

Trailseeker | 2027

Powered by love.

Explore your adventurous side in the Trailseeker. With 375 horsepower and the confident capability of standard Subaru Symmetrical All-Wheel Drive, the Trailseeker delivers outstanding traction and capability in all kinds of weather and terrain — something the Honda Prologue, Chevrolet Blazer EV, Tesla Model Y, and Ford Mustang Mach-E can't match.[1] With up to 281 miles of range[2] and fast charging from 10% to 80% in about 28 minutes,[3] the trail ahead is never a question, just an invitation.

Trailseeker Touring with Blue and Black leather.

Premium

Information current at time of printing.

1 Based on competitor information from manufacturer websites as of May 2026. 2 Manufacturer-estimated range on a full battery charge. Actual range will vary with driving conditions, weather, and your vehicle's condition. 3 Charge time varies based on vehicle level of charge, charging rate, ambient temperature, and many other factors. 4 EyeSight Driver Assist Technologies may not operate optimally under all driving conditions. The driver is always responsible for safe and attentive driving. Pre-Collision System is designed to provide automatic braking that either prevents a collision or reduces the severity of a frontal impact. Acceleration Suppression at Low-Speed is designed to reduce acceleration and minimize the severity of certain frontal impacts. Dynamic Radar Cruise Control is designed to assist the driver and is not a substitute for safe and attentive driving. Lane Tracing Assist operates only when used in conjunction with Dynamic Radar Cruise Control. Lane Departure Alert and Lane Departure Prevention operate only when the lane markings are visible. System effectiveness depends on many factors, such as vehicle maintenance, weather, and road conditions. See your Owner's Manual for complete details on system operation and limitations. 5 The distraction mitigation system is a driver recognition technology designed to alert the driver if their attention to the road wavers or if the driver's face appears to turn away. The driver is always responsible for safe and attentive driving. System effectiveness may be affected by articles of clothing worn on the head or face. See Owner's Manual for complete details on system operations and limitations. 6 Digital Key requires activation and an active trial or subscription. Feature availability and functionality may vary by trim level, device, connectivity, and other factors. See your Owner's Manual and Subaru retailer for details. 7 Premium paint at additional cost. See your Subaru retailer for details. 8 Trailer brakes may be needed.
