The Freedom of the CONDOR

Condor Coach opens the world's highways and byways to you for wonderful new adventures in travel and holiday living. Just as the giant California condor, North America's largest bird, hovers and glides freely in the sky, Condor Coach carries you with new travel freedom. Go where you want, stay where you want without hindering schedules or reservations. A completely self-contained home on the road, Condor Coach provides you the ultimate in travel coach mobility, living and comfort. Every convenience of your own home! Its functional modern exterior in Condor Gold creates an attractive, inviting home in any setting: at the sea shore, lake side, desert, mountains—or wherever your whim takes you. And it drives as easily in city traffic as on the highways. Because the Condor Coach is so complete and flexible, it can be all things to everyone: the hunter, fisherman, skier, explorer, traveler, retiree, weekender—and especially you!

Living in the CONDOR Coach

When you step inside the Condor Coach, you immediately begin to relax. Each detail of the interior—the wide-open design, the warm decor, the luxurious kitchen, the comfortable sleeping areas—has been designed expressly for leisure living. You feel this same relaxation whether behind the wheel, stopped for a coffee break or parked for a restful night under the stars.

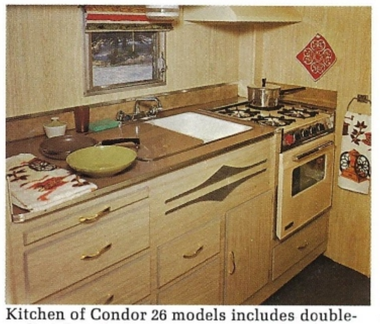

Spacious dinette converts to bed.

Davo becomes bed at night. Bucket seats double as lounging chairs.

Convenience and function are truly evident throughout the Condor. Well-planned storage space provides drawers, cupboards and wardrobes for everything. Clothing, pots and pans, foods and spices, maps and books, sporting gear—all have a place. Sleeping arrangements are flexible, too. Depending on the Condor model, comfortable beds can be provided for three to eight persons. Dinette and davo convert easily into beds by night. A double-size bed in the rear—with pull-down upper bunk—provides more sleeping area.

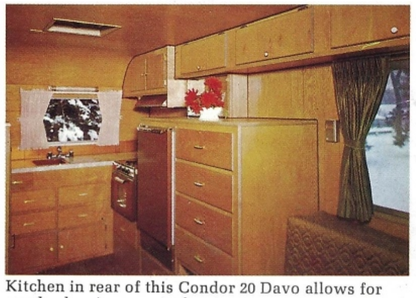

Kitchen of Condor 26 models includes double-well sink and 4-burner gas stove and oven.

Comfortable bucket seats provide relaxing riding positions for driver and passenger.

Interior colors shown in photo series are standard. Custom interiors on request.

Kitchen in rear of this Condor 20 Davo allows for ample sleeping area in front.

All Condor models have generous storage space plus a family-sized refrigerator.

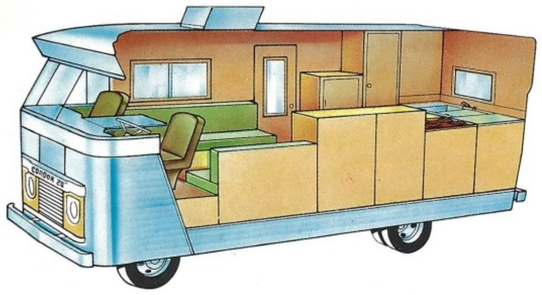

Ledge above bed pulls down to make double bunk. Regular bed serves also as day lounge.

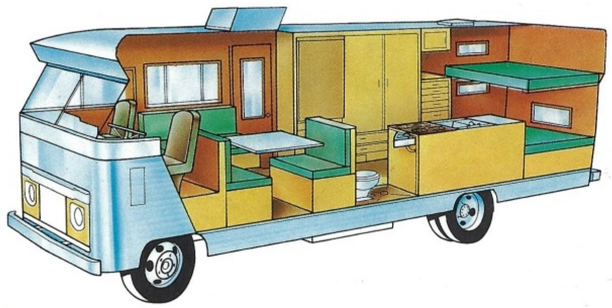

To the delight of every gourmet, Condor has a completely equipped modern kitchen. A family-size gas refrigerator reduces stops for food supplies or restaurant dining. And the Condor cook can prepare all the family favorites with the compact four-burner gas stove and oven. Double well kitchen sink and counters also give ample working space. The self-contained bathroom (not shown) includes wash basin, shower and flush toilet. So you see, living in a Condor Coach is really camping in luxury!
