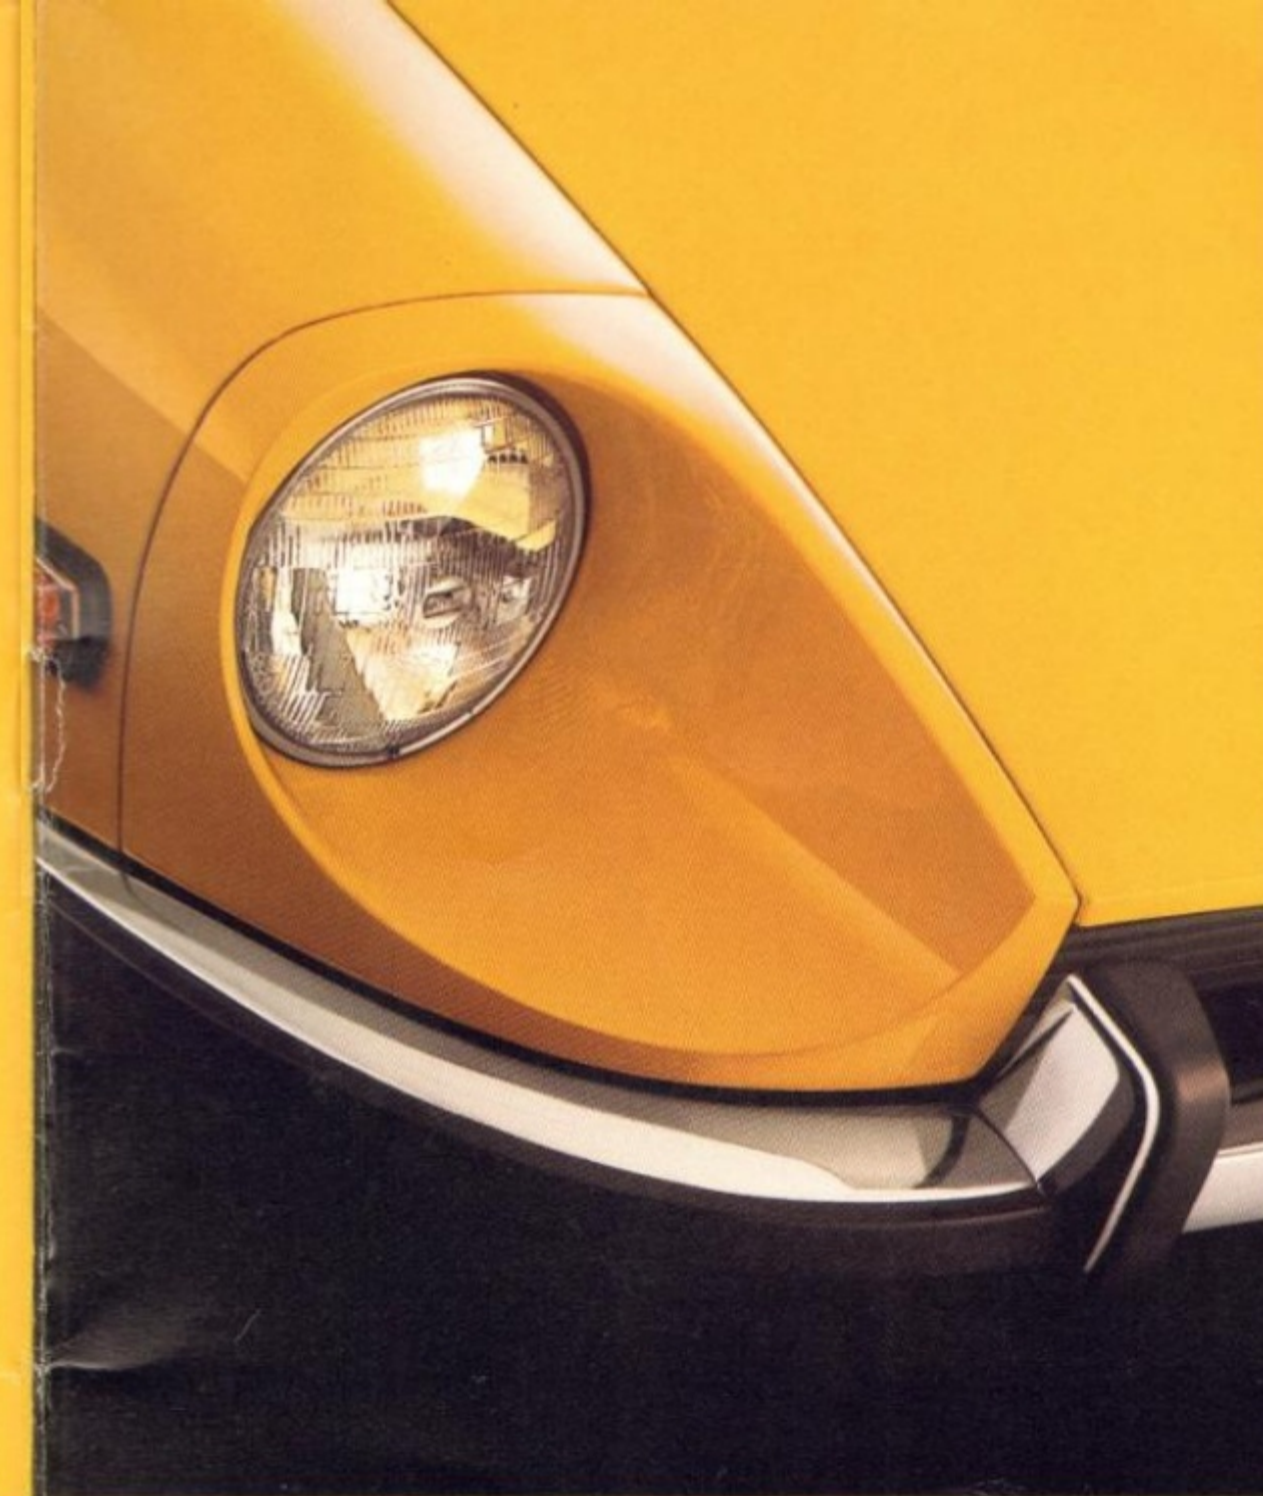

# HAVE YOU MET THE REST OF THE NISSAN FAMILY?

Any car can get you from point A to point B. A special car gets you there with a smile on your face, and for over 80 years, Nissan has built vehicles that do just that. From our legendary 240Z™ to our jungle-conquering Pathfinder®, we've always believed cars serve many purposes. Transportation, after all, is just one of them. (The 240Z you see here was the personal car of Mr. Yutaka Katayama, the father of the Z®. It's been customized and it's not for sale. But you can find other vintage Zs – restored by Nissan to their original glory – for sale at one of our designated Z Stores.)

®Z is a registered trademark of Nissan Motor Co., Ltd.  
For Z Store information, visit our website at: <http://www.nissan-usa.com>.

## 1970 240Z™

An instant hit, this car revolutionized the way the world looked at sports cars. Like many cars at the time, the 240Z possessed stirring performance and handling wrapped in exciting curves of sheet metal. But for the first time, these qualities came in a sports car durable and affordable enough to appeal to a wide range of buyers. This unprecedented combination resulted in the 240Z selling 500,000 units in less than ten years, a level that the Corvette took 25 years to reach. Over the years, the Z® has continued to maintain a high profile – eventually selling over a million units, accumulating numerous awards, and setting a standard that sports cars today still seek to emulate.

## EIGHTY YEARS. ONE PHILOSOPHY.

### 1960 1200 SEDAN

With a 48-hp 1,200-cc engine and body panels a full millimeter thick, this sturdy 4-door was the first sedan Datsun brought to America.

### 1967 2000 ROADSTER

The most sought-after Datsun roadster by collectors, the 2000 is also the first Japanese production sports car to come with a 5-speed. That, plus its robust 150-hp engine, made it extra fun to drive.

### 1970 BRE 510®

A racing version of our first sports sedan, this car gave Nissan its first national championship. In fact, the 510 dominated its series, winning 15 out of 21 races. Today, the 510 enjoys a cult-like status and is still active in SCCA racing.

# LOVE CARS. LOVE PEOPLE. LOVE LIFE.

## 1962 PATROL®

Nissan's first sport utility vehicle in the U.S., the Patrol featured 4-wheel drive and a 145-hp 4,000-cc 6-cylinder engine. Roy Rogers was its first advertising spokesman.

## IMSA GTP RACE CAR

Almost unbeatable, it dominated the series while winning the IMSA GTP Manufacturer's Championship in 1989, 1990, and 1991.

## NISSAN GOBI® TRUCK

This "out there" concept truck, developed in the late '80s by Nissan Design International, is a direct descendant of the very first Datsun truck.

## 1937 TYPE 15

One of the first Datsun-manufactured automobiles, it also has enormous significance as the first mass-produced Japanese vehicle. Other Type 15 models included a mini pickup and delivery van that delivered all kinds of driving fun.

# THE 1998 NISSAN LINEUP

## MAXIMA®

Our flagship; the ultimate in luxury and performance.

## 240SX®

A true sports car in a refined package.

## ALTIMA®

Unexpected luxury at an affordable price.

## 200SX®

Fun when you want it; practical when you need it.

## SENTRA®

Lasting dependability; spirited performance.

## PATHFINDER®

The authentic sport utility vehicle.

## QUEST®

Comfortable for kids; sophisticated for adults.

## FRONTIER™

The tough truck you can depend on.

Enjoy the ride.™
